**How you can save money on gasoline**

Cycol is the motor oil free from destructive "sulpho" compounds. These are removed by the new Hexeon process used only by us. Cycol does not thin out nor break down rapidly under engine heat. It retains its "body" and maintains an "oil-tight" piston seal.

This prevents power loss and leakage of gases into the crankcase. The direct result is a saving in gasoline. It is also the conclusive proof of the high lubricating value of Cycol. Flush your crankcase and refill with Cycol.
