Bad Teeth as a Racial Trait. ing to a report made by Dr. A. W. Schoenleber of the medical department of the Standard Oil company to the What is the oldest restaurant in the Eugenic Research association there is a racial difference in resistance to dental decay as shown by an examination of 2,758 men of various nationalities.

The gleaming whiteness of the negro's teeth is not just contrast with his black skin, these figures show, as the greatest proportion of perfect teeth was found among the Afro-Americans. Polish and Austrian Jews showed the next highest percentage of excellent teeth, while English, German, Danish, Norwegian and Swedish subjects showed very feeble resistance to decay. The Irish had the worst teeth of all.
