

Local and Personal

MASONIC CALENDAR
 Stated convocation of Stekiyou chapter, R. A. M., Thursday evening, September 15. Also Royal Arch work.
 Special communication of Ashland lodge No. 23, A. F. & A. M., Friday evening, September 16, work in the third degree.

To Spend Winter Here—
 Mr. and Mrs. C. C. Simmons are new arrivals at the auto camp grounds from a ranch north of Medford. Mr. and Mrs. Simmons will locate here for the winter months.

Watch Yeo's window. 299-tf

A Question of Sites—
 Jack Peebler and wife and two children have returned from a hunting trip up at the Green Spring mountain. Their shooting prowess brought them a good sized deer, of which the children were as proud as the parents, saying "We killed a deer." Jack wired to San Antonio, Texas, about a mill he owned in the region of the flood district, and this is the answer he received: "Your dam is here by the mill-site, but your mill isn't here by a dam-site."

ANJOU, BOSCH AND COMICE PEARS
 Will be ready to pick the 15th. Will begin packing the 19th for shipment—Ashland Fruit and Produce Association. 8-4

To Attend O. A. C.—
 Jack Brady and Ted Ge Baer left yesterday for Corvallis, where they will enter the Oregon Agricultural college as sophomores. They will be room mates, share all the joy packages from home together, and are members of the same fraternity. Among others who are attending the O. A. C. are Burton Wynne, James Porter, Darrel Minkler and Isaac Porter.

Civic Club luncheon at Hotel Ashland Tuesday, September 20, at 12 o'clock. Tickets, 60c, at Mrs. Sugg's millinery parlor, 39 East Main street. 10-6*

Leave for Corvallis—
 The Kellar family left for Corvallis today, where Mrs. Kellar will keep house for her son and daughter, Robert and Ivern, who are attending Oregon Agricultural college. The Kellars will be gone the entire school year, having rented their home on Allison street to the Cornelius family.

For pleating see Orres. 303tf

Baby Daughter Arrives—
 Word has been received here of the birth of a daughter to Mr. and Mrs. Fred Creason, at Dunsmuir. Mrs. Creason was formerly Miss Galdys Godd, of Ashland.

Good food, cooked right, served at reasonable prices. Hotel Ashland Grill. 297tf

Leave for Corvallis—
 Mr. Bechtels, who has been clerking in the White House grocery, left today for Corvallis where he will attend the Oregon Agricultural college. Mrs. Bechtel will leave for Corvallis the first of next week.

Cliff Payne makes benches.

Local Girl Marries—
 Miss Mildred Brunk was married to Adolph Greenbaum at Salem, August 27. The bride is an Ashland girl, her father having at one time been postmaster here. The groom is a graduate of Yale college, and is now a junior partner of Greenbaum's department store in Salem. They will make their home in Salem.

GRAVENSTEIN APPLES, 50 lb. box, 75c delivered. Phone 10-F-3 or 9-F-11.

Orres cleans and remodels clothes. 303tf

To Attend U. of O.—
 Miss Wilma Chatten has left to attend the University of Oregon at Eugene this year, where she will take up physical education. She spent two years at Willamette university at Salem majoring in journalism. Miss May Poley will also attend the University of Oregon again this year.

Automobile Insurance—Yeo, of course. 299-tf

Burdick Family Returns—
 R. L. Burdick and family have returned from an extended outing trip at Crater Lake and Lake O' Woods.

Your fall suit is here. Paulser-ud's. 307tf

Call apples for sale, eating and cooking apples. Ashland Fruit & Produce Association. 10-6

MICKIE, THE PRINTER'S DEVIL

To Frisco Hospital—
 M. J. Lore will leave this evening for a San Francisco hospital where he may undergo an operation.

A good and dandy Estley organ for sale cheap. Suitable for country school houses or mountain homes. At Peil's Corner. 11-4

Visit Rogue River Ranch—
 Mr. and Mrs. F. H. Walker, daughter, Janie, and Mrs. Walker's sister, Mrs. Grace Dreys, spent Sunday with Mr. and Mrs. J. K. McClaren, on their ranch near Rogue River.

CONTINUANCE OF SUMMER NORMAL
 NRGED BY BRISCOE

(Continued from Page 1)
 the doctors, the confectioners, the taxis, drug stores, school supply institutions; in fact, I should say that there were few lines of activity in Ashland that did not in one way or another, get just a little of the money that these people brought into our community.

In concluding the financial part of this presentation, I care to give as my honest opinion that as a result of the normal school for a period of six weeks, more clear money was left in the community than the Chamber of Commerce put out to secure this session of the normal. Professionally, the school may be considered as quite a success. The organization was completely perfected the first day, the instructors were all well prepared and fitted into their duties in quite an acceptable way.

It was a common expression during the session of the school that the members attending the Ashland normal school had never before been in a more satisfactory summer school. I am going to quote just a few words from a teacher of a long and satisfactory experience: "In the first place I wonder if you know just what a great success your first session of the normal school was, and secondly, if you know just how much real help one of your members got from it? Your experience evidently has taught you just how little even experienced teacher know and you seem to hit the nail every time. I certainly do thank you, for I came back to my work with a freshness that I haven't felt recently."

At the end of the school I think it is safe to say that there was but one sentiment expressed; that the normal in Ashland might be continued next year, and if it was, each student declared his intention of attending again and boosting all the year for a normal school at Ashland. During the session of the school, and after it closed, a number of letters was received from the president, and after his death, from the registrar and the president of the board of regents, expressing their satisfaction in the results of the normal school in Ashland.

It probably is not too much to say when one gives voice to the feeling that the normal school was entirely satisfactory from every point or angle in which we care to look at it.

It is the hope of the board of regents that a school of not only six weeks, but of twelve weeks, may be continued at Ashland in the summer of 1922.

JAPS HAVE NEW IDEA FOR DISARMAMENT CONFERENCE ISSUES

(Continued from Page 1)

why the Mexican question should be withheld. Japan is not the only country suffering from the disturbed situation in Mexico.

"The Panama canal will be a fit subject for discussion at the conference. America declares that the canal was opened for the benefit of the world at large, but no unbiased observer will say that the canal is being operated with special regard for the welfare of the world. Why does not Japan offer to undertake the task of making the canal more international with regard to administra-

tion? There is no reason why it should not be internationalized, as the expressed purpose of America has been internationalization. These questions should be settled at the same time of the conference. Indeed, they should be settled first, since it is the American government that has called the conference."

Dr. Matusami is quoted in the Yamato, which is not one of the leading Japanese newspapers, so his views should not be taken too seriously.

AUTO THAT ACTUALLY JUMPS
 Car's Peculiar Feature Based on the Principle That Actuates the Knee of the Athlete.

The jumping stunts of automobiles in the movies are the result of trick photography. There has been produced in France a light car that does many of these spectacular performances, not only pictorially, but actually, says Popular Mechanics Magazine. It is a small, light car with a speed of 25 miles an hour. The particular feature that enables the car to negotiate all obstacles with impunity is the manner of connecting the car to the rear wheels. It has been compared with the action of the human knee. A jumper bends his legs at the knees, straightens them out rapidly to get the effect of a spring. On striking an obstacle the wheels rise independently of the rest of the car, which remains horizontal. Under test, when driven against an obstacle 40 inches high, with an approach sloping at 45 degrees, the car was lifted to a height of 57 inches and landed at a distance of 20 feet, all four wheels striking the ground simultaneously. On landing, the spring in the wheel connection cushions the concussion of the wheel with the ground, again resembling the action of a jumper's knee, which bends under him as he alights.

A Japanese Garden.
 The typically Japanese garden of Mr. Inabata, a Kyoto millionaire, near (Nansel) temple is described by a correspondent. It is a good example of the Japanese talent for concealing art; it contains a twin waterfall not only artificial but even said to be exact miniature of some famous Japanese fall; but which looks as if it had like Topsy, "just grown," also a large artificial cave with walls of rough concrete which would hardly

New Scientific Process Gives Cycol Greater Service Value

Three-fourths of all engine troubles are caused by motor oils breaking down and thinning out under engine heat which ranges from 100 to 3000 degrees Fahrenheit. The constant aim of lubricating science has been to increase the stability of motor oils under these severe temperatures.

This aim was realized by the development of the new Hexeon Process used exclusively in making Cycol Motor Oil. The Hexeon Process is an outstanding scientific achievement. It goes right to the root of lubricating oil troubles. It gives Cycol greater stability by removing destructive "sulphur" compounds. Oils containing "sulphur" compounds break down and thin out rapidly under engine heat.

Also, because of its greater stability, Cycol eliminates or reduces carbonization, evaporation loss of oil, "gumming" and pitting of valves and other troubles arising from the use of unstable oils.

Cycol-ize today. Wash out the crank case—not with kerosene—and refill with the correct grade of Cycol as shown by the Cycol Recommendation Chart.

ASSOCIATED OIL COMPANY, San Francisco

Comply With the Law
 AND USE

Printed Butter Wrappers

ACCORDING to the ruling of the Oregon Dairy and Food Commission all dairy butter sold or exposed for sale in this state must be wrapped in butter paper upon which is printed the words "Oregon Dairy Butter, 16 (or 32) ounces full weight," with the name and address of the maker.

To enable patrons of the Tidings to easily comply with this ruling this office has put in a supply of the standard sizes of butter paper and will print it in lots of 100 sheets and upward and deliver it by parcels post at the following prices:

100 Sheets, 16 or 32 ounces	\$1.75
150 Sheets, 16 or 32 ounces	\$2.75
500 Sheets, 16 or 32 ounces	\$4.00

Send your orders to us by mail accompanied by the price of the paper and it will be promptly forwarded to you by parcel post, prepaid.

We use the best butter paper obtainable, and our workmanship is of the best. Let us have your order and you will not regret it.
