HOW BANKER-FARMER EXCHANGE PLAN AIDS BETTER AGRICULTURE

Buyers and Sellers Brought Together by Field Experts Who Secure Square Deal for Both Parties; Quality of Farm Products Improved.

By D. H. OTIS,

Dr. Chas, F. Klack and wife, The RAISING of first class cattle and the planting of pure-bred seeds city today. Mr. Ohm made the and Dr. R. H. Rand and wife of seeds. With improved livestock and dependable seed the earnings of the farmer are sure to increase in volume and value.

That thought was the forerunner of the Banker-Farmer Exchange idea, a plan by which the banker might aid the farmer toward the possession of better cattle and the production of better crops and find a ready market for his surplus. The Banker-Farmer Exchange plan was proposed

in 1919 by the Agricultural Committee of the Wis-

consin Bankers Association, of which the chairman

was Burton M. Smith, now chairman of the Agricul-

tural Commission of the American Bankers Associ-

tion. To get it started, bankers of Wisconsin sub-

scribed to a guarantee fund of \$10,000, covering a period of two years. After three years of operation, during which time there has been opportunity to give the plan a thorough test, the Exchange has been 275-3 found to be an actual and a distinct help to farmers, and, incidentally, to the banks of farming communities.

How the Exchange Works

for sale can step into the bank the buyer pays a 5 per cent comwhere he does his banking busi- mission. This commission is diness, and, on blanks furnished to vided equally with the local field the bank, can list what he has to man.

Lowest Bidder?

> THE printer has lost much in the past because of his mistakes in business judgment, but his customers have lost far more in failure to turn his skill to their advantage. Business men can get vastly more out of a printer than a low bid, and it is reasonably certain that they can get less from the lowest bidder than even the low price calls for; because while he may find it necessary to sell his product at a low price, his dilemma forces him to strike as hard a bargain in delivery as his customer does in buying.

Choose a good printer; he can help you build a better business if you will let him.

Performance Proves

SAVAGE TIRES Built to Excel

Almost any kind of a tire can give satisfactory service under ideal conditions. Some makes will perform nicely only on pavements, others will show to best advantage on dirt roads. Only the better grade of tires will perform satisfactorily under every condition. The success of Savage Tires under the many varying

conditions in the different territories in which they operate cannot be attributed to any one method employed, or compound used, or raw materials selected, but rather to the combination of them all. We have built our tires to perform exceptionally well under every type of condition and use. On the short or long hauls of the heavily loaded commercial vehicle, on the passenger car traveling over the hot roads of the sandy desert, the rocky trails of the mountains, or the broad dirt highways of the plains, or the smooth pavements of the city.

Performance, on the cars of thousands of satisfied users, proves we have really accomplished our purpose-everywhere.
