**When you come right down to reason, what is there to "discount" tires—**

**THE** next time a friend comes to you all excited about some wonderful tire bargain—ask him how much value he ought to get for each dollar of tire money.

It's astonishing that any car owner today should not know all the tire service he is entitled to.

Not how to check up between the economy of par quality on one hand—and big discounts, surplus stocks, discontinued lines and retreads on the other.

For two years U. S. Tire makers have been telling the American people all about tires.

They have laid open the tire business from every angle.

They have always led the fight for better tires.

They have consistently maintained quality first standards with certain economy for the tire buyer.

They have established 92 Factory Branches all over the country. Perfecting U. S. distribution so that you get a fresh, live tire every time you buy a U. S. Tire.

So when a man once decides on U. S. Tires he knows what he is getting in quality—service—economy.

In support of his own judgment he gets the pledged word and reputation of the largest and most successful tire concern in the world.

A sound reason for the fact that you see more U. S. Tires on more cars than ever this year.

One of the few tires of which it may be said that they deliver economy year in and year out and tire after tire.

**SAVING AS A LAST RESORT**  
Some people save in a haphazard fashion, putting what is left in the bank, after they have spent practically all their pay check, and naturally they don't get anywhere. The best way is to determine on a reasonable per cent of your salary to be put into your savings fund; then deposit it each time you are paid, before you have spent anything. Your account at the First National will be welcome. If you begin small you will grow big in time.
