NO. 292

STRESSMANN IS CHANCELLOR OF GERMAN NATION

Is willing to submit Ruhr Controversy To Court Of Arbitration

REICHSTAG GIVES CONFIDENCE VOTE

Reports Of Civil Fighting Received In London From Berlin. Communists Said To Have Captured City Of Wilhelmshurg.

BERLIN, Aug. 14.—Gustav Stresemann is the new Chancellor of Germany following the resignation of Chancellor Cuno yesterday because of a vote of "no confidence" returned against him by the Reichstag.

Succeeds Cuno
Stresemann was named as the new Chancellor to succeed Cuno because of his ability to form a coalition, cabinet and thus help unite the many parties of Germany which have been fighting among themselves for sometime.

Asks Arbitration
The maiden speech of the new Chancellor was made in the Reichstag this morning and was to the effect that Germany would be willing to submit the Ruhr question to arbitration, if France would. It is not believed that France will consider this plan with much favor.

Reichstag Backs Him
The Reichstag gave the new Chancellor a vote of confidence by a vote of two hundred and forty to seventy six, which under the present conditions of turmoil and unrest in the German Nation is considered quite remarkable.

Civil War Reported
LONDON, Aug. 14.—Reports received here from Berlin this morning were to the effect that heavy fighting with severe casualties have been going on in a wide area between Hamburg and Aix La Chappelle in Germany. It is reported that the Communists have captured Wilhelmshurg, while elsewhere the Reds have sustained very heavy losses. The casualties are estimated at between ten and one hundred killed and wounded.

Stressman Will Help
The appointment of Gustav Stresemann is believed to have remedied the condition a great deal, but the present civil war conditions coupled with the unrest of the people and the low purchasing power of the German Mark makes it appear that Stresemann has a more difficult task ahead of him to keep the nation out of trouble than any of his predecessors in the history of the country.

STAMBOULSKY'S DEATH LIFTS BURGLAR STYLE BAN
PARIS, Aug. 14.—The tragic exult from the political scenes of Bulgaria of Premier Stamboulsky had an unlooked for aftermath in Sofia. According to word reaching Paris the women of the city immediately began wearing short skirts and high laced shoes.

Stamboulsky several months ago had issued a decree forbidding such "frivolity." The women took it for granted that with his death the decree would not be enforced.

WOMAN TENNIS CHAMPION OF NATION TO BE SELECTED AT FOREST HILLS
FOREST HILLS, (N. Y.), Aug. 14.—In today's singles in the women's international tennis, at the West Side Tennis Club, Miss Eleanor Goss will play Mrs. Geraldine Beamish; Miss Helen Wills of Berkeley, Cal., will meet Mrs. Clayton, and Mrs. Mallory will oppose, Miss McKane. In the doubles, Mrs. McMurray and Miss Wills will team against Mrs. Beamish and Mrs. Clayton.

A number of the first round matches in the national women's singles championship also will be played tomorrow, but on the courts outside the stadium. All of the players engaged in the play for the national cup will play their first matches Tuesday.

The American women's tennis team won all three of its matches against English players for the international cup Saturday. Miss Wills defeated Miss Kathleen McKane 6-2, 7-5. Mrs. Molla B. Mallory defeated Mrs. R. C. Clayton, 6-1, 8-6, and the doubles match was won by Miss Eleanor Goss and Mrs. Hazel Hotchkiss Wightman from Miss McKane and Mrs. Nancy Covell, 10-8, 5-7, 6-4.

England now must win all of the four matches scheduled for Monday in order to win the cup.

JAIL DOES NOT BOTHER TUFFY

Goes To Dance Saturday Nite When Supposed To Be In Cell

Tuffy King, who has been more or less in the limelight since his arrival some time ago on a charge of larceny, and his subsequent decision to take a 90 day jail sentence rather than give up driving racing cars, is again attracting attention by his rather novel method of serving the 90 day jail sentence.

Last Saturday night, as Traffic Officer McMahon was walking down a Medford street, he saw, to borrow from Tuffy's own words, the supposed prisoner "coming down the street all decked out like a plush cow."

Stopping him, McMahon asked King where he was going, and was informed that he was going to a dance.

"I thought you were in jail," said McMahon.

"I was, but the sheriff let me out this evening to go to the dance," was the astonishing reply.

A phone call to Judge Gowdy at Ashland revealed that King had not been paroled, and the judge ordered that he be taken back to jail.

"Lock him up, and tell the sheriff where he is in the morning," officer McMahon told the turnkey after King had been taken back to Jacksonville.

DUNSMUIR PLANS STREET PAVEMENT

A report was read by Dr. Fred Evans at the meeting of the chamber of commerce Tuesday night showing the progress made by the committees from the Lions club and the chamber of commerce that are working together on the street paving proposition, according to the Dunsmuir News.

Dr. Evans, secretary of the combined committees, reported that petitions were in process of preparation to be presented to the property owners fronting on the streets that will be paved. The petitions will be presented to the board of trustees, asking them to have the paving done.

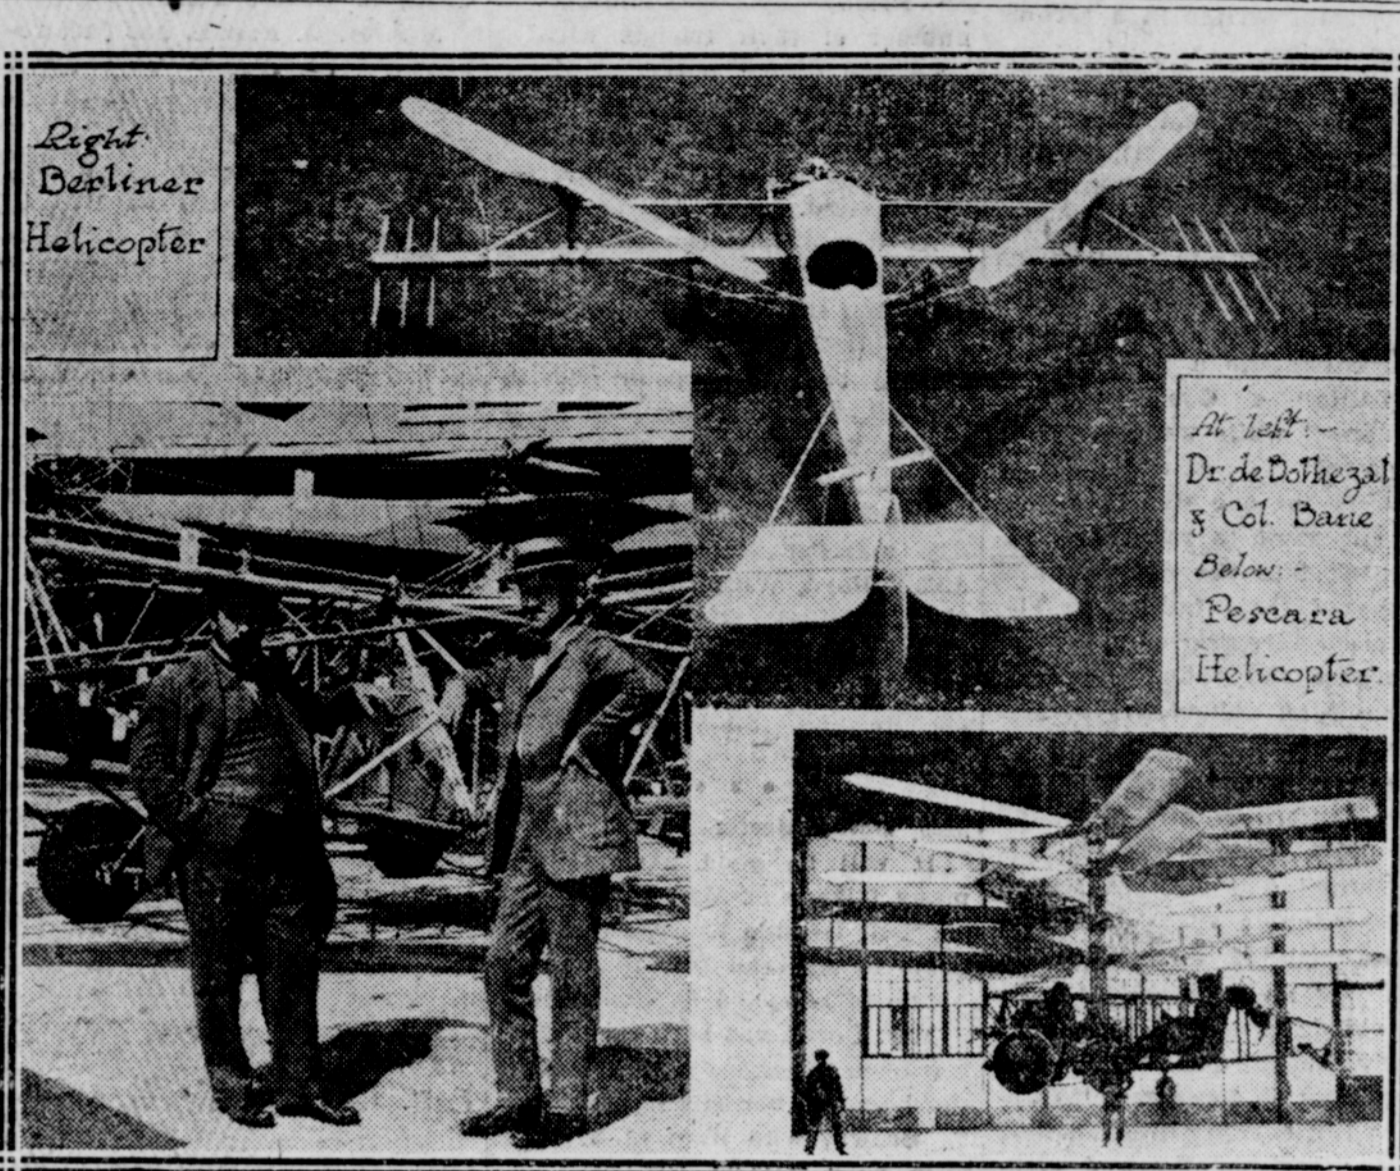

J. Doyle of the Kaiser Construction company was present when the two committees met Monday night, and stated the cost of paving would be \$2.50 per square yard, and a nine-inch curb would be \$1 per running foot if considered by his company.

There are seven units contemplated, as follows, first—Sacramento avenue from Ash to Willow; second—Willow to Pine; third—Pine to Cedar; fourth—Cedar to the bridge; fifth—Pine street from Sacramento to Florence; sixth—Cedar street from Sacramento to Florence to Shasta.

Property owners fronting on these streets will be sent petitions to sign.

FILIPINOS GIVE STIFF TEST TO U. S. DOCTORS

MANILA, Aug. 13.—American physicians of recognized standing must pass the examination of the Filipino Board of Examiners before they can practice in the Philippines. Dr. W. H. Waterous, a noted eye, ear and nose specialist, who recently retired from the army, to engage in private practice, was one of the 27 successful candidates out of 127 who took the recent examination. It is suspected that the examination was unusually difficult, the highest percentage obtained by a candidate being 76.

WASHINGTON, Aug. 14.—Twenty years ago, at Kitty Hawk, N. Y., Orville Wright, father of aviation, left the ground in a crude contrivance, and history was made. Man had conquered the air!

Marvelous achievements and advance in the field aeronautics have been noted since that memorable day in 1903. The aeroplane has become a recognized adjunct to civilization. It has become a customary vehicle of transportation; a material factor in the world's military establishments.

Coincident with man's first dreams of flying like a bird, however, came a desire to construct a machine which would rise vertically from the ground. Children's pinwheels and similar toys inspired the belief that such a contrivance would be the most feasible.

Long before Langley and the Wright and Curtiss brothers mastered the science of aviation toy helicopters had been flown. The idea of the machine which would rise straight up is older than the aeroplane.

Yet today finds the helicopter still in the experimental stage. World Powers are viewing for the first practical development. Great Britain has put up a prize of a quarter of a million dollars to attract scientists and inventors; France has just purchased a helicopter which bears promise; the United States has expended vast sums of money in research and development.

There is no question but that sooner or later a workable helicopter will be built—it is merely a matter of design, additional information and, perhaps, that spark of genius that has marked every great advance.

The helicopter differs from the aeroplane in that it obtains its lift directly from the propellers and not through a component of resistance of the air acting on planes inclined at an angle to the direction of the motion of the vehicle. Pending the outcome of its development the advantage of the helicopter is questionable.

Its ability to rise vertically from a standing start is the most apparent, while ability to hover motionless over a given spot is another evident point in its favor.

The big present danger, however, is that the maintenance of the helicopter in the air is dependent entirely upon the engine. Failure of the motor on any machine yet flown would mean a sudden and terrific crash to the earth, and Army and Navy fliers are unanimous in the opinion that the present aircraft engine is not sufficiently reliable.

Four major problems confront the aspiring inventor. They are: 1. That of getting off the ground, 2. That of getting back to the ground in case of engine trouble, 3. That of keeping right side up, 4. That of flying horizontally.

Backlog Requested
Senator Moses in his statement said that Coolidge should receive a solid New England backing, and urged the New England states to consider Coolidge very strongly.

INDIANAPOLIS, Aug. 14.—Protection of the national flag from misuse in advertising will be afforded through the Associated Advertising Clubs of the World, according to information received at national headquarters of the American Legion in Indianapolis.

Since the adoption of the uniform code for flag observance at the National Flag conference held in Washington a few weeks ago under the auspices of the American Legion, efforts have been made by the Legion to obtain the support of many national societies to promote respect to the flag. The organization of advertising men was among the first to respond to the Legion's request.

Copies of the code adopted will be sent to officers of advertising which the vigilance department of the Associated Clubs has long fought is the use of the flag in advertising, a recent editorial in the club's official organ states. "Nearly every state in the union has a law prohibiting the flag's use in advertising; but whether the states have this law or not, it ought to be a comparatively simple matter to convince any advertiser that such use of the flag is improper, to say the least, and is bad advertising practice."

MEMBERS OF CABINET WILL KEEP OFFICE

Body Built Up By Harding To Continue In Place Under Coolidge

PRESIDENT WILL BE CANDIDATE IN 1924

Massachusetts Senator Back Of Movement To Retain Chief Executive As Head Of Nation. Asks For New England Backing.

WASHINGTON, Aug. 14.—The cabinet which the late President Harding built up during his administration is to remain with President Coolidge for the time being as the result of a cabinet meeting held last night at which all members of the cabinet agreed to remain with the new administration.

Rumors Unfounded
Rumors which have been prevalent that President Coolidge was intending to accept the resignations of several members of the cabinet and appoint other men in their places were thus dispelled and the party seems to be much more intact and back of Coolidge than was at first expected.

Coolidge To Be Candidate
That Coolidge is to definitely be a candidate for renomination in the next presidential election was made known yesterday when Senator Moses of Massachusetts launched a boom to keep the present president in his office.

The statement of Senator Moses that the death of President Harding had made a great change in the political landscape, and that President Coolidge is at present the outstanding figure in the republican party received with little interest in political circles as it had been expected for some time.

Backlog Requested
Senator Moses in his statement said that Coolidge should receive a solid New England backing, and urged the New England states to consider Coolidge very strongly.

FLAG PROTECTION URGED BY LEGION

INDIANAPOLIS, Aug. 14.—Protection of the national flag from misuse in advertising will be afforded through the Associated Advertising Clubs of the World, according to information received at national headquarters of the American Legion in Indianapolis.

Since the adoption of the uniform code for flag observance at the National Flag conference held in Washington a few weeks ago under the auspices of the American Legion, efforts have been made by the Legion to obtain the support of many national societies to promote respect to the flag. The organization of advertising men was among the first to respond to the Legion's request.

GASLINE PRICES LOW IN 11 STATES

CHICAGO, Aug. 14.—Eleven midwestern states served by the Standard Oil company of Indiana purchased gasoline at 15.4 to 18 cents a gallon today as the fruit of a temporary war started by Governor McMaster of South Dakota. The states affected are Illinois, Indiana, Missouri, Kansas, North Dakota, South Dakota, Wisconsin, Iowa, Minnesota, Michigan and Oklahoma.

The independent producers protested bitterly claiming the fight is ruinous. The governor of Colorado asked the dealers to meet the price cut.

Governor Bryan of Nebraska, telegraphed a request to Attorney-General Daugherty for federal prosecution of the oil companies. Governor Donahy of Ohio, conferred with officials of the automobile association relative to possible action on the gas situation.

Bridge crossing Calapoola south of Tangent and Pacific highway between Shedd and Tangent to be completed this year.

West Linn school board awards \$26,049 for construction of gymnasium.

AGED ASHLAND RESIDENT DIES

R. M. Garrett Passes Away After Living Here Fifty Years

Robert Martin Garrett, one of the pioneer residents of Ashland and who had lived in Jackson county for a period of over 50 years, and in Ashland for 45 years, passed away at his home at 124 Manzanita street yesterday afternoon, after an illness which had confined him in his home for over six weeks.

Mr. Garrett was 83 years old at the time of his death and had been in rather poor health for several years. His death was caused by old age. The funeral arrangements have been completed and will be tomorrow afternoon at 2:30 o'clock.

Mr. Garrett was born in Little Rock, Arkansas on March 1st, 1840, and crossed the plains when only 14 years old with his parents who settled at Philomath, Oregon, where the family remained for a period of between ten and fifteen years.

From Philomath they removed to Jacksonville where they remained for five years, after which Mr. Garrett came to Ashland where he has since resided.

Mr. Garrett is one of the oldest residents of Ashland and is known by practically every one in the town.

The survivors are Mrs. Robert Garrett, his wife and two sons and four daughters as follows: Frank Garrett of Los Angeles, Mrs. Fred Engle of Ashland, Mrs. A. S. Mattern of Reno, Nevada, Mrs. L. D. McKee of Michigan City, Indiana, Mrs. H. A. Canfield of Drain, Oregon, and Fred Garrett of Casper, Wyoming.

TRANSFERS REPORTED

Late realty transfers reported by the S. L. Allen agency are: Sale of the J. R. Wick lot on Church street to S. Gardner. Barn and lot of Spratt Wells on Water street to George Irwin. W. K. Smith property on B street to James Butler.

LENITY SHOWN MAN AT LEGION REQUEST

CHICAGO, Aug. 14.—When the American legion recommended that lenity be shown, Arthur Lorenz, former editor of the Illinois Staats-Zeitung, was sentenced to six months in jail, with a fine of \$1 and costs, by Judge Hugo P. Lorens, who was convicted several weeks ago on a charge of criminal libel, which developed from an editorial he wrote characterizing legion members as "bums, vagabonds and tramps."

It was only the legion's action that saved Lorenz from the maximum penalty of a \$500 fine and a year in jail, Judge Pam declared. "This was not only an attack against the legion but was indirectly, in an insidious manner, an attack against the members of that glorious army that went over the top in France for the sake of humanity," he said.

MYSTERY OIL PAINTING OF SIXTEENTH CENTURY FOUND IN OLD NEGRO SHANTY

WASHINGTON, Aug. 14.—In an old Southern negro shanty in historic Georgetown on the banks of the Potomac, reposes a "mystery oil painting" of the sixteenth century. Nothing is known of the history of the picture. But nevertheless, eminent artists have pronounced it to be a "real art treasure."

Francis D. Millet, a great artist, and Archibald Butt, military aide to President Taft during his administration, both of whom perished on the ill-fated Titanic when she sank in mid-ocean after collision with an iceberg, were deeply interested in the "mystery painting."

It was while returning from a mission to Italy in an effort to learn something of the history of the painting that Millet met his death. Fortunately, he was only carrying a copy of the original, else it would now be lost.

The picture is now the property of Lizzie Smackum, colored. She inherited the painting from her sister, now dead, whose husband was a hotel porter. There then lived at this hotel where Smackum was employed a little old lady without any too much money, whose name long since has been forgotten. Time came when the little old lady's money became exhausted and she was forced to seek other quarters. Smackum helped her strap her trunks.

This work done, the little old lady said to the porter: "I am sorry I have no money to give you, but here is a painting; take it home and be careful of it; it is valuable." The porter, disgruntled, accepted it, and for many years it hung over a fireplace in his kitchen.

One day a life insurance collector noticed the picture and after examining it closely, said: "I'll give you \$20 for that picture, Lizzie."

But Lizzie, mother of 16 children, had not lived for nought, and replied: "If that picture is worth that much to you it's worth a great deal more to me."

At this time Millet had his studio at Old Forest Hall, in Georgetown, and the Smackum shanty was only a short distance removed.

Street work for Woodburna estimated at \$7209.

idea of the machine which would rise straight up is older than the aeroplane.

Yet today finds the helicopter still in the experimental stage. World Powers are viewing for the first practical development. Great Britain has put up a prize of a quarter of a million dollars to attract scientists and inventors; France has just purchased a helicopter which bears promise; the United States has expended vast sums of money in research and development.

COUPLE START ON HONEYMOON HIKE

Fulfilling a pledge they made a year ago when they fell in love and became engaged at Lost Lake near the base of Mt. Hood, Miss Elsie Calkins of the University of California Extension department and Edgar F. Leming of Gresham, Oregon, were married in Medford this morning by Rev. J. Randolph Sarnett, says the Mail Tribune and left at once for a honeymoon on foot, from Crater Lake to Mt. Hood, along what is known as the sky line trail, a distance of over 260 miles.

The happy couple were married in their hiking costumes, and their respective wardrobes were reduced to the long distance walking minimum. The marriage was held in Medford as it provided a good half way meeting place between Berkeley and Gresham and also was the logical starting place for Crater Lake.

Mrs. Leming explained that she and her husband met at a camp at Lost Lake last year, and considered it the most beautiful place in the world with its wooded shores, its clear glassy surface and the snowy grandeur of Mt. Hood rising straight above.

"We,—that is I," said Mrs. Leming with a smile at the groom. "decided then and someday we would take a walk along the crest of the Cascades and return to the scene of our,—our romance."

"They will camp as they go, fish and hunt a bit perhaps, and of course have the time of their lives.

They didn't say that, but they will nevertheless. Its great to be crazy—about one another, and walk hand in hand under the sun and stars for 40 or 50 days.

FILIPINOS REAPPROACH FOR LIONIZING PANCHO

MANILA, Aug. 13.—Dean Jorge Obco, of the law school of the University of the Philippines, has come out with a public statement strongly condemning the hero worship of Pancho Villa by his countrymen, who have fairly gone wild over his recent victory over Jimmy Wilde for the world's flyweight title. Bocoob declares that boxing is a sport not recognized in decent society and that the Filipinos ought to try to distinguish themselves in more worthy lines of endeavor.

GROUP OF BUILDINGS IMPROVED BY PAINT

Falling in line with the present marked tendency in Ashland to paint up and build up the city, the Park garage and the group of buildings known as Piel's corner, were treated to a coat of red paint the latter part of last week.

The steps from Winburn Way to Granite street have been painted, as well as the buildings in the district.
