WABASH, INDIANA MAN HAS BIG TIME ON 105 BIRTHDAY

WABASH, Ind., Aug. 17.—"Uncle Jack" Higgins effectually halted the procession, as the Englishman once said when he intended to convey that he "stopped the parade," when he celebrated his 105th birthday here. The entire city of Wabash halted its activities for the moment and paid tribute to Higgins. A huge birthday party was held in the city park, and was attended by many hundreds of persons. Gifts were showered upon Higgins. "Uncle Jack", as he is known to young and old in the city, is believed to be Indiana's oldest resident. He was born in England, served a number of years in the British Navy, then came to America to live. Although he was then already past the prime of life, he fought with the Union forces during the Civil War and is now receiving a Government pension. He lives with a daughter, Letitia Higgins, now 85 years old. More than half the 140,000,000 square miles of water on the globe is over 2,000 miles deep.

COMPULSORY POTATO GRADING LAW PASSED

PORTLAND, Aug. 18.—By proclamation of Governor Pierce, compulsory grading and labeling of potatoes will be a law of Oregon on and after September 15, and in connection with co-operative growers' associations which are organizing in the state, this law will no doubt greatly help this industry. The new law provides for standard grades and labeling, according to the schedules of the United States Department of Agriculture. Inspection will be under the state market agent and will be handled in much the same manner as grain is now handled. The government fixes four standard grades, but it is not expected that any one crop will be sorted into four grades, nor would such a practice be desirable. Following is Grade No. 1, which will meet the requirements of the most of the potatoes grown in Oregon. Growers should clip and preserve this: No. 1, shall consist of potatoes of similar varietal characteristics which are not badly misshapen, which are free from freezing injury and soft rot, and from damage caused by dirt or other foreign matter, sunburn, second growth, growth cracks, hollow-hearts, cuts, scab, blight, dry rot, disease, insects, or mechanical or other means.

been needed in Oregon as an aid to marketing. Many states have long had these standards and Oregon has been at a disadvantage in the big markets. Dealers want to know just what they are buying, and when they do not know, the price they will pay will make them safe and the grower sorry. With central selling agencies in position to meet the demands of large buyers and with guaranteed grades to the trade, Oregon potatoes should come to the front.

Nearly 1,000,000 American workers are buying shares in companies where employed.

PREHISTORIC BUILDINGS REMAIN IN ARIZONA TOWN

NEW YORK, Aug. 18.—In Arizona can still be seen remains of buildings erected by the early American Indians, built out of stone containing opal, agate and chaledony. These stones were taken from the petrified forests in the neighborhood of Adamana, Arizona.

Prehistoric builders never used more beautiful stones for their habitations than the trunks of those trees which flourished ages before man appeared on the earth, says C. F. Talman in The Mentor for August.
