THE HARE AND THE FROGS

A hare, deciding that his life with foxes and fies and troubles rife, was not worth living—hurried down to jump into a pond, and drown.
When he reached the pond he found the frogs made such a frightened sound he changed his mind. "For these," said he, "is much worse fixed in life than me!"

ILLITERACY IN UNITED STATES

Partial Census Returns Indicate That There Are 6,000,000 or 7,000,000 Uneducated.

SOUTHERN STATES IN LEAD

Group of Nine Commonwealths Has More Than 2,000,000 Illiterates, One-Third of Them Native Whites.

Washington.—The United States is still one of the most illiterate of the civilized nations of the world, census figures for 1920 now available in some detail for 28 states reveal. The figures show more than 2,000,000 illiterates in a group of nine Southern states, one-third of them native whites.

Indications are that the army of illiterates in the United States will not fall far short of 6,000,000 or 7,000,000. There has been progress, however, and notably in the Southern states. Georgia, for example, has 328,838 illiterates, but the percentage of illiteracy is 15.3, as compared with 20.7 in 1910.

South Educating Its People.
Alabama has reduced its illiteracy from 22.9 per cent in 1910 to 16.1 per cent in 1920; Louisiana from 29 per cent to 21.9 per cent; Mississippi from 22.4 per cent to 17.1 per cent; South Carolina from 25.7 per cent to 18.1 per cent, and North Carolina from 18.6 per cent to 13.1 per cent.

At this rate, even without the proposed help of the federal government, the South should be virtually free from illiteracy in 30 years. In the meantime the states that have a large foreign-born population are faced with even greater problems than the South. The New York school authorities last year had copied from the census lists the names of adults reported as illiterate and have used this list as the beginning for a systematic drive on illiteracy.

Country Reducing Figure.
One of the striking revelations of the war was the large amount of native white illiteracy, and the 1920 figures tell very much the same story. While in states like Alabama, Georgia, Louisiana and South Carolina the problem is still mainly one of the negro, in Kentucky and Tennessee the native white illiterates actually outnumber the colored.

The 1910 census gave the United States an illiteracy record of 7.7-10 per cent. Indications are that the 1920 figure, unless the immigrant states of the East show up too badly, will run around 5 1/2 and 6 per cent—still considerably above the illiteracy figure for England, France, Germany, and some of the smaller nations of Europe.

For the most part illiteracy in the rural districts continues to be much worse than in the centers of population. In Alabama rural illiteracy is 20.4 per cent and illiteracy in the towns and cities only 6.5 per cent.

LANDLADY WELCOMES 'EM ALL

Babies, Dogs and Cats All Provided For in Apartment House in New York.

New York.—All the conveniences for wives, children, cats, dogs or other household pets are in the construction of an apartment house to be erected by Mrs. Edgar Saltus, wife of the late well-known novelist, Edgar Saltus, at Giles place, here.

The accommodations for the cats and dogs will include drinking fountains and ample spaces for basking in the sunlight. The plans, as drawn up and filed with the city building department, do not specify whether special areas and fountains will be designated for canines and felines, respectively, to avert strife.

Ample spaces within the patio also are set off as open air playrooms for the children of the neighborhood. Conveniences for the wives who occupy the apartments will include a pergola on the roof.

THIS LAMP SHOWS "BRAINS"

Stays Lighted for One Minute After One Turns the Electric Switch.

New York.—A light that stays lighted after it is turned out is one of electricity's most recent developments that is shown for the first time at the electrical show at the Seventy-first regiment armory.

The light stays on for one minute after one turns the switch. That brief illumination gives ample opportunity, it is argued, to leave the cellar without barking your shins or do any number of things that darkness makes hazardous.

Pulling a switch establishes a contact which keeps the light burning for a brief period. Then a thermostatic control acts, the circuit is broken automatically and the light goes out. Meantime you are on your way.

Most Gold From Alaska.

Dawson, Alaska.—Alaska yielded the greatest amount of gold in the Yukon valley this year. Statistics made public recently by Superintendent Richard of the northern commercial posts in Alaska, showed that of the valley's total yield of \$4,000,000 Alaska's output was \$2,675,000. Yukon was \$1,250,000, and Atlin, Can., \$75,000.
