Crater Lake Season Ends—

Notwithstanding that the Crater lake season has officially closed, if the fine weather continues in that region the world wonder will be visited by many Ashland residents within the next week or two. The fact that there are no longer any hotel accommodations at the lake will not bother these folk in the least, for they will take along their own canteens and bedding and camp out, or may spend the night at Prospect or the Rogue Elk resort.

Deer Hunters Return—

Shy Peirson and Benzy Bowers went hunting for deer last week. Benny says they led the pack mules and he did the hunting. However that may be, they brought home the deer meat in the form of two big, fine bucks, and the writer, through their kindness, has been eating venison.

Regular Meeting Of Civic Club On Tuesday Afternoon

The regular semi-monthly meeting of the Civic club will be held in Chautauqua-Pioneer hall Tuesday afternoon at 2:30 o'clock. All members and friends are urged to be present. There will be discussion and reports as to what has been done and of plans under way. Several attractive offers have been made to the club to help raise money for the new community club house. Mrs. Shell will sew for the clubwomen during November and give all her earnings to the fund. During October Mr. Shell will cut the hair of any boy under 12 and give the full price to the clubwomen. Urge your sons to get several haircuts this month. Dr. Mattie Shaw has a proposition that will interest us, especially those who have already heard her delightful readings. The salvage room will be under way by Wednesday and we want your plans and donations. If you know of any ways for individual money making, come and tell us about them. Mrs. Sugg is planning to make doll hats for Christmas. Mrs. Wilshire is going to make orders for dahlia bulbs. Stand by the ship, for it is sailing on. Read "Our Village Room," by Edith Barnard Delans in the October Ladies' Home Journal, and decide about the title for a similar article on our own community club house. Mr. Lamb has one of his splendid plans which you will hear about on Tuesday and feel a ton of responsibility lifted from your shoulders. The "human calendar" will report progress, and the months will get together for a quick drive. A composite answer has been collected regarding the "human calendar."

Hints From Gladstone.

Gladstone was once asked to give some suggestions for platform aspirants and it is said that it was attention to these rules which in no small degree accounted for Gladstone's own power in "swaying audiences": 1. Study plainness of language, always preferring the simpler word. 2. Shortness of sentences. 3. Distinctness of articulation. 4. Test and question your own arguments beforehand, not waiting for critics or opponent. 5. Seek a thorough digestion of and familiarity with your subject, and rely mainly on these to prompt the proper words. 6. Remember that if you are to sway an audience, you must, besides thinking out your matter, watch it all along.

Northern Lights.

The name "Aurora Borealis" was first used by Cassendi, who, in 1621, observed one in France and wrote a description of it. The "aurora" is periodic in its manifestations, the finest display being at intervals of 60 years, and less marked ones at intervals of ten or eleven years. It is asserted that the greater and lesser displays correspond with the increase and decrease of spots on the sun. This phenomenon is generally manifested in the following way: A dim light appears on the horizon shortly after twilight and gradually assumes the shape of an arch having a pale yellow color, with its concave side turned earthward. From this arch streams of light shoot forth, passing from yellow to green and then to brilliant violet.

RICH IN HISTORIC INTEREST

City of Santo Domingo Crowded With Landmarks Connected With the Famous Conquistadores.

Santo Domingo is rich in historic interest. It is the oldest of all the permanent settlements of American soil. Here Columbus founded various colonies, and Santo Domingo city became his favorite of all the New world. It was here that he spent some of the happiest time of his life, and here that he was reduced to prison by his political enemies, and from here he was sent in chains and disgrace to Spain. The old tower where he was imprisoned still remains, and his bones lie in the great cathedral of Santo Domingo city.

In this oldest city of the New world one still sees the remains of the first church built in America. Its foundations were laid in 1502. Here is the house where Cortez kept the court records before he had ever heard of Mexico. From here Ponce de Leon set out in his search for the Fountain of Youth. Here lived Pizarro before he went to Panama, and sailed down the west coast to conquer the Inca empire. Everywhere one turns he encounters old landmarks where the famous conquistadores had their first experiences in the New world.

Padre le las Casas entered the priesthood here, and in his indignation because of the abuse of the Indians by the Spaniards began to import slaves from Africa to make lighter the work of the Indian laborers. Here was founded the first university of the New world when in 1538 a royal charter was granted for the establishment of the University of St. Thomas.

VERMONT MAN TELLS OF ARRANGEMENT BY WHICH IT IS EASY TO FIND DATE WANTED.

The following simple method of finding the day of the week for any date in a month, when the first day of January is known, has been handed down among us for two centuries. Supposing that the new year begins on Wednesday, we place that day opposite the letter A, with the following days opposite the next six letters, and with Tuesday opposite G. The first days of the 12 months are opposite the initials of this sentence: "At Dover dwell George Brown, Esq., good Charles Finch and David Friar." For the ordinary year the initial days of the months, as above, are Wednesday, Saturday, Tuesday, Thursday, Sunday, Tuesday, Friday, Monday, Wednesday, Saturday and Monday. As the first, eighth, fifteenth, twenty-second and the twenty-ninth day in each month are on the same day of the week, it follows that the 1st of December and the 29th fall on F and the 31st on A. The first and last day of each year, excepting leap year, fall on the same day of the week. For leap year use the seven letters, beginning A with the week day that stood originally for B on New Year's day.—Edward H. Williams Jr., Westdale, N. Y., in New York Herald.

Worth One's Salt.

The phrase "not worth his salt" dates back to the time when salt was regularly doled out to the soldier as part of his pay, and one's rank was designated by his place at the table in reference to the position of the salt—members of the family and honored guests being placed above the salt, while retainers and servants sat below it. The Arab considers as sacred the guest who has partaken of his salt, a custom that might well be adopted elsewhere. In Africa a handful of salt will purchase a bride, and while we have all heard of those rare mortals who are worth their weight in gold, or whose price is above rubies, apparently no one in that section has achieved the distinction of being worth his weight in salt. What a find Lot's wife would have been to an African tribal king!
