FEED THE WHEAT SURPLUS TO BIDDY

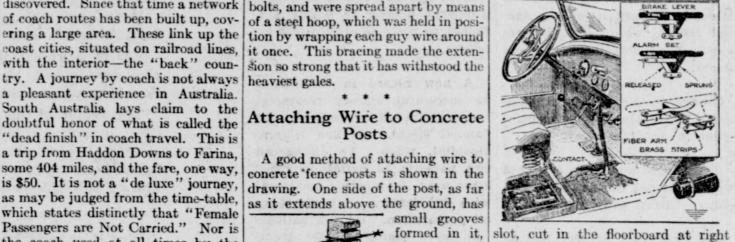

Fast drinking is a habit which careful stock raisers are anxious to correct in young calves, for if allowed to continue, it is likely to cause digestive the problem of erecting an extension on disorders that affect the animal in after life. An effectual check against

this is believed to have been found in a simple metal float that fits into a straight-sided pail in which it slowly drops as the calf feeds. A hole in the center of the float, the upper surface of which forms an inverted cone, regulates the flow of milk, and prevents its being drunk too fast.

#### \* \* \* Theft Alarm Safeguards Car

The drawing shows a simple theft alarm that can be attached to any car, and will, when set, sound the horn and keep it sounding, the moment the emergency brake is released. It coneaches from Melbourne to Castle- The latter were fastened to the top of sists of a switch having two springmaine.
