

Local and Personal

Will Speak Tonight—

Deputy Head Consul Rees will be present at the meeting of the Modern Woodmen of America tonight at their hall. Every Woodman should make it a point to be present and hear this fine speaker give his wonderful short talk.

Visits in Ashland—

C. E. Bourne arrived in this city the latter part of the week from Oakland, Calif., for a few weeks with the O. Winter family. Mrs. Bourne has been visiting with her parents for the past three weeks. Mrs. R. A. McDonald of Alameda, Calif., is also visiting at the Winters home. The Winters' and their guests expect to leave tomorrow for Lake of the Woods for a short camping trip.

I am agent for the VACUETTE SUCTION CLEANER. A. F. DYER, 77 Pine St. 14-6od-3*

HEN PROMISES TO SET NEW RECORD

CORVALLIS, Or., Sept. 18.—A hen of O. A. C. stock is again coming into the limelight and may pull down a world's record for her breed. It was but a few months ago that Lady Dryden, an O. A. C. Plymouth Rock hen, captured the Plymouth Rock record by laying 324 eggs in a year. With another month to go, White Leghorn hen No. 38, owned by Alexander Stewart, has laid 300 eggs in the farm bureau egg laying competition at Santa Cruz, Calif., word has just been received here.

BANNERS ARE FLUTTERING OVER ROUND-UP GROUNDS

PENDLETON, Or., Sept. 18.—Pendleton is ready to stage its thirteenth annual Round-Up, September 21, 22 and 23.

A thousand banners flutter in the clear September air; in the Round-Up stables, wild Mexican steers, fleet race horses and bucking bronks are awaiting the events of track and arena; the Indians have pitched their tepees on the Round-Up grounds; cowboys and cowgirls are gathering and have entered the lists.

One of the new features this year will be the announcement of events and winners by means of a radio magnavox. Three of these have been installed and will enable every person, from grandstand to the remotest corner of the bleachers, to hear all announcements.

GIVES BIRTHDAY PARTY FOR NEIGHBOR GIRL

Mrs. L. Schwein gave a very delightful three course dinner at her home on Church street last Wednesday in honor of Miss Helen Detrick on her 14th birthday anniversary. The color scheme was pink and white, and a fine large birthday cake with pink and white candles graced the center of the table. Those present were Mr. and Mrs. Detrick, Helen Detrick, Gene Detrick, Mr. and Mrs. Wallin and son Junior, and Mr. and Mrs. L. Schwein and family. Miss Helen received many lovely presents.

MUST TELL BUSINESS ON ENTERING RUSSIA

MOSCOW, Sept. 18.—Business men who want to enter Russia hence forth must supply exact information as to what business they intend to engage in, their technical qualifications and financial responsibility, according to terms of orders sent out to attaches in foreign countries by the people's commissar of foreign affairs. The object is said to be to curb speculation under the new economic policy recently adopted.

SEPARING OF SALMON IS PRIVILEGE OF INDIANS

PORTLAND, Sept. 18.—Salmon fishing by the Indians at Celilo is at its height, and Carl O. Shoemaker, master fish warden, has completed arrangements with the American Lifeograph company to make films of the Indians this Monday and Tuesday on the Celilo grounds. Hundreds of Indians come to the falls, get out in the river naked, except for a breech-clout, and wait with their ancient spears in hand for a salmon to come along. They smoke the fish on the grounds and put them up for winter use.

PASTOR QUILTS PULPIT; WILL BE CHIROPRACTOR

CINCINNATI, O., Sept. 18.—Because he thinks he can do more good straightening out folk's physical kinks than he can their spiritual crookedness, the Rev. F. L. Dorn, pastor of the St. Philipps Evangelical Protestant church, has resigned to become a chiropractor. He said that for some time prior to his resignation he had been healing the sick by chiropractic methods.

Suits that suit at Paulserud's. 141f

GRANITE MEETING

All persons interested in the development of a big granite producing industry for Ashland are invited to attend a meeting to be held at the city hall next Wednesday evening, September 20, at 7:30. Get our Granite booklet at the chamber of commerce rooms, read up on this project, then come to the meeting and find out all about it right up to date. 13-4 ASHLAND GRANITE CO.

YOUTHFUL VAQUEROS TOUR GLACIER NATIONAL PARK

Five youngsters from the Blake school, Minneapolis, who recently completed a 75-mile horseback trip through Glacier national park, constituted the youngest group of tourists to undertake such a trip in the history of any of the national parks. They made the trip under the guardianship of L. M. Wilson, a teacher in the school, and "Buck" Connor, veteran guide of the park. The youngest is nine and the oldest 12. Left to right—L. M. Wilson, Sam Nickerson, Osborne Taylor, Hunter Piper, Billy Robertson and Thad Lawrence. Connor, the guide, is on the extreme right.

Hunts at Pelican Bay—

H. C. Stock and R. H. Kruggel spent Saturday at Pelican Bay hunting wild geese. They report fair luck, but say the season is too war, as the birds are well out on the water and hard to get.

Visits in Ashland—

Ms. William Brown, of Louisville, Ky., mother of Mrs. William Briggs, of Granite street, is visiting her daughter for a few weeks.

WHAT IS MEANT BY "FINER THAN DUST"

The very nature of the manufacture of portland cement—grinding, crushing and powdering hard rock—suggests the use of tremendous mechanical power. From the very first to the very last operation gigantic machines are kept in motion until from the hard rock blown from the mountain side, or towed from the quarries, a finely powdered, correctly proportioned material is produced.

In the mills giant crushers—some of them weighing as much as 425,000 pounds—necessitating the development of tremendous power, slowly grind the rock into fragments about the size of an egg. This material then goes to the dryers and on to other grinders where it is crushed to finer particles in the hammering of heavy steel balls in these revolving cylinders.

The powdered rock then goes to gigantic kilns—some of them 10 feet in diameter and 200 feet long—where it is burned to clinker. Pulverized coal is used to furnish heat, as between 2,500 and 3,000 degrees Fahrenheit are required to fuse the powder to "clinker." The clinker is then ground again, gypsum is added in correct proportions to govern the "set," and the clinker is ground into the finished product, portland cement.

The standard for portland cement is so exacting that 75 per cent of the material must pass through a sieve having 40,000 holes to the square inch. The fine art of the wire weaver is called on to furnish the testing sieves that determine fineness. A mile of wire, finer than a human hair, is required to weave a square foot of the sieve. So fine is the weaving that the sieve will hold water.

TEMPLAR SPECIAL WINS RACE AT FAIR GROUNDS

The 56 1/4 miles auto race, which

was held at the county fair grounds yesterday, resulted in a victory for the Templar special, which covered the distance in 53 minutes, two and two-fifths seconds, making the entire course without a stop.

The Dodge took second place, being the only other car to finish the distance, and was about a lap and a half behind. The Essex went over the fence in the 22d lap, and the Ford was forced out just before finishing the 23d lap, by engine trouble.

The Templar led for the first ten laps, at which time the Dodge went to the front and led for the next ten rounds, when it was forced to the pits with a flat tire. One lap was lost in making the change, and another lap a few minutes later when it stopped for water and oil. This left the Templar two laps to the good, which it held until the close.

The six lap motorcycle race resulted in victory for Vaughn on a Harley with Moran a close second. The time was five minutes and 26 seconds.

TIPS TO THE RADIOIST

A talk given recently at Schenectady by Dr. Marconi was enjoyed by a crowd of 3,000 persons who had assembled in Washington park, Albany, for the purpose.

On the Pacific coast preference in time for broadcasting is to be given to the stations having the greatest efficiency and therefore able to serve the greatest number of people.

Rubber is very useful material in radio work. You will find rubber stoppers to bottles make excellent knobs or tips to electrodes, adjusting rods, etc., and that block or sheet rubber is very useful as an insulator in many places; but if you have ever tried to cut rubber with a knife you will know how hard it is to make a neat, smooth, straight cut. But if you use a sharp knife and keep the rubber wet with cold water, or cut it under water, you will find that it cuts like cheese.

A radio university, placing higher education within the reach of all, is now considered but a matter of time. The future educational possibilities of radio seem to be limited only by the co-operation of the people.

STATE UNIVERSITY SEEKS \$10,000,000

PORTLAND, Sept. 18.—Friends of the University of Oregon Saturday turned over \$25,000 in cash and securities to a committee representing the institution for the purpose of financing a general building and development campaign to supplement such betterments as may be possible with millage funds derived from state taxes.

"Ten Million Dollars in Ten Years" was adopted as the slogan of the campaign. The necessity of private benefactions in addition to state support was reported to the board of regents by President Campbell at the meeting of the board last fall, at which time he pointed out that the university enrollment was

MAZDA LAMPS

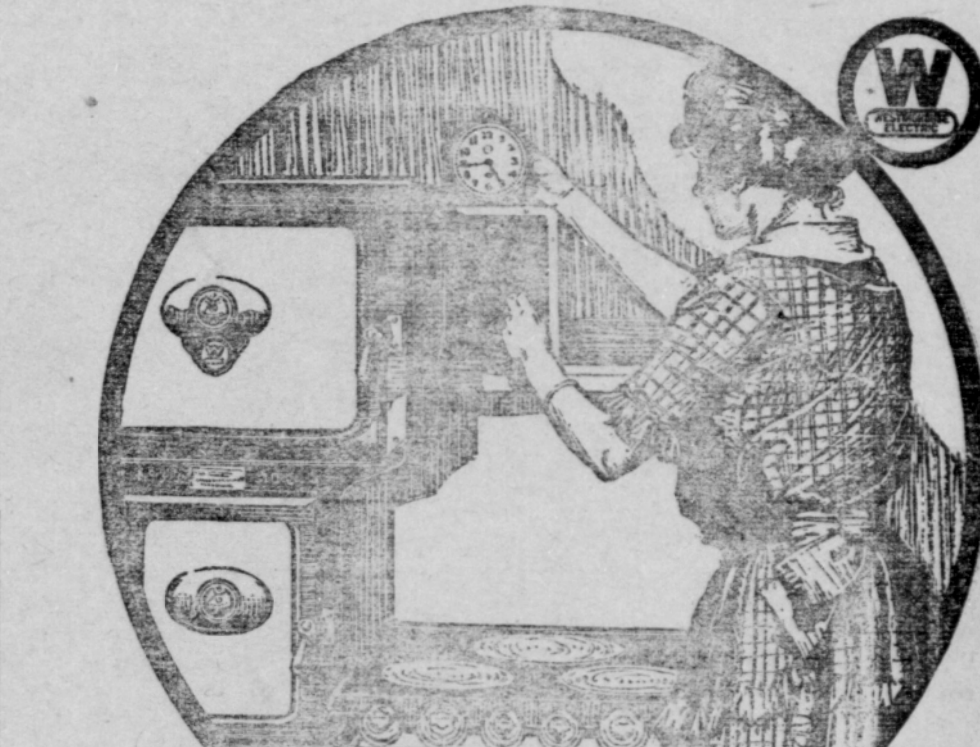

FILL THE EMPTY SOCKETS YOU WILL NEED MORE LIGHT for the long evenings FILL THE EMPTY SOCKETS

Make the Home and Every Room in it Bright and Cheery

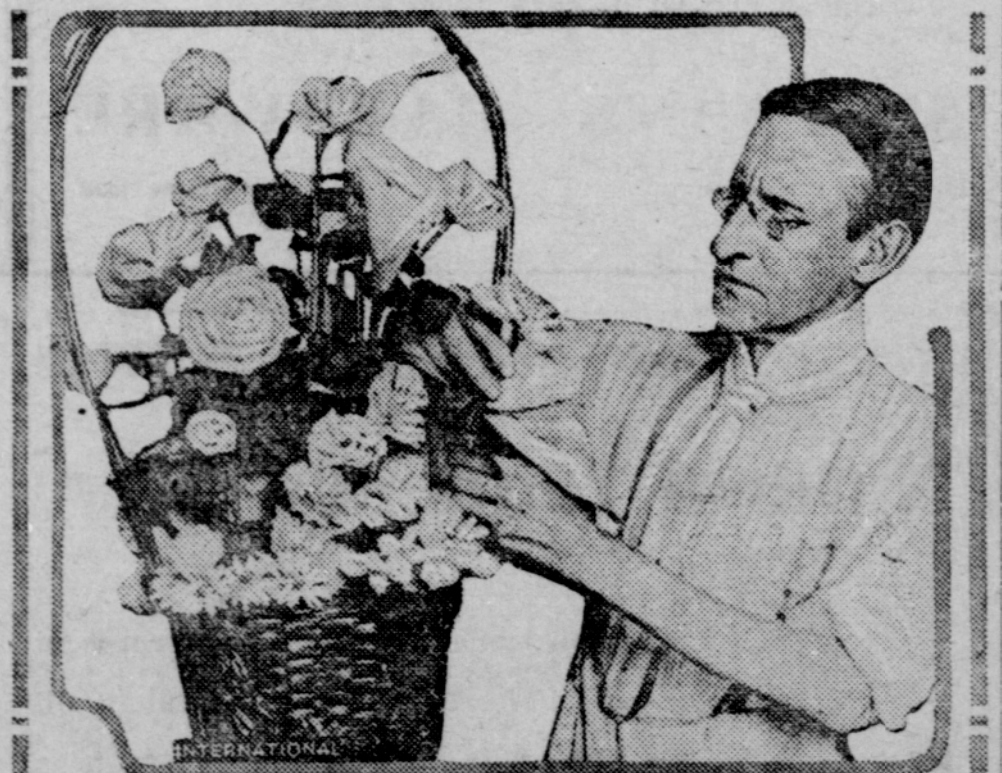

increasing nearly 20 per cent a year, while property valuations, the basis of the millage fund, had been for some years nearly stationary, until the discrepancy was becoming serious. The proposed campaign was discussed by the board of regents at that time and approved by the alumni at commencement in June.

Wealth in Iceland. Several sections of Iceland are rich in agate and obsidians, which are widely used in making jewels for the bearings of watches and electrical instruments.

Of Interest to All Good Cooks
Every good cook realizes that the actual cooking is just as important to good cookery as is the preparation of the ingredients. Isn't it fair, therefore, to say that better ranges will make better cooks?
Westinghouse
3-19-B Automatic Electric Ranges are better ranges, for more reasons than can be discussed here. They are the ranges with practical automatic control. They can be treated to start and stop cooking without attention, and they use the minimum of current. They heat the food and not the kitchen. Learn how good cooking may be done conveniently and comfortably, and just why Westinghouse 3-19-B Ranges make good cooks better.
More Convenience Outlets Make More Convenient Homes

"Bill" Burgess Now a British Lord

William Burgess of Milwaukee recently received the news that he had fallen heir to the titles and estates of his father, known as Lord Roberts. Known to his intimates in Milwaukee newspaper circles as plain "Bill," Burgess has made elaborate plans for entering upon his domains as a British peer. He was engaged in newspaper work for several years, and while in Montreal he frequently came into contact with visiting members of the nobility. Seventeen years ago Burgess chanced to meet the then prince of Wales, now King George. It was while the prince of Wales was making a tour of Canada, and Burgess, together with other newspaper correspondents, occupied a car of the royal train. So when Bill Burgess is presented at the Court of St. James as Lord Roberts he will not be entirely a stranger to the king. In later years Burgess left the newspaper field and engaged in the artificial flower business and the photograph shows him at work in his shop.
