Why do \$10 worth of worrying when you can get a fine chicken dinner for 75 cents at the Tavern? 272-1

On Fishing Trip—

Mr. and Mrs. Al. Jordan left Friday evening to spend a few days on a fishing and camping trip near Lake of the Woods. They will be joined this evening by Mr. and Mrs. Wilbert Jordan, who will spend Sunday at the camp.

GREAT PLANT IN MELBOURNE

Australian City is Building Radio Station for Direct Communication With Great Britain.

The work of establishing the mammoth Australian radio station in Melbourne for direct communication with Great Britain has been begun.

The substations for overseas traffic will be about three times as powerful as any European station today. It will take two years before the central and feeder stations are completed. As a normal performance the chief station will be able to speak direct over 12,000 miles for the greater part of any working day.

Receiving and sending stations to correspond will be built in Canada during the same period. The plant for the main station will be imported from England, but the plant for the feeder stations will be manufactured in Australia, one for each of the states.

The combined cost of all these stations will be about \$5,000,000. The main station will consist of a transmitter and receiver terminal thirty miles apart, the latter including twenty-four towers each 800 feet high spread over a square mile.

The wireless rates will be one-third

Famous Film Stars' Favorite Coiffures

DOROTHY DALTON

For women who have round and full faces this style of coiffure, which is Dorothy Dalton's favorite, is very effective. The hair is dressed fairly low with only its natural wave. It is one way to dress short hair so that it seems full and rich and yet it does not give the kinky flapper effect. There is also an absence of frills which is especially becoming to one of Miss Dalton's type.

Returns from Weed—

Mrs. Miriam Sheppard, who took Mrs. Henry Provost to her home in Weed, Calif., a short time ago and stayed for a visit there, has returned to her home in Ashland.

SHORT FLASHES

San Francisco is receiving concerts broadcast at Schenectady, N. Y.

In New York a squad of soldiers was drilled in an army uptown at the commands of a superior on Governor's Island.

At the Pacific coast seaside resorts, instead of burying themselves in the sand, the young ladies clamp on their earpieces and kill time between swims listening to radio music.

Educational experts say that radio will prove of great assistance in the development of the minds of subnormal children. The great obstacle in their education has been inability to arouse interest. It is believed that radio will greatly stimulate such interest.

And now it is the dentists who are profiting by radio. It is a great advantage to keep the mind of a patient off his troubles. When a radio ear-piece is clamped on, what registers on the ears of the sufferer makes him more or less indifferent to what is going on in his mouth. Great possibilities for the soothing talker.

Photographs repaired. Pixit Shop.

Appointed Postmistress—

Flora R. Thompson has been appointed postmistress of the Jacksonville post office, having passed the most satisfactory examination of any of the six applicants. John F. Miller, who has been acting as postmaster since early last spring, has sent in his resignation, effective August first.

New Postmaster at Talent —

Glenn Withrow has been appointed postmaster at Talent.

BOYS IN PARK WOUND

MRS. McNAIR WITH STONE

Mrs. Hal McNair was passing through the park on the roadway near the fountain this morning, when she was struck over the eye by a stone, and a painful wound inflicted. Some youngsters were playing in the roadway and the stone which struck Mrs. McNair was not thrown with vicious intent. Nevertheless, it might have been attended with serious results and steps should

be taken to stop this practice of stone throwing among the boys, who frequently gather there and exercise their skill with slung-shots and bean shooters on the birds.

Ione—New warehouse to be built here.

HITTSON MOTORS Medford, Oregon

**On land, on sea, in the air—
Cycol proves its service**

Cycol gives exceptional service under all conditions of engine operation. Look at some of the records it has made. These are but a few of hundreds of similar letters written voluntarily by enthusiastic users of Cycol Motor Oil.

Engine owners know from experience that Cycol Motor Oil retains its correct body under operating temperatures, maintains the essential oil film between moving parts and prevents serious engine troubles due to faulty lubrication. The reason is because Cycol is free from destructive "sulpho" compounds. It is these impurities

which cause ordinary oils to thin out and break down rapidly under engine heat. They are economically removed by the new Hexeon Process used only by us.

You can easily prove to yourself the superiority of Cycol. Simply flush the crank case, not with kerosene or so-called "flushing oils," but with the correct grade of new lubricating oil, and refill with the grade of Cycol specified on the Cycol Chart of Recommendations. To be sure of getting Cycol—look for the Cycol Sign.

ASSOCIATED OIL COMPANY
Executive Offices, Associated Oil Building
79 New Montgomery St., San Francisco

CYCOL

MOTOR OIL

FREE FROM DESTRUCTIVE "SULPHO" COMPOUNDS

From the Motorist

"I found after draining the crank case and replacing with your Cycol Motor Oil, that I have obtained more mileage, also better compression and more power in climbing hills. I congratulate you for producing such a high grade oil."

M. W. HICKOK,
Santa Barbara

From the Mariner

"I have given Cycol a 30-day test, or 400 hours run, oiling 96 bearings, between here and Monterey. Every bearing kept perfectly cool. Engine turned over freely when cold. I used only 100 gallons of Cycol. With other oils I used 400 gallons in the same time—bearings frequently warm and engine hard to turn over cold."

J. E. Fitzwater, C. E.,
M. S. "COQUILLE,"
San Francisco

From the Aviator

"My oil pressure gauge with the use of Cycol only varies 8 points as against 20 to 30 points with other oils. This is from a cold motor to a hot one. This shows that Cycol holds its body. In the past I have changed oil every 8 flying hours, but with Cycol I get over 40 flying hours."

E. DeLARM,
San Francisco
