 Fraternal Orders and Societies  
 Advertising for fraternal orders or societies charging a regular initiation fee and dues, no discount. Religious and benevolent orders will be charged the regular rate for all advertising when an admission or other charge is made.

**What Constitutes Advertising**  
 In order to allay a misunderstanding among some as to what constitutes news and what advertising, we print this very simple rule, which is used by newspapers to differentiate between them: "ALL future inserts, where an admission charge is made or a collection is taken IS ADVERTISING." This applies to organizations and societies of every kind as well as to individuals.  
 All reports of such activities after they have occurred is news.  
 All coming social or organization meetings of societies where no money contribution is solicited, initiation charged, or collection taken IS NEWS.

Entered at the Ashland, Oregon, Postoffice as Second-class Mail Matter.

**MAKE DREAMS COME TRUE!**

Last night's meeting of the chamber of commerce was productive of many good results which, unquestionably, will be far-reaching. A number of excellent suggestions were made, most of them emanating from the secretary's annual report. In every instance they were of a constructive nature and if acted upon and carried to a conclusion, must make for the betterment of Ashland.  
 The most important feature of the meeting came near its end—the launching of the hotel and sanitarium project. It was so quietly and satisfactorily disposed of, and the absence of fireworks so conspicuous, that it augurs well for success. In another column will be found the communication which forms the basis upon which the opposing factions to the "late and lamented" controversy in the chamber of commerce, have gotten together on a common ground, and if the spirit manifested at the meeting last night is adhered to, it is a foregone conclusion, that by mid-summer ground will be broken for the setting of the crown on Ashland's greatest achievement and asset—Lithia Park.

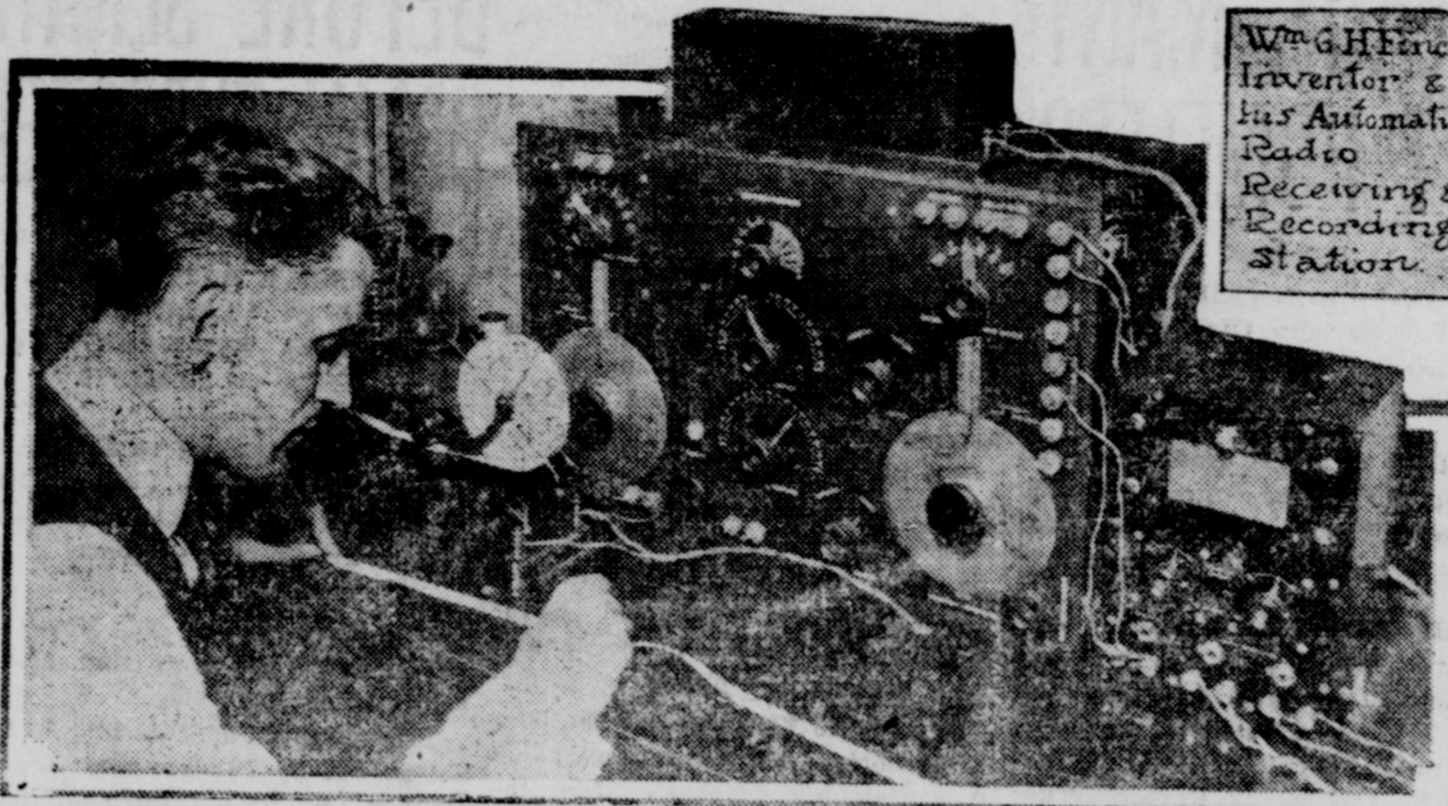

The committee, ten in number, is made up of men in whom the public have confidence; men who have not been actively identified with the "late unpleasantness," and who can be relied upon to do that which is best for Ashland. The proposition, so far as the hotel is concerned, stands just where it did before, in that Mr. Greer promises to bring an investor to Ashland to confer with the committee at such time as may be deemed opportune for the furtherance of the project. The great stride toward the wiping out of all past differences, was made when the board of directors, at a meeting held just prior to the meeting of the chamber of commerce, decided to stand by the resolution and to accept the committee named by Mr. Greer. They have at a single stroke removed every obstruction and made a common ground upon which all can meet for the furtherance of this, the biggest and most important step which has ever been made in the

**Print Words On Tape By Radio Invention**

NEW YORK, March 23.—An automatic radio receiving device that will automatically pick up and print press dispatches sent in wireless code!

That is the latest device, just perfected, for the radio enthusiast. The machine, when adjusted, runs like a clock and requires no operator.

The device has been perfected and patented by William G. H. Finch, an experimental engineer, of Buffalo, who is an associate member of the institute of radio engineers and other technical societies. He has been identified with radio development since 1908, holding one of the first licenses granted by the government early in 1913. During the world war he organized and had charge of the radio, first field artillery, N. Y. G. Finch's radio device enables anyone to receive broadcasted code messages from any distance, a record being made of the message, which is printed automatically on a tape. It can pick up news dispatches.

**Gives Practical Demonstration**  
 During the past year, Mr. Finch gave practical demonstration of his invention at the Hoboken radio station of the Delaware & Lackawanna railroad. The navy department cooperated in one practical demonstration, which was successful.

Radio engineers declare the Finch invention has advanced the new field of radio telemechanics. The device has proved that explosives can be ignited by radio at almost any distance—that a moving body can be controlled in the same fashion, by radio waves or motors; bells and other indicating devices can be manipulated, whether they be visible or audible to the manipulator mattering not at all.

The simplicity of the Finch invention permits a novice to set it into operation.

The machine can be tuned in to any desired station and the apparatus adjusted so that it will pick up and record any message emanating from the station tuned in.

**PARIS CONTAINS 316,198 MORE WOMEN THAN MEN**

(International News Service)  
 PARIS, March 23.—According to official statistics published recently, there are in Paris 316,198 more women than men. The total number of men registered is 1,295,137. Out of a total population of 2,906,472, 52,474 persons refused to give their ages. Contrary to all expectations more men refused than women. Of the latter only 24,900 refused to give their correct ages. The officials dare

not guess at a figure as to the number of women who gave incorrect ages.

Other figures show that more couples get married in Paris than in any other part of France or the colonies. Corsica holds the record for the smallest number of marriages.

Only fourteen people in every thousand die yearly in Paris, while the number of births increases yearly.

**RUSSES MUST STOP AT RAILROAD CROSSINGS**

Commercial auto buses and trucks operating over the highways of Oregon and Arizona will hereafter be required to come to a complete stop before crossing railroad tracks, according to recent orders passed by the Oregon public service commission and the Arizona corporation commission.

The orders, similar to those issued by the California railroad commission and the Nevada public service commission, provide that motor vehicles subject to the orders, shall come to a full stop not less than 50 feet from a railroad track or tracks at grade. Violation of the orders may subject the owners of such vehicle to suspension or revocation of his license.

During the year 1921, on the lines of the Southern Pacific company in Oregon and Arizona, 153 automobile accidents occurred at grade crossings, resulting in five deaths and 40 injuries to occupants according to R. J. Clancy, assistant to the general manager, in charge of safety work.

direction of progress in the history of Ashland. Nothing should be permitted to get in the way of that committee, to the end that the great purpose in view can be brought to a successful termination.

That committee will have the backing of a united chamber of commerce and behind them will stand every man, woman and child in the community. With this impelling force, the work of the committee cannot fail to be successful in making our dreams come true by bringing the hotel and sanitarium to Ashland.

**A COWARDLY ATTACK**

The current issue of the Medford Clarion contains a nasty, bitter attack on Thomas H. Simpson, of this city, in which it is made to appear that during his short incumbency of the office of county commissioner, to which he was appointed to fill the unexpired term of the late George Owens, he was largely responsible for the loss incurred by the county in the failure of the Jacksonville bank.

The basis of the accusation rests on falsehood and is a cowardly distortion of the facts. It is undoubtedly true that Mr. Simpson, engaged in the hardware business, just as any other merchant, sold hardware to the county. These sales were incidental to his private business and not influenced in any sense by his official position.

In so far as Mr. Simpson being in any measure responsible for the county losing money in the Jacksonville bank failure, the selection of the bank in which county deposits are made is a matter for the determination of the county treasurer—a bonded official.

The whole attack is a fabrication, violating all usages of common decency and is so obviously far-fetched, false and unjust as to make the article an insult to the intelligence of the Clarion readers, and we greatly miss our guess if the reactionary effect of the tirade is not exactly the reverse of that sought by the Clarion editor.

**O. A. C. EXPERIMENT STATION**

**Don't Dope Weak Chicks**

Giving "dope" to sick or weakly chicks is wasted effort. Vigor is the foundation of the paying flock. Neither sentiment, pity, nor purchase price should prevent the owner from killing every weak, deformed and diseased chick.

**Sow Flax Shallow**

Fiber flax should be planted shallow on a mellow, firm seed bed. When drilled in shallow with a double disc or hoe drill a more even stand may usually be had with 30 pounds less seed to the acre. The usual rate for broadcasting is 100 to 125 pounds per acre.

**Mineral Mix for Hogs**

A mineral mixture for hogs, kept before them at all times, is a great help in keeping the animals in good physical condition. A healthy and thrifty hog will utilize feed to better advantage than one not physically fit, so grain will be saved by mineral. The following mixture is recommended by the United States department of agriculture:

- Wood ashes ..... 1 bushel
- Charcoal ..... 1 bushel
- Salt ..... 8 pounds
- Air slacked lime ..... 4 pounds
- Powdered sulphur ..... 4 pounds
- Copperas ..... 2 pounds

**Sterilize Prune Boxes**  
 One important step in the control of brown rot is to sterilize the prune boxes before returning them to the orchard. Boiling water or live steam will do the work effectively. A good arrangement is to have a tank in which water may be kept hot with pipes run from the drier furnace. This tank, if large enough, will provide a means of washing the trays as well, thus keeping them from getting gummed up with drippings.
