RADIO LEAGUE TO MEET AT CHICAGO

OREGON CONVICTS BACK WARDEN SMITH

CHICAGO, Ill., Aug. 9.—Approximately 1,500 persons, representing all lines of radio activity ranging from amateurs and experimenters to technical men connected with the radio industry as well as authorities of international reputation, will attend the second national American Radio Relay League convention, which is to be held in this city September 12 to 15 under auspices of the Chicago Radio Traffic association, it was estimated here today by committeemen.

Tentative plans for the convention which have just been made public by R. H. C. Mathews of the Chicago Radio Laboratory, central division manager of the American Radio Relay League, call for a program of interest to both the amateur and the broadcast listener. A huge banquet is scheduled for Wednesday evening.

An intensive effort is being made by Mr. Mathews and officers of the American Radio Relay League at Hartford, Conn., to select speakers which will cover all phases of radio transmission and reception bringing before those attending the convention all of the most recent developments which may be utilized for long distance work in the early fall.

One of the most important meetings at the convention on the afternoon of Thursday will be that of the American Radio Relay League traffic department under the chairmanship of F. H. Schnell, traffic manager of the league, which coming international amateur long distance tests and kindred matters will be discussed at length.

The evening will be given over to a technical meeting at which time both amateur and broadcast transmitters will be discussed. Tours will be made to local broadcast and amateur stations the following afternoon. Next is another technical meeting on the general subject "Receiving Apparatus." Saturday is to be a "night of mystery" and the convention will wind-up with the initiation of candidates into the "Royal Order of the Wouff-Hong."

An invitation has been extended to all and as many as possibly can, are expected to be present. Invitations in the form of a coupon has been distributed. These are to be filled out and mailed to J. K. Bolles in Hartford, Conn.

to enable him to advise the committee how many are to be depended upon being present.

OREGON CONVICTS BACK WARDEN SMITH

SALEM, Ore., Aug. 9.—Governor Pierce today made public what is held here to be an extraordinary document—a communication from convicts at the Oregon state penitentiary to Governor Pierce, informing the chief executive he may have 60 days of escapeless grace during which to reform the state parole board and pointing out that, unless policies are changed after that period informal leave takings will again be in order at the prison. The ultimatum was handed to the governor Saturday night when he addressed a meeting of convicts at the prison.

Standing out clearly throughout the treatise which deals exhaustively with conditions at the prison and the state parole law, is the fear felt by convicts that they are to lose their warden, Johnson Smith.

"Tonight, Mr. Governor," the communication declared, "you see before you a body of men who share a common fear and who are actuated by a common motive. That fear is that our warden will be replaced by some other warden, who will, of necessity, be committed to a policy entirely opposite to that of Warden Smith. Our motive is the desire to do all in our power to help Warden Smith and by so doing silence his critics."

The state parole board, the convicts intimated in their statement, is responsible for the numerous escapes under the Smith regime. The board, they say, has been intimidated and seeks to avoid criticism such as followed the paroles of Roy Ritner during the time he acted as governor. The committee of the state bar association also is criticized by the prison inmates who declare it utterly misinterpreted law.

During Warden Smith's tenure of office 37 convicts have escaped.

Song of Moses is the most ancient hymn, it dating from 1491 B. C.

Cannery will run Saturday on beans and blackberries. Bring as many as possible. 288-12
