**DODGE BROTHERS COMMERCIAL CAR**  
The car's long-established reputation for faithful, low-cost service has not influenced Dodge Brothers in their constant seeking after betterments.  
A semi-floating rear-axle is now provided, embodying the latest ideas in rear axle design. The main housing is 75 per cent stronger. One large Timken bearing at the hub replaces two small bearings and gives 100 per cent greater carrying capacity. Larger ring gear and drive pinion make possible a new, tooth shape, giving quiet operation and 45 per cent increase in strength. Larger front and rear propeller shaft bearings more than double the drive thrust capacity.  
Conservative changes in body lines have materially enhanced the attractiveness of the car's appearance.
