tary commanders of the United States and the allied armies of the world war, there would be no more wars. They are all very earnestly and strongly for peace. They know, better than civilians, the horrors of warfare, and they are humane enough to want to avert another

If the other maritime powers force the United States to enter into a race in building naval armament, they will find this country a few laps ahead of its nearest competitor. But this country greatly prefers to stop the mad racing in construction of armaments, and there is very good reason to believe that the competition will be off before the arms conference finally adjourns.

Soviet Russia Yields Scarcely 20 Per Cent of Former Foodstuffs .

By LEO PASVOLSKY, in Weekly Review.

In 1916 the grain producing territories of that portion of the former Russian empire which is now controlled by the soviets yielded about 1,100,000,000 poods (a pood is about 36 pounds) of wheat, rye, barley and oats over and above the amounts needed for local consumption in these territories. During the crop year 1920-21 the food supply agencies of the soviet government were able to procure from these territories only about 280,000,000 poods of grain, in many cases at the expense of the amounts needed for minimum local consumption.

The tax in kind established for the current crop year in the place of the system of requisitions which existed last year calls for only 240,000,-000 poods, yet Lenin has already stated that there is reason to believe that the actual amounts gathered will be "several tens of millions of poods under the original figure."

In other words, under the soviet regime Russia can scarcely vield 20 per cent of the amount of foodstuffs she yielded under the imperial regime, for distribution to the portions of the country which do not raise their own food supply and for exportation abroad.

thousand uses that can be cited for study of phisiology and hygiene was

SPECIAL SALE OF BOX CANDY AT CUT RATES

There may be little actual difference between the quality of food prepared in the kitchen and that cooked at the table, but, somehow, the table-cooking tastes better. This is one of the reasons why so many people are inter-

ested in the

Westinghouse

Toaster Stove, which is almost a range in its abilities.

It broils, it boils, it grills, it toasts. It is attractive in appearance, and it lasts for years and years. It uses so little current that the cost of it is negligible.

You never had such hot cakes as come from this Toaster Stove! Nor such fresh, crispy, grilled bacon!! Nor eggs that tasted quite so good!!! Nor anything!!!!

Ask about the Westinghouse Toaster Stove at any of the following dealers:
