As a typical comet swings swiftly round the sun, the tail seems to swing around as well. Always it stretches from the comet in a direction away from the sun. As the tall may be many millions of miles in length," an explanation is needed to cover the question as to how it is possible in a few days to swing the tail through an arc of 180 degrees. Some comets are extraordinarily rapid movers as they round the sun. Thus, the periodic comet of 1843 reached, in its swing round, the wonderful velocity of 300 miles per second. However, it is more particularly the rapid angular swing of the tail that needs explanation. If the tail is precisely the same object throughout, a 72-hour swing of a hundred million miles of tail through two right angles would mean that the terminal particles covered an arc considerably over 150,000,000 miles long at the rate of some 600 miles per second .- Scientific American.

### AGED MAN WOULD SEE WORLD

Turkish Methuselah, at 146, Refuses to Consider Himself as Too Old to Travel.

A modern Methuselah, reputed to be the oldest man on earth, has started out to see the world before he gets "too old to travel." Zora Mehmed, one hundred and forty-six years old, of Constantinople has arrived in Paris. Zora, who has been working pretty consistently for 140 years, is in excellent health and boasts of being

able to carry a 200-pound weight. Zora produces identification papers to prove he was born in 1775, and he refers to his closest competitor for longevity honors, a Sloux Indian in the United States, aged one hundred and thirty-seven years, as "a mere boy." Zora has a son ninetyfive years old, and he has so many descendants that he long ago lost

The aged Turk is a skeptic on the subject of matrimony. Having tried the experience four times, he says he speaks with a certain amount of authority.

"Women," said Zora, shaking his head bitterly, "women, they may seem as sweet as the rosy dawn, but, verily, they are more often like thorns, hidden only by a rosy exterior."
