UNDER STRIKE CONDITIONS BEST EXPLAINED BY CHAIRMAN BEN W. HOOPER OF THE UNITED STATES RAILROAD LABOR BOARD IN HIS STATEMENT OF

JULY 1ST, READING AS FOLLOWS "In this case the conflict is not between the employer and the oppressed employes. The people of this country, through an act of congress, signed by President Wi'son, estabfished a tribunal to decide such disputes over wages and working conditions, which are submitted to it in WANTED-A live young man, capa proper manner. It is the decision of this tribunal against which the

shop crafts are striking. "Regardless of any question of the who take the strikers' places are merely accepting the wages and working conditions prescribed by a government tribunal and are performing a public service. They are not accepting the wages and working conditions which an employer is trying to impose. For this reason public sentiment and full government power will protect the men who remain in their positions and new men who may come in."

Adequate provisions have been made for the full protection of a'l new employes, the same as old emwork. Applicants should apply to LOST-Pair tortoise shell rimmed the office of the superintendent at Portland (Union station-, or to the assistant superintendent at Roseburg.

FORD FACTS

Corcoran, California, April 19th, 1922.

Price Auto Service Company, 301-311 South Topeka Ave., Wichita, Kansas.

Your letter of inquiry received about the kind of work we are doing with the Fordson Tractor.

I am very proud to say we do everything that four horses could do and 50 per cent more work with 75 per cent of the cost. We have had the Fordson about 19 months and have spent \$17 on it; we have a three-ton wagon, so you see, no load is too large. We have a set of W. & K. rubber tired whee's so as not to injure our streets."

We grade, level and float the streets. Plowed a part of the new water and sewer ditches; have moved dirt and do all of our hauling. In fact the Fordson is by far the best investment the city has, and it will do as well for any city if you will put a good steady man

in charge and let him keep it up. I am a farmer and have a Fordson. I personally take care of 60 acres of vines with it. Last year I went over 40 acres of the 60 fif-

I am very glad to recommend the Fordson for any city or farmer. Respectfully yours,

(Signed) F. A. CLEVELAND. Chairman of Board of Trustees, City of Corcoran, Calif.

# DESTRUCTIVE SULPHO COMPOUNDS Produced under the new HEXEON process.

One motorist says:

"I recently returned from an 1100-mile trip. Before

starting I cleaned out crank

case and filled with Cycol.

With Cycol I found better

lubrication, smoother oper-

ation, entire absence of

spark plug trouble, although

base was full at all times,

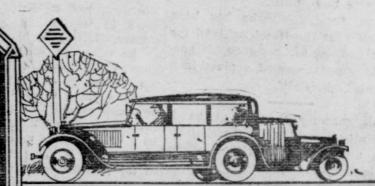

less carbon and an increase

of three miles to the gallon

M. BLACKMAN

San Mateo, Cal.

of gas."

# 

from each gallon of gasoline Ordinary motor oils contain destructive "sulpho" compounds, no matter what "base" they are or where the crude comes from. It is these impurities which cause them to break down rapidly under engine heat, thin out and result in faulty lubrication, excessive oil and gasoline consumption and unnecessary maintenance costs.

Cycol retains its correct body under engine heat, gives more efficient lubrication, insures a gas-tight piston seal and reduces upkeep costs.

You too will notice a great improvement in the power and life of your motor, and in maintenance costs, by flushing your crank case the right way and using Cycol. Remove drain plug while the engine is hot. Replace plug and pour in two quarts of the grade of oil specified on the Lubrication Chart (not kerosene or so-called "flushing oils). Run the engine for five minutes. Drain and refill with the correct grade of Cycol. Cycol will mix with other oils-but it is advisable to use Cycol exclusively, because it contains no destructive "sulpho" compounds and because it insures correct lubrication.

Look for the Cycol Sign. It is your guarantee against getting motor oils which contain those power-wasting, moneywasting "sulpho" compounds.
