At least 60 mountains in California rise more than 13,000 feet above sea level, but they stand amid a wealth of mountain scenery so rich and varied that they are not considered sufficiently noteworthy to be named, according to the United States geological survey, Department of the Interior. But California has several additional mountain peaks more than 13,000 feet high that have been named, or 130 in all, as well as a dozen that rise above 14,000 feet.

CLOTHES "Tailored to Measure by Born" are best known, perhaps, for their remarkable wearing qualities. The woollens are carefully selected and tested; they are painstakingly tailored under intelligent supervision. Yet Born prices are actually lower than the figures often asked for clothes of uncertain quality.

If you like the idea of fine clothes at a modest price, we will gladly show you some very interesting values.
