GENOA, May 5.-The inter-allied war debts loomed up as a club with which Premier Lloyd George is trying to swing France back into line in the international economic conference. It is learned that he conveyed a clear warning to France that she must choose between Belgium and Great Britain in her future attitude towards Russia.

The premier is understood to have notified France that if she continues to support Belgium's opposition to article seven of the allied declaration of Russian conditions, there will be little chance for Sir Basil Blackett's debt plan being adopted, but, on the contrary, Great Britain will insist that every nation pay its war debts and be punctual about it.
