Cycol keeps your engine free from destructive "sulpho" compounds

A way has been found to remove destructive "sulpho" compounds from motor oil. It is the new Hexeon process used only in making Cycol Motor Oil.

Because Cycol is free from destructive "sulpho" compounds it retains its "body" under terrific engine heat and maintains an unbroken lubricating film between moving parts. Thus the motorist who uses Cycol heads off engine damage.

Flush your crankcase and refill with the correct grade of Cycol.
