Webbers Camping Out—Mr. and Mrs. Arthur Webber, of Lincoln street, were out on a camping trip last week.

Take advantage now of the special offer for one year subscription to the Delineator. E. R. Isaac & Co. 280tf

Visiting with Father—Mrs. E. W. Redifer and small son Paul were visiting at the home of Mrs. Redifer's father, G. W. Benedict, on Mountain avenue, during the last week.

Subscriptions for the Delineator taken now. E. R. Isaac & Co. 280tf

Malheur—A nugget worth \$128 has been found here.

WILLIAM HARDY DIES AT HOME IN ASHLAND

William Hardy died this morning about 8 o'clock at his home, 90 Fifth street, after a lingering illness.

Mr. Hardy was born in England, but came to the United States 45 years ago and engaged in farming. He retired several years ago, and came to Ashland eight years ago.

Mr. Hardy was 81 years old at the time of his death. He leaves a wife and several children to mourn his loss.

Funeral arrangements have not been completed, and will be announced later.

Bend—Large new theatre building under construction.

JACKSON COUNTY HAS NO DANGEROUS FOREST FIRES

Jackson county has been very fortunate this year in that no forest fires of any consequence have developed.

H. M. Bowser, district warden of the state fire patrol, in this section, was taken over the district by Lieutenant C. W. Goldsborough, army aviator, Saturday. The only fires reported were two small ones near the foot of Mount McLaughlin, and one on the upper Rogue river, all well under control.

The trip over the district started from Medford and extended as far east as Mount McLaughlin and well toward the north and west boundaries of the county. Only an hour and 15 minutes were required to make the entire circuit.

Portland—Contract awarded for erection of \$60,000 factory.

AMERICAN CONSUL VICTIM OF BANDITS BADLY WOUNDED

WASHINGTON, July 31.—Eugene Jova, the American consul representative at Sagua LaGrande, Cuba, who was captured by bandits, is in a hospital with a serious wound in the chest, and minor injuries from stabbing.

Pendleton—Contract soon to be let on Grant county road.

New Device for Walking on the Water

Persons who are victims of shipwrecks may calmly walk to shore in the future, if the invention of A. N. Sheldon of Ventura, Cal., is adopted by steamship companies. Sheldon's device consists of two pontoons which slide back and forth alternately in a rigid frame. The operator places one foot in each pontoon and works them back and forth with a walking movement. Paddles on the bottom aid in the movement. Steering is accomplished by a rudder operated by bicycle handle bars. In windy weather a sail assists the walker.

AIDS CHILDREN IN HOPPING

Pennsylvania Woman Has Put Forward Ingenious Device Which She Calls Grasshopper Feet.

Adult human beings are rarely seen to skip and hop. It is, however, a form of exercise in which children are wont much to indulge, to the great benefit of their physical development. Encouragement of this form of exercise is offered by the novel invention of a woman, May C. Southgate of New York. It is a pair of mechanical grasshoppers, of giant size, put on like a pair of shoes and fastened by straps and buckles to the child's feet. They have legs of spring steel, terminating in rings which hold rubber feet. A child equipped with these grasshoppers can hop, skip or jump much more actively, and can get over ground quicker, while the rubber feet lessen the shock of alighting and give a delightful sense of lightness.—Philadelphia Ledger.

Gold Film is Transparent.

Gold 1-2,708,000 of an inch thick, or 10,584 times thinner than the ordinary sheet of printing paper has recently been produced. One grain of the precious metal of this thickness covers nearly four square feet of area and is perfectly transparent.

The process of obtaining the thinnest film is to cut a sheet of copper to a determined size and place it in an electric bath, where sufficient gold is deposited on one surface of the plate, to produce the finest gold color discernible. To separate the film of gold from the copper, the gold-plated copper strip is immersed in a weak solution of nitric acid for several days. The copper is entirely dissolved, leaving the film of gold floating on the surface of the liquid. The film is then collected on a glass plate.—Popular Science Monthly.

Mount Everest.

According to the latest determination of the Indian survey, the height of Mount Everest is 29,141 feet. It is the highest ascertained point on the surface of the globe. The greatest Himalayas present such difficulties that climbers have been compelled to refrain from attempting to reach their greatest heights, as well as from the fact that the effects of altitudes are not yet fully understood. The greatest mountain heights yet reached are 24,000 feet, by the duke of the Abruzzi during his expedition to the western Himalayas, and 24,000 feet by Norwegians on Kabru, one of the mountains near Darjeeling.

Kidding the Doctor.

The doctor was ready to leave, and was congratulating the father on the advent of the new baby, when a burly billygoat went tearing by in hot pursuit of a dog.

The father blurted out in very undignified English: "Drat that goat! I shall have to sell him. Doctor, would you like to buy him for your boys?"

"I don't know," said the doctor. "What do you want for him?" "Well, how much is your bill?" "Fifty dollars." "Then you ought to give me sixty for the goat. A full-grown goat ought to be worth more than a kid."

She Answered Her.

An austere woman was lecturing a body of high school girls in a Hoosier town recently on the uselessness and wickedness of the flapper. After she had said that they were not fit to become the mothers of the next generation, she looked at a bobbed-haired little girl who had rouged and powdered her face rather heavily and demanded, "Young lady, what do you know about babies?"

For a minute the little flapper looked startled. Then she blushed a fiery red. "Well, lady," she stammered, "I've stopped believing in the stork."—Indianapolis News.

Astoria—\$5400 to be spent for general work and \$1602 for heating and plumbing at high school.

MOONSHINING REGULAR INDUSTRY IN THIS STATE

PORTLAND, July 31.—"We find that moonshiners are learning more about their business," said Jesse Flanders, local prohibition enforcement officer, in an interview today. "Chemical tests show that the poisonous liquors of a few years ago are disappearing and a better grade of moonshine is being produced," he said.

"The moonshiners of Oregon, having passed the apprentice stage, are turning out a better product, and the lethal poisons that dripped from illicit stills two years ago have been replaced by a fair grade of 'mountain dew.'"

Moonshine rapidly is becoming one of the important industries in this state, the prohibition officer admitted, and the government forces are engaged in a constant and unending war against the distillers. Along the banks of Oregon's mountain streams and rustic brooks, hundreds of stills are running full blast. Every prohibition agent working out of Director Linnville's office is in the field engaged in a determined drive against the moonshiners.

Wasn't, but He Did. One day as I was sitting in the window I saw a man coming up the street dressed like a farmer. Now I had but a few minutes before seen a goose trying to fly over the bushes in the yard. As the man seemed to be looking for something, I called out to him: "Are you looking for a goose?" He stopped short and gazed suspiciously, as much as to say, "Well, it looks as if I'd found one."—Exchange.

FORMED NEW VOCAL CORD

Tissues, After Operation, Grew Together, and Voice is Said to Be Improved.

In three out of four cases in which Dr. H. Burger resected the vocal cords the tissues grew together to form a new vocal cord. He reports to the Nederlandsch Tijdschrift v. Geneeskunde (Amsterdam) that the more radical the operation on the side wall of the throat the more the new cord approximated normal.

In all these cases the diagnosis of malignant tumor was beyond question, and the operation was done through a slit in the thyroid cartilage. No attempt was made to suture this afterward. The voice is good in all but one, who still is hoarse. The voice is very much better than in other cases in which merely the growth itself was resected and the rest of the vocal cord left. The repair after this is much less perfect. In one of his cases the repair was so perfect that in examining with the laryngoscope a year later there was some doubt as to the operated side.—New York World.

Saw Volcano in Action.

A volcano in action was witnessed about six weeks ago by the captain of the British freighter Bounty, off the West African coast. The skipper said the Bounty was about five miles off shore when he observed smoke pouring high and profusely out of a peak inland from the Bight of Biafra, near the boundary line between Kamerun and Nigeria. Thinking he might be of assistance in the event of disaster to the villages near the seacoast he put in toward shore and went to the land in a lifeboat. He said the smoking peak was about 11,000 feet above sea level and on its westward side he observed large streams of lava. Finding no signs of human life along the shore he went back to the freighter and proceeded on his course.

Put Out Fires With Glass Balls.

A glass ball, the glass being thin and easily shattered, and about the size of an egg, filled with a standard flame-killing liquid, is now being put on the market. Most fires can be extinguished with little danger and little loss if proper means are available for prompt use. Experiments have shown that a few of these new glass balls or fire-outs, as they are called, will quickly snuff out a bad blaze.

In the past most fire extinguishers have been rather high-priced. This new extinguisher is a notable exception—the three balls which comprise a set being retailed for only 30 cents per set. A set of three balls comes in an ingenious carton which can be hung from the wall.

Not Pretty Music.

Dorothy, three years old, lives at New Albany. Her father took her to the barber shop to have her hair trimmed, and the electric clippers almost drove the little girl into spasms of fear despite the kind assurances that they would not hurt her. She had a big audience before the task was completed.

Next day Dorothy went to visit a neighbor who lived near the barber shop. Shortly after her arrival she heard music and inquired its location. On being informed that it was at the barber's she replied: "Well, I don't think his music is pretty."—Indianapolis News.

Valentino as Spanish Ace

RUDOLPH VALENTINO, Paramount film star, as he appears in his first starring picture, "Blood and Sand," in the role of "Gallardo," a Spanish toreador. This part in the famous Ibanez story is said to be the most colorful Valentino has had in his screen career.

ICE CREAM FESTIVAL AT TALENT IS SUCCESS

An ice cream festival was given Friday evening at Talent by the ladies of the community club of that place for the purpose of raising funds with which to buy a piano, to be used in all public gatherings.

It could be seen early in the evening that a large crowd would be on hand for the occasion, but as the evening went along the people continued to arrive until the crowd

was equal to any that has gathered in the community for many months.

The ice cream and cake literally melted away, and the dimes that rolled in amounted to a good round sum before the evening was over, and the piano is now assured.
