FINE SHOWING MADE BY FEDERAL RESERVE

SAN FRANCISCO, July 27.—

Production and distribution in the twelfth Federal Reserve district during June, although proceeding at levels below those of the first quarter of the year, have continued in normal or greater than normal volume, with full employment of all classes of labor, according to a summary of business conditions of the Twelfth Federal Reserve District by John Perrin, chairman of the board and federal reserve agent of San Francisco.

Production and shipments of lumber declined during June, and new orders received were smaller in volume than in the previous month or in June, 1922. Lumber mills report a sufficient quantity of unfilled orders still on hand, however, to necessitate capacity operations.

No appreciable decline in the volume of projected building construction was indicated by figures of the building permits issued in the principal cities of the district during the past month. Labor continued fully employed, a fact which is attested by the difficulty encountered by farmers of the district in securing adequate harvest help.

The downward movement of prices which began in May continued during June, Perrin points out. The general level of prices as shown by the United States Bureau of Labor's index number of wholesale prices declined 2 per cent. Important individual declines which contributed to the general fall in prices were those reported for wheat and building materials.

convict men of sin? "Jazz religion is that which prefers cheap vulgarity to reverential worship of Almighty God. It is religion minus brains and plus sensationalism. It is a state of mind which cannot appreciate the beautiful dignity of the Anglo-Saxon words of the Bible, but applauds the use of such words as 'blackguard' and 'liars' and 'damnable fools.' to the Lowest Bidder?

THE printer has lost much in the past because of his mistakes in business judgment, but his customers have lost far more in failure to turn his skill to their advantage. Business men can get vastly more out of a printer than a low bid, and it is reasonably certain that they can get less from the lowest bidder than even the low price calls for; because while he may find it necessary to sell his product at a low price, his dilemma forces him to strike as hard a bargain in delivery as his customer does in buying.

Choose a good printer; he can help you build a better business if you will let him.
