

Local and Personal

Visitor from Eugene—

Perry Simon, of Eugene, arrived in the city Friday for a visit with the J. D. Mars family. Mr. Simon is an uncle of Mrs. Mars.

Better insurance at reasonable rates. Billings Agency. Phone 211.

Umbrellas covered and repaired. Fixit Shop, 343 East Main. 60tf

Here from Hill—

A. W. Moon, of Hill, Calif., was in the city transacting business Friday.

Fruit cake and mince meat time is here. For citron, orange and lemon peel, raisins, currants, figs, spices, sugar, etc., Detrick's Groceries sells for less. 48tf

You'll always feel at ease in Paulserud's suits.

Undergoes Operation—

John McHale underwent a nasal operation Friday and is reported to be doing as well as could be expected. This is the second operation within a week for young McHale.

Cheap insurance is costly at any price. For sound insurance at reasonable rates, see Billings Agency. Established 1883. 34tf

Phone 401 for residence appointments. Dr. Geo. J. Kinz, Chiropractor. 61tf

Moves to Roseburg—

Mr. and Mrs. G. W. Lang moved Friday from 357 Vista street to Roseburg. Mr. and Mrs. Lang moved here from the Umpqua valley city some three months ago, having been transferred here from that place. Mr. Lang is an engineer for the Southern Pacific railroad.

We have our 1923 model Buicks on the floor. Come in and look them over. You will appreciate them after a demonstration. Buick Agency. 60tf

Better be safe than sorry. See Beaver Realty Co. about your insurance. Phone 68. 287tf

Borden Spends \$63.68—

Newton W. Borden, democratic nominee for state senator from the sixth district, has filed his expense statement, the sum of \$63.68 having been spent by him during the campaign.

You owe it to yourself to come in and look over our oriental and art goods before you buy. Our prices will surprise you. The Variety Store, 89 N. Main St. 61tf

Ask your grocer for Golden Sheaf Bread. 52tf

Visit at Rogue River—

Mrs. L. J. Heer and Mrs. Levi Stevens were visitors in Rogue River one day this week.

Medford Red Cross Active—

Additional efforts are being made by the Medford Red Cross to subscribe the full quota. Two-fifths of the amount has already been received, this sum amounting to \$1907.25. No letup on the campaign will be made until the entire amount is received. A similar drive is under way in Rogue River, under the direction of the Medford chapter.

We are open for business. Our prices are below anything of the kind in Ashland. The Variety Store, 89 N. Main St. 61tf

Dance Jackson Hot Springs Saturday night. Everybody's going. 63-4

Legion Order to Initiate—

Members of the 40 & 8, the "joy" department of the American Legion, will hold a banquet and initiation in Medford this evening at 7 o'clock. This organization is to the Legion what the Mystic Shrine is to Masonry, and always brings out the boys. Ashland has been allotted three candidates to bring to the affair. Local members of the 40 & 8 are Glenn Simpson, Henry Pace, Orel Coleman, Gene Narragan and C. K. Logan.

New walnuts, No. 1, three pounds for \$1; Brazil nuts 23 cents pound, five pounds for \$1. Plaza Market, 61 North Main. 64-

Crown Best Patent Flour, \$8.75 per barrel until Thanksgiving, Plaza Market, 61 North Main. 64-

Jacksonville Has Revival—

Increasing interest is being shown during the revival meetings at the Jacksonville Methodist Episcopal church, where Evangelist Shepard is preaching. The services will be continued this next week, but no sermons will be given this evening.

LEEDOM'S Tire Hospital will REPAIR your TIRES the RIGHT WAY and give YOU a POSITIVE GUARANTEE OF SERVICE or your MONEY REFUNDED. 60tf

Here from Hill—

Mrs. L. H. Wertz, of Hill, arrived in the city Friday, and will spend a short time in Ashland.

Recovers from Rheumatism

"Had rheumatism five months that would go from my left knee to my back. Finally used Foley Kidney Pills and in 15 days was entirely cured," writes W. J. Oliver, Vidalia, Georgia. Backache, rheumatic pains, dull headaches, dizziness and blurred vision are symptoms of kidney disorder. Foley Kidney Pills quickly relieve kidney and bladder trouble. Sold everywhere.

Shrine Ladies Entertain—

Members of Zuleima Temple No. 13, Daughters of the Nile, entertained at a luncheon this noon, followed by a business and social meeting in the Masonic hall at 2 o'clock. Mrs. Laura Gunnell, of Grants Pass, queen, presided. The organization has at present approximately 60 members from Ashland, Medford and Grants Pass, and 18 officers, including Mrs. Elizabeth Bush, of Ashland. The temple is contemplating giving a dance in Medford in the near future, to which all Shriners will be invited. A delegation of 25 ladies of Grants Pass was present.

If you want the best there is in bacon, boiled hams, chipped beef, lard and shortening, get it at Detrick's. We sell for less. 48tf

Ashland Honey on Market—

A new brand of honey has appeared on the Ashland market, under the label of the "Ashland Apiary." J. Larkin Grubb, manager. Mr. Grubb only started his apiary two years ago, but obtained a good crop of honey this year, and is offering it to Ashland consumers. He says he believes in Ashland people using Ashland made products.

Ask your grocer for Golden Sheaf Bread. 52tf

We are pleasing many with our work. Give us a trial. Ashland Cleaning and Dyeing Works. Phone 63. Work called for and delivered. 62tf

Will See Game Today—

A long trip in the dark, with prospects of no sleep, failed to hinder three local men from starting to Corvallis Friday night in order to be on hand for the big University of Oregon-Oregon Agricultural college football clash this afternoon. Those who left last night were Elwood Hedberg, Clyde Young and James Quincy Adams, the latter proceeding to Portland for a few days before returning to Ashland. Wilbur Hartzell and Dave Whittle left the day before, being joined in Medford by Ned French, a reporter on the Medford Mail Tribune. A majority of the football team and the rooters who accompanied them to Roseburg, will also be among the rooters at the contest.

We have prices on real, hand-painted Japanese dishes. The Variety Store, 89 N. Main St. 61tf

Get \$20 a Day—

Legitimate plan and lady's valuable secret, 25 cents (coin). Address Franklin 593, Ashland, Or. 39-1mo

Uses Cav for Hunting—

There should be some ordinance passed prohibiting deer from running on the public highways. It is getting so that this form of wild life is threatened with extinction, and besides it's hard on cars. J. H. Dudley, superintendent of the paving operations north of town was headed toward the city last night at about 8 o'clock, taking the drive slowly and enjoying the evening air. At about seven miles out of town, he failed to notice traffic signals and reached a certain spot on the pavement at the same time a big six-point buck got there. The deer was knocked down, and the steering gear of the car broken. Details of the buck's injuries are not known, as it cleared out soon after the accident. Mr. Dudley doesn't mind having his car wrecked, but he would have liked to have had some venison for breakfast.—Grants Pass Courier.

Exhausted from Grippe Cough

La grippe coughs rack and tear the sufferer to a state of exhaustion. "Would get completely exhausted from violent grippe coughs," writes R. G. Collins, Barnegat, N. J. "Tried Foley's Honey and Tar and the cough ceased entirely." Used by three generations for coughs, colds and croup, throat, chest and bronchial irritation. Foley's Honey and Tar has stood the test of time. Contains no opiates—ingredients printed on the wrapper. Largest selling cough medicine in the world. Sold everywhere.

Circuit Court Monday—

Jackson county's circuit court will resume operations Monday, November 20.

EXPLAINING GRADES IN ARMY

Fanciful and Pretty Tale of the Origin of Insignia Which Denote Martial Rank.

Fanciful indeed is the tale woven about the selection and origin of the various marks of army insignia. The story begins with a two-barred fence, near a group of trees. One of these is a sturdy oak and another a silver poplar, the tree which grows to greatest heights in our forests. Above this tree flies an American eagle. It is night and the stars look down upon the scene.

The first step, or first rank of a commissioned officer is climbing the first bar of the fence, and is denoted by the one bar on a first lieutenant's shoulder. Another step up and the officer has his foot on the second bar of the fence—the two bars surmounted being indicated by the two-bar mark of the captain. The next stage of the climb upward is the branches of the trees, and the rank of major, denoted by the gold oak leaf on the shoulder, has been reached.

In order to go higher the candidate for higher rank must now surmount the tall silver poplar, and when he has done so he is entitled to wear the silver leaf of the lieutenant colonel. The eagle soaring over the treetops indicates the rank of colonel—the silver eagle being worn by officers of that rank. The stars are the highest of all and were reserved as insignia for generals.—Detroit News.

DISPUTE ORIGIN OF CALICHE

Scientists Disagree as to How Rock of Which Chile Has a Monopoly, Came About.

Chile's chief source of revenue, of which the country has virtually a world monopoly, is obtained from the rough rock known locally as caliche. Scientists disagree as to the origin of this valuable mineral, according to a writer in the National Geographic Magazine. Some claim (and Darwin among them) that it had its origin in seaweed of an ancient period. One savant argues that the deposit resulted from nitrogen contained in guano. Others believe in its atmospheric origin, advancing the theory that in a remote age electricity passing through the moist air, by combination, formed nitric acid; this in turn, impregnating the flood waters of Andean streams and coming in contact with the limestone of the rocks, formed nitrate of lime; another step in nature's laboratory brought this nitrate of lime in contact with sulphate of soda, forming the caliche found today.

Iodine, precipitated from the nitrate solution, is the most important by-product of the caliche rock. By agreement among the nitrate establishments, its production is limited to every sixth year, that the market may not be overstocked.

Flour Used in Making Watches.

Two barrels of flour are used every week in making watches at a well-known factory, which turns out from 2,000 to 3,000 watches a week. Since a baker uses about three pounds of flour to five loaves of bread, it follows that for every watch the maker uses the equivalent of a third of a loaf. The flour is made into dough and the dough is used to handle screws, rivets and other small parts.

Each man in that part of the business has a lump of dough always at hand, and when he wants to examine a screw he jabs a piece of dough on it. Then, turning it over, he has a good chance to look at it with his watchmaker's microscopic eyeglass. Many of the screws are too minute to pick up easily with the fingers, and many more, though large enough to be picked up, would be so covered by the fingers or the forceps as to be almost hidden from sight.

Taxidermy Now a Fine Art.

The rise of American taxidermy to a level with the other fine arts thus far is a chapter of unwritten history. It is probable that not more than a score of persons now living know the real story of the Society of American Taxidermists and the revolution that it wrought. It would be utterly inadequate to write of the masterpieces of American taxidermy without setting forth at least an outline of the history that they represent. A few members of the youngest generation of workers, snugly ensconced in stone palaces of peace and plenty, have talked learnedly of the "new school" of taxidermy without mentioning the men who toiled in laying the foundations and in erecting half the walls of that "school." I am told that today there are taxidermists who do not like being called anything less than "sculptors."

Fragrance of Flow-ers.

The fragrance of flowers regulates their temperature, says a professor of chemistry at the University of Nevada, at Reno. He bases his belief on recent experiments with the essential oils of certain desert plants. These oils apparently serve as a protection against the extreme heat of noonday and the chill of night.

The vapor of the oils absorbs more heat than ordinary air, he says. Rose oil absorbs thirty-six times as much heat and anisole 352 times as much. By surrounding itself with a layer of such odor-filled air, the plant reduces the amount of heat which reaches it in the daytime and also obtains a sort of air blanket to protect it against the chill of night.

Boost for the Winter Fair.

PROLONGS LIFE OF RIBBON

Correspondent of Eastern Periodical Gives Valuable Hint That Makes for Typewriter Economy.

Some time ago I saw on the household page directions for prolonging the usefulness of a typewriter ribbon by brushing it with typewriter or machine oil, and allowing the oil to soak into the ribbon over night. I tried it, but had difficulty in getting the oil on evenly. Then I tried removing the old ribbon, packing it in the little tin box the new ribbon came out of, and soaking it thoroughly with oil—maybe 20 drops of oil. The other ribbon went into a desk drawer and stayed there until the new ribbon was worn out, when the old ribbon was put back on the machine, and was as good as new.

The little metal spools which carry the typewriter ribbon have a number of openings at the top and bottom through which the oil can be applied. The ribbon with which this is being written had had its third span of usefulness made possible by the 20 drops of oil. The luxury of having a new— or newly oiled—ribbon at hand, when it is needed, is beyond words.

This typewriter, which is a family possession and usually runs about ten hours a day, used to need two ribbons a month. Since the oiling process was begun, two ribbons have lasted three months, with frequent oilings, which takes less time than telling about it.—Christian Science Monitor.

EVEN THE TINY ARE STRONG

Shetland Ponies Willing and Able to Do Good Work Under the Right Conditions.

There is something startling about seeing Shetland ponies working. At least, two of them have regular jobs. They do not serve as mounts for children, nor do they pull pony pleasure carts around the block. They put in the day at hard labor.

One of them pulls an express wagon, the other a small-sized garbage cart. To see them trudging along under the tracks of the elevated trains, pulling a load among truck horses that seem three times their size, is apt to give a soft-hearted citizen a jolt and make him wonder in a vague disconnected manner about the child labor law, remarks the New York Sun.

At his well-meaning notions of protest those who know Shetlands will laugh. Few horses are as strong for their size as a full-grown Shetland. When a vehicle is built to suit their size they are perfectly able to work and are, moreover, most of them, endowed with a temper that makes it virtually impossible to impose upon them or to force them to do any more work than they want to.

Jinx Phone Numbers Shunned.

The Japanese believe that there are lucky and unlucky numbers. In this respect they are not unlike many Americans, but their belief is much more deeply rooted, as is shown by the extreme care with which the Japanese select their telephone numbers, according to the Telephone Press service. The Japanese government, which operates the service and has been unable to meet the demand for telephones, permits the buying and selling of telephone subscriptions and the corresponding numbers, and frequently very substantial sums are paid for numbers that are reputed to be particularly lucky. It is said that the luckiest number for business purposes is eight, because the shape of the Japanese character for eight in some way suggests the idea of prosperity. The most unlucky numbers are 42 and 49, because the former is pronounced "shimi," which means "to die," and the latter "shiku," which means "death" or "suffering."

Kings Who Never Grow Old.

A curious custom of a pastoral people of Uganda, known as the Banyoro, is related by the Rev. John Roscoe. He said that when once a king was enthroned his person became sacred, and his food was restricted to milk and beef from a sacred herd of cows.

The Banyoro monarch never allowed himself to grow old nor his faculties to become impaired. When he thought he was going to be seriously ill he called a council, arranged state affairs with the principal chiefs without giving them any reason for thinking that he was about to die, and dismissed them to carry out his instructions.

Then he returned to his private house, summoned his chief wife, and ordered her to bring him a cup of poison. He drank the contents, and in a few minutes was dead.

What's Inside the Sun?

Carbon has been subjected to fierce heat energy and to very high pressure at the same time to be formed into a rigid solid, the diamond. Carbon in the central regions of giant suns is subjected to an intensity of energy of heat far greater than any that can be secured by electro-chemists in laboratories in either highly condensed sparks between metallic terminals or arcs. It is not known what effect such intense energy of heat has on the atoms of elements, for none so intense is available to science. Atoms in the interiors of highly incandescent suns may be resolved back to primordial electrons; or electrons may never have revolved around nuclei to form atoms. Then solar interiors would be electronic by this hypothesis.—Seattle Post-Dispatch.

A want ad will sell it.

NEW LAMP BURNS

94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazing brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent air and 6 per cent common kerosene (coal-oil).

The inventor, V. M. Johnson, 31 N. Fifth St., Portland, Or., is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money, make \$250 to \$500 per month.

WON BY NAIL AND A HALF

Miss Agnes Ellinger of Coronado Beach, Cal., successfully vanquished nearly sixty contestants in a unique nail-driving contest. The competitors were required to drive eight nails in a board fence. Agnes won by a nail and a half.

CAVE USED AS SANITARIUM

Physician at One Time Placed Sufferers From Tuberculosis in Famous Underground Cavern.

The Mammoth cave of Kentucky is no doubt one of the most wonderful places in the United States. It has been known and visited for years in a superficial manner, but, strange to say, the cave has never yet been fully explored. This fact may give a little idea of the vast proportions.

When Daniel Webster visited it he was inspired to oratory; when Jenny Lind, the Sweden nightingale, visited there, she climbed up into a natural rostrum in a rock-walled auditorium and instinctively burst into song. Relics of the aboriginal inhabitants are still to be seen in the caves, and there are crudely hewn logs still lying around from the saltpeter springs to vats, where the mineral deposit was collected and used in the manufacture of gunpowder required in the war of that year.

Further back in the depths of the cave are stone huts which were inhabited for a considerable time by tubercular patients. These sufferers were placed there by eminent physicians who were desirous of testing the value of the uniform temperature of the cave upon the dread white plague. Some of these patients lived six months without seeing the light of day.

These caves are a little off the beaten track of tourist travel and, while exceedingly interesting, are not so well known as many inferior examples of the stupendous handiwork of the Creator.
