Daily News Letter

MANILA, Aug. 9.—The Philippines are the only wet territory under the American flag, but, according to local legal authorities, a recent decision of the United States Supreme Court extends the 18th Amendment to the islands, and steps will have to be taken to enforce the law. The passage in the decision which it is claimed, makes the islands dry is as follows: "Various meanings are sought to be attributed to the term 'territory' in the phrase 'the United States and all territory subject to the jurisdiction thereof.' We are of the opinion that it means the regional areas—of land and adjacent waters—over which the United States claims and exercises dominion and control as a sovereign power." Enforcement of prohibition in the islands would mean a big loss to the government revenue, which at present is barely sufficient to meet administrative expenses.

A new record in the annals of successful leprosy treatment was established recently by Dr. Samuel Tietze, of San Lazaro Hospital, when he discharged two patients as definitely cured after only six months' treatment with ethylester, a chaulmoogra oil preparation. Of 302 patients who were placed under treatment on January 1, 1922, 42 have been paroled pending final discharge and 27 have been definitely declared negative, so far as leprosy is concerned. It usually requires two years for a definite cure. Dr. Tietze injected 204 patients in 20 minutes, beating his previous record of 214 patients in 37 minutes.

Senate President Quezon, Speaker Roxas and other prominent Filipinos have cabled President Harding protesting against the contemplated application of the United States coastwise shipping laws to the Philippines. Under the Shipping Act the president can extend these laws at his discretion, and he was recently reported as having expressed his intention to do so. It would mean that only American ships should carry cargo between the United States and the islands, and this would materially help the American merchant marine, especially on the Pacific.

The Filipinos are apprehensive that extension of the coastwise laws would mean a strengthening of the political ties that bind the islands to the United States.

A law affecting prospective mothers employed in local factories is likely to play havoc with the Philippine tobacco industry. Under this law such women are entitled to two months' vacation with pay, one month before birth of the child and one month after the interesting event. As the great majority of tobacco workers are women and the Filipinos very prolific, it is easy to see that the tobacco factories must count on a considerable increase in unproductive overhead expenses. The Philippine tobacco industry has not been any too prosperous recently, and there is a strong feeling of protest against the measure. The author of the law is Senate President Quezon, and he saw to it that it was passed at the last session of the Philippine Legislature.

The Attorney-General, in response to requests from various interests concerned, has placed a strict interpretation on the provisions of the law. Thus, he ruled that in the event women entitled to the birth bounty are discharged, such dismissals must be strictly bona fide and no substitutes can be put in their places. Also, if a worker decides not to return to work after giving birth to a child and receiving the prescribed bounty, she is still entitled to the month's pay and is under no obligation to return. The Attorney-General has also ruled that the provisions of the law apply to all females, whether married or unmarried.

A Filipino regiment, the 57th U. S. Infantry, stationed at Fort McKinley, has just achieved the distinction of qualifying 100 percent of its personnel as rifle shots—experts, sharpshooters and marksmen. This is a record for the United States Army, the best previous showing having been made by the 25th U. S. Infantry at Nogales, Arizona, last year with 97 percent.

Get out that old blunder-buss and get ready for that hunting trip. We carry everything you need, camping equipment, guns, and a full line of ammunition. Army Goods Store. 288-2

Clifford West of Portland, was in Ashland today, making business visits to several local firms.

The Tidings office for all kinds of printing.

BLUE BOAR English Blend Cigarettes

A New Cigarette ~ a new blend

We call this new cigarette Blue Boar because it is developed from America's favorite fine tobacco, Blue Boar Pipe Mixture. For 19 years its tobaccos have been the finest obtainable—eight rare types of the choicest American, Turkish and Egyptian. Here was no chance for betterment.

The secret of this new-type cigarette is in a newly discovered method of blending. This may sound commonplace to men who have felt that the limit of refinement had been reached, but you will be as surprised as others when you smoke your first pack of Blue Boars.

Triple Blending Blue Boar tobacco is triply blended. The ordinary process is but a single blending, which now seems crude. Yet for years experts have considered one blending sufficient, and have searched elsewhere for refinements.

In Blue Boar we blend the two American tobaccos separately. Likewise the five Turkish. Then we give the Latakia from Egypt a mellowing treatment. Each tobacco develops its finest characteristics. A third and final blending insures a rare and distinctive combination, such as you've never known before. The old way never could bring such perfection.

It is a costlier, slower process—but worth it, as you'll agree. The result of this simple 'discovery' makes all the difference in the world—an entirely new taste, a refinement of all refinements.

Try Them Today Buy one pack of Blue Boars. We promise you a delightful surprise. You'll undoubtedly adopt Blue Boars as your final-type favorite—and never switch again.

THE ONLY "SURE THING" IN THE INVESTMENT FIELD

The Advice of Honest Men Who Know, and Willingness to Be Content With Reasonable Return, Declared Only Safe Road to Assured Income.

"Success in life depends upon the investments made of talents and time," says an article on investing prepared by the Committee on Public Education of the American Bankers Association. "Future return will be gain or loss, according to these investments. That is a law of life which controls investment of money, just as it controls investment of talents." The article, which is particularly timely in these days when so many are being robbed by fake investments, continues:

In the business sense, the word investment relates to the use of money in acquiring ownership of property. Ownership may represent entire possession of property, as of a home; partial ownership, as holding stock in a corporation, or conditional ownership, as in the case of buying a mortgage or a bond. When a person makes an investment in bonds he is really loaning his money to the government or corporation issuing them. He will earn as long as he owns them or until they are paid off.

Ownership of great corporations is vested in individuals who have invested money in their stock or bonds. Many people regard the ownership of the United States Steel Corporation, for example, as differing from the ownership of, say, a small workshop. Yet investors in shares of Steel Corporation stock are entitled to the same rights under the law as the owner of the workshop. In the corporation the owners hold certificates of stock as evidence of their investment, whereas the owner of the little workshop holds a deed as title to his land.

Capitalistic Laws Protect Investors Because the laws stand for the equal protection of all investors it is possible and profitable to make good investments. It gives an incentive to work hard and to invest. The person who wishes to invest must first work and accumulate funds with which to do so.

Bonds are always secured by mortgages on the lands, buildings or other property of the corporation for which the money has been used. When a bond matures the money must be repaid to the owner of the bond.

All investors are a part of a great financial system which gathers up and puts to work the wealth of the country for the mutual benefit, prosperity and well-being of all. In America it is possible for any one who is willing to pay the price of self-denial and hard work to be an investor. Good investments made in early life by saving such small sums as may be possible lay the foundation for providing the comforts of later years, when it is harder to earn a livelihood and when poverty often becomes the condition of those who have not reduced thrift in youth.

CHAMBERLAIN IS TO REPRESENT OREGON

SALEM, Aug. 8.—George E. Chamberlain, ex-senator has telegraphed Governor Pierce that he will represent the people of Oregon at the funeral services for the late President Harding in Washington. Mr. Chamberlain also will accompany the body to Marion, Ohio, where he will participate in the obsequies to be held there.

Mr. Chamberlain was requested to represent the people of Oregon at the funeral by Governor Pierce.

The ex-senator also will provide a wreath, a gift from the state of Oregon, which will be placed on the bier of the late president.

SUMMER COMPLAINT makes little headway with children whose careful mothers protect them from stomach and bowel disorders, hot weather cramps, weakening diarrhoea - with CHAMBERLAIN'S COLIC AND DIARRHOEA REMEDY. Quick in action - satisfying in results.

Does Fear Put a Tax on Your Pocket-Book?

Fear is a partner in the sale of many a quart of high-priced motor oil. The motorist pays for added protection that he does not get. The extra money usually goes into long-haul transportation and high merchandising costs.

Zerolene. STANDARD OIL COMPANY (California). 30% less CARBON 5% more gasoline mileage. Image of Zerolene can.
