The Modern Golden Calf
18 K GOLD
[National Crop Improvement Service.]
"SHALL we raise it or send the calf to market?" is the question being argued out by the members of the boys and girls' calf club with their fathers.

stock is usually worth the trouble of raising," says Dennis A. Merriman, of the American Steel and Wire company, "because as so concisely stated by Professor C. A. Plumb, of the Ohio Agriculture college, 'if there is anything in the laws of breeding that has been helpful in the past, it is the knowledge that like produces like.' Class will tell.
'The calf with several generations of high-producing ancestors on both sides of the pedigree is truly the golden calf, yielding the largest measure of satisfaction and profit to its owner.
'One of the really fine things about it is that the work of the boys and girls' clubs is giving the right answer on this question to Dad through practical example.'

POTATO INSPECTION REQUIRED BY LAWS

PORTLAND, Aug. 27.—Many requests come to the market agent for information regarding the new potato grading and inspection law, and there appears to be a general mistaken impression that all potatoes in lots of more than 50 pounds must be state inspected.
The law, which will go into effect September 15, is primarily for large shipments. It provides that in carlot shipments, or in quantities of 10 tons or more, according to the United States standard grades. There are four established grades, but grade No. 1 will take care of the cost of the potatoes grown in Oregon.
On smaller shipments, from 50 to 10 tons, state inspection is NOT required, unless requested by the buyer or seller, but the seller is required to grade the potatoes when sold and on the sack or container put the name and address of the grower and the grade. If this is not complied with, they shall be labeled as "culls."
The state market agent will soon have ready for distribution for those who care for the information, a pamphlet giving the grades, fees for inspection and rules and regulations by the market master.

CALIFORNIA MAN NOW ON GOLD COMMISSION

WASHINGTON, D. C., Aug. 27.—Senator Tasker L. Oddie, chairman of the Senate Commission of Gold and Silver Inquiry, announced today the appointment of Fletcher Hamilton, of San Francisco, California, to represent the Commission in the conduct hearings in the western gold and silver producing states for the purpose of developing first hand information upon the condition of the industry. Through the conduct of these hearings the Commission will be able to attain the personal contact necessary to determine the problems confronting the gold and silver mining industry.
Mr. Hamilton comes to the Commission eminently well qualified to carry on this work, through his direction of the work of the California State Mining Bureau as its Mineralogist for a period of over ten years, California being the premier gold producing state of the Union. Mr. Hamilton graduated from the University of California in 1904, and has had practical experience in mine operation and engineering in the states of Arizona, Nevada and Montana, as well as in California, and is familiar with general western conditions.

INITIATIVE AND ACTION NECESSARY FOR SUCCESS

By S. W. STRAUS, President American Society for Thrift.
ANNOUNCEMENT recently was made in the press concerning an estate valued at \$700,000 which had grown from \$50,000 during fifty years of trustee administration. Much interesting comment has been made on the incident and it has been alluded to as an example of thrift.
The increased value of the estate is a significant illustration of the prolific quality of money. It shows what funds will do if allowed to remain untouched during a period of years. But, in the broader sense, the incident is not a lesson in real constructive thrift because real thrift implies initiative and action as well as conservation.
This nation would not have been what it is today if the various fortunes and accumulations of wealth had merely been kept intact and been allowed to grow without the element of personal aggression.
A man who is truly thrifty is not by any means a miser. He understands the value of eliminating waste. He knows what it means to economize. And he knows, too, that mere hoarding is not synonymous with enlightened development.
The first step in individual success must consist of learning to save. "Teach economy," said Lincoln, "that is one of the first and highest virtues; it begins with saving money." But individual development must go further. Economy is the first step. There are many others.
Let us not by any means underestimate the value of saving or minimize the results which come from carefully guarded resources. But if we are to attain the utmost of our personal possibilities we must learn also the value of action. Cold judgment is not all the equipment required for success. Courage and activity are just as necessary.

COLMA DISTRICT IS HAVING GOOD SEASON

COLMA, Aug. 27.—This fruit district is completing one of the most prosperous summers ever experienced. A majority of the local farmers had full crops of fruit, and prices in the bay city and eastern markets were more than fair.
The local farmers have had a busy summer, and the orchard work has been heavy during the past thirty days. First shipments of fruit were made July 20th, and final shipments will not be completed for several weeks yet.

REDDING WOMAN SEEKS LETTERS TESTAMENTARY

REDDING, Cal., Aug. 27.—Mrs. Bessie D. Shadwell has petitioned the superior court for letters for administration on the estate left by her husband the late Supervisor Sherman C. Shadwell. The estate consists of a half interest in the home place in Redding and a half interest in some Liberty bonds and a cash in bank. The estate does not exceed \$10,000.

United States and elsewhere, and study is also being made regarding the effect of the decreased production of gold and silver upon commerce, industry, exchange and prices.
The Commission sincerely hopes that the mining operators and prospectors will lend every aid possible to Mr. Hamilton, so that these hearings may record accurately the conditions under which the industry has been carried on since 1914. With a statement of facts from those who have the knowledge and practical experience to present them, the Commission will greatly assist in its investigation and in developing such remedies to safeguard the industry in the future as the testimony may indicate are necessary.
Sumpter—New smelter completed and starts operations.

IT IS FUNNY
The way some minds work. Take for instance the mental attitude of the man who, hides a \$30.00 watch under his pillow at night, yet he parks his car on a dark street for hours at a time with a \$30.00 spare tire that has no protection.
The number of tires stolen is said to be appalling. The appalling thing is that so few are stolen when the opportunity is so great.
Considerably more than half the cars that pass you daily are carrying spare tires and wheels that have no protection.
Every car owner should have at least two pad locks, one for his garage or tool box and one for his tire carrier. We have a full line of the Celebrated
