Mr. Provost has been appointed agent for the company.

Luthy PERMANENT insulation shuts out battery troubles One reason why Luthy batteries are guaranteed

Heretofore more than eighty per cent of all battery troubles have been due to short circuits caused by separators rotting and allowing the plates to touch. This cannot happen in a Luthy battery. The plates do not buckle and they cannot touch. A Luthy battery cannot short circuit in the cells.

Luthy separators are built to allow free passage of the solution between the plates. In other batteries the current has to pass through pores in wood or rubber-compound separators, which offer increasing resistance as the battery grows older. That is why Luthy batteries continue to charge quicker and discharge a more powerful current through the entire life of the battery. And besides they are from 10% to 20% over-capacity.

The Luthy battery is the kind you want for your car. Because of its merits, the Luthy battery is guaranteed in writing—"Two years service or a new battery without cost." There is a Luthy battery for each type of car. Better come in today and examine the Luthy battery.

We repair and give service on all makes of batteries.

Two years service or a new battery without cost
