#### VISITORS FLOOD YREKA DURING SUMMER SEASON

YREKA, Calif., July 23.—With all of the hotels crowded and every available residence in the city taken by summer visitors, the Yreka Chamber of Commerce is considering ways and means of interesting local and outside capital in the construction of a large hotel and cottages. The opening of the Klamath River road, which has made accessible what is held to be one of the best fishing, hunting and recreational areas in America, has automatically made Yreka the center of a mass of vacationists and tourists. The city auto camp, equipped to accommodate fifty cars, is practically crowded to its capacity every night, due to the fact that many tourists stop here for several days. The climatic conditions, combined with the lure of the forests adjacent to the city, have this year attracted the largest number of vacationists in the history of the city.

#### LEONARD WILL RETAIN TITLE FANS PREDICT

(Continued from Page 1)

ing the bout tonight, as in the only other meeting between the two clever lightweight at Jersey City last summer, they went the full 15 rounds to a no-decision finish while spectators claimed that Tender had the better of the battle throughout. The fight tonight is expected to be a bitter affair as since the Jersey City affair they have been the bitterest sort of enemies and it is expected will carry their grudge into the ring with them this evening.

#### Tender Confident

Tender is confident that he will be able to capture the lightweight crown this evening and expects to do it by the knockout route, as he believes he can repeat the Jersey City performance of last summer, when he nearly hung the K. O. on Leonard in the eighth round of their go there. Tender will have the advantage in age, height, and reach when they step into the ring to night, as he is three years younger, 1 1/4 inches taller and has a margin of one inch in reach. The measurements of the two are as follows:

#### Measurements Given

Leonard: age, 27 years; weight, 131 pounds; reach, 69 inches; height, 5 ft. 5 1/4 inches; wrist, 6 3/4 inches; biceps, 14 inches; neck, 14 1/2 inches; chest normal, 36 inches; chest expanded, 38 inches; waist, 27 inches; ankle, 8 inches; calf, 11 inches; forearm, 10 1/2 inches.

#### Tender: age, 24 years

weight, 134 1/2 pounds; reach, 70 inches; height, 5 ft. 7 inches.

#### ASSOCIATION REPORT SHOWS LARGE BUSINESS INCREASE

that any such fruit would not be handled by the Association and brought out the fact that under the state laws the sale of such fruit is unlawful anyway. Demand is Large "Ashland's Famous Foothill Products" is the name which the Association has voted to use on all the produce distributed by the Association, and trade bulletins and other methods are being used to broadcast the name and the sort of fruit and vegetables which the Association handles. The fact that the Association has handled only the highest grades of fruit this year has reacted very favorably on the business, Manager Robbins reports, for when the consumers found they could always depend on getting only the highest quality from the Association they ordered so much that the Association was swamped with orders and quite unable to keep up with the demand. Cherry Crop Poor The report submitted by the manager on the cherry crop was rather rough on the growers as due to the unusual rains, he reported that the cherries did not carry well this season, and in many cases were a total loss by the time they reached the market. Fordson Tractor Is A Life Saver In The Caucasus Displaces Farming Methods in Vogue since Bible Times. Over in the Caucasus of Asia Minor the Fordson Tractor is more than a power plant—it is a land redeemer and a life savor. There is the shadow of Mt. Ararat, famed resting place of Noah's Ark, it is the twentieth century missionary to the oldest land in the world and brings the most striking of all contrasts between modern power farming and the primitive methods in vogue for thousands of years. Introduced in the Caucasus a little more than a year ago by the Near East Relief, the Tractor has revolutionized agriculture and, thanks to it, there is no famine this year. With the Tractor and modern farm machinery the fields, heretofore only scratched with the historic stick and oxen teams, have been plowed deep and with less seed have yielded greater crops than ever before. Hundreds of natives, too, have been released from farm work to enter industrial pursuits. A recent note from Erivan, Armenia, tells the story of tractor accomplishments in striking figures: "Ten American tractors ploughed a thousand acres of land in eleven days," the message said. "To accomplish the same work in the same time would have required 1,000 oxen and 500 men." Under power farming the crops in the Caucasus have been 50 per cent larger and one-third less seed has been used. Where Armenia only a short time ago, with eighty per cent of its population engaged in agriculture, was only producing one-third of its cereal requirements, it is today producing about one-half with far less men employed in the work. The Near East Relief is now using eleven Fordson Tractors. With gasoline power, fed by the rich oil fields of Baku on the Caspian Sea and with modern machinery, the Caucasus promises to accomplish one of the most interesting agricultural developments in the history of the world.
