A Cosmopolitan.

Joe—Bill, what's a cosmopolitan? Bill—Well, suppose you was a Russian Jew living in America, and married to a Chinese woman, and you had just finished an Irish stew and you was smokin' a Turkish cigarette, while a nigger band outside was playing "The Blue Bells of Scotland," then you'd be a cosmopolitan.

Scots Made Pistols.

Before the advent of the American revolver, the Scottish cities of Perth, Stirling and Dundee were great centers of the pistol-making industry. Scottish pistols were famous as far back as 1515, and were exported to many countries. There were at one time nearly 100 concerns in Scotland engaged in the industry.

Sholes' Prediction.

Christopher L. Sholes, inventor of the first typewriter to be commercially successful, is said to have predicted that his invention would prove one of the greatest factors in the emancipation of women, by enabling them more easily to earn a living.

New Hardy Dwarf Lemon.

Introduction of a hardy dwarf lemon from China may result in extending the zone in which lemons can be commercially cultivated in this country. Officials of the United States Department of Agriculture here believe. The promising oriental citrus fruit was sent to this country in 1908 by Frank N. Meyer, explorer for the bureau of plant industry. It was considered at that time that it might prove of value for house culture in the United States. The new lemon has, however, outgrown the earlier expectations. Tests in various parts of the country have shown that this Chinese dwarf is not only valuable as a house plant, but that it is much harder than the commercial varieties of lemons now grown. Its fruit is also of excellent quality.—Science Service.

New Steel Tempering Process.

Through a new process of tempering steel, chopping a cold crowbar into chunks with an ax or whittling a steel rod into shavings with a pocketknife are simple performances. In fact, it is claimed by the two investigators in the state of Washington that a steel ax and pocketknives tempered by the new process have actually been made to perform these seemingly impossible acts. The process consists in the use of certain chemicals in water or oil in the tempering vessel.

ITCHING ECZEMA DRIED RIGHT UP WITH SULPHUR

Any breaking out of the skin, even fiery, itching eczema, can be quickly overcome by applying a little Mentho-Sulphur, says a noted skin specialist. Because of its germ destroying properties, this sulphur preparation instantly brings ease from skin irritation, soothes and heals the eczema right up and leaves the skin clear and smooth.

It seldom fails to relieve the torment and disfigurement. Sufferers from skin trouble should get a little jar of Rowles Mentho-Sulphur from any good druggist and use it like a cold cream. No. 1

Partnership

Youth faith in the development of this country is well founded. Between 1912-1922 Copco's consumers increased 100%—the gross earnings increased 287%—and still the territory is in its infancy. \$5.00 per month invested now in 7% Copco Stock will make you a share-holder in the prosperity that's in store.

SOME WORDS OVERWORKED

Study of the Dictionary of Synonyms Would Vastly Improve the Conversation of Many Persons.

The sterling qualities of the active individual nowadays must shine through his conversation, his purpose, his thoughts, and those he borrowed must be riveted in the hearer's mind by words which cannot be forgotten. Unfortunately many of those engaged in great purposes have lamentably failed to augment their vocabularies by reference to a book of synonyms. Thus, we are suffering from the overwork of a few words.

The idea now is to "sell" something, an idea, a state, a climate. There must be a "selling appeal," a "sales plan," and then it is sure to "go over." It "absolutely" cannot fail. You must agree "absolutely" that the weather is good, bad or indifferent or the "efficiency" bound will put "kick" and "pep" into his arguments until you shout "shoot," listen and become convinced.

But having been "sold" is not enough for the builder of the "atmosphere" in which you were trapped. He will want to know, must know, in fact, your "reactions." Ah, the reaction. There is a word both subtle and enthralling. You can have reactions to a book, a piece of cheese, a miserable blowout or a bouffant. That is where the "peppery efficiency" person must check the flow of his "sales talk" long enough to listen.

So you ask him to please pass the butter and wonder why they spend time and money printing dictionaries. —Spokane Spokesman-Review.

NEW STORY BY MARK TWAIN

Harpers Have It but It Will Not Be Published for Two Hundred Years.

A great treat is in store for the lovers of books who are on earth two hundred years from now. They will have a fresh story written by Mark Twain. Persons living nowadays never will know what the master wrote in this story, for it is sealed and is not to be read or published until two centuries have elapsed.

The Harpers, who are moving their printing house from Franklin street to their new building uptown, possess the precious manuscript. In moving desks around in their old quarters the other day they found one with a secret drawer. When this was opened a sealed package was found in it, and a not written on it said it contained a story or article by Mark Twain and was not to be opened or published for two hundred years.

That is all that is known about it. The package is in possession of the Harpers, who will doubtless carry out the writer's intentions. It will remain unopened until well into the Twenty-second century. Then the citizens of this world will have something good to read.—Cleveland Plain Dealer.

Keeping Up the Standard.

The social caste of customers is not commonly supposed to be regarded in quick-lunch restaurants, but a Philadelphia paper tells this story: "A fastidious person made his way into a steaming, fly-infested little restaurant. The young woman behind the counter placed a tumbler of water before him with a thump.

"What's yours?" she asked sharply.

"Coffee and rolls," he replied. She set before him a mug a quarter of an inch thick and as heavy as iron, filled with a brown fluid. The man seemed dazed. He looked under the mug and over it. "But where is the saucer?" he asked.

"We don't give no saucers here," replied the waitress. "If we did some low-brow'd come pilin' in and drink out of his saucer, and we'd lose a lot of our best customers."

The Frahm anti-rolling tanks are claimed to have conquered seasickness by removing its cause. The newest German liner, the Albert Ballin, is equipped with these tanks. They are fitted on the sides of the vessel, just below the water line and about midships. They fill and empty automatically so that all side motion, or almost all, is checked before it begins. However, the tanks do not prevent the ship pitching in a head sea.

In the Pen.

"What is the name of that handsome prisoner?" asked the impressionable young woman.

"No. 2206, Miss," replied the guard.

"How funny! But, of course, that is not his real name."

"Oh, no, miss; that's just his pen name."—Boston Transcript.

Magic.

By using high explosives, government chemists turn laces and leaves of trees into iron. For instance, a leaf can be pasted to an iron bowl end, while the explosive destroys the original leaf, it is reproduced in all details as a design on the iron. This magical process enslaves molecules flying four miles a second during the explosion. It suggests that the greatest discoveries of the next century will be microscopic. Chemistry, by the way, is the biggest field open to youth. We are in the first phase of a laboratory civilization.

Talking Shop.

An automobile dealer telephoned a friend to announce the arrival of his new baby. "We just received a new model at our house," he said. "Snap little job. All pink and white. Make a fine little runabout in a couple of years. Uses the Klaxon a bit too much, but that's to be expected. Mother and child both hitting on all six." "Well, well," replied his friend, a newspaper man, "you didn't scoop me. We got out a little extra home edition ourselves a few days ago. It's the best way to furnish a house."

Power to Be Harnessed.

The demand for electrical energy is increasing by such leaps and bounds that every available power source is being tapped. Geysers and artesian wells have been called upon to do their share towards furnishing light and power. The only sources of energy as yet elusive to man's efforts to chain them for power-producing purposes are the sun's rays and the ocean's waves. Necessity being the mother of invention, man will eventually find a way to harness these valuable forces also.

Mark Twain's Reply.

When Mark Twain was running his country newspaper he was deluged with all sorts of contributions that would have hurried anyone less than a humorist to an early grave. One day he received a poetic effusion all tied up with pink ribbon and entitled "I Wonder if He'll Miss Me." When Mark had recovered his composure sufficiently to mail back the poem, he did so, with this note attached: "If he does, he ought never to be trusted with firearms again."

Thirty-six blocks of stone, 33 1/2 feet long, five feet in diameter, and each weighing 40 tons, have been installed as columns in a Harriaburg (Pa.) office building. These are the largest single blocks quarried by man since the pyramids of Egypt were built, according to the Popular Science Monthly.

When you open boxes, take up carpets, or do anything that produces a crop of bent nails or useless tacks, save them. Then, the next time you report or transplant flowers, scatter the nails and tacks through the bottom layer of the soil, set in the flowers or plants, and fill the pot with rich loam. When you water the plants the nails will rust; the product of this oxidation will enrich the soil remarkably. You will be agreeably surprised with the strong and beautiful growth of the plants.

"Play-as-You-Enter" Cars for Kids.

"Play as you enter" is the welcome sign on the sides of the "Jollytown" trolley cars in Baltimore, where the traction company has set aside several

cars for the children to play in. They are complete in every detail except that the power is turned off and they are anchored to the ground. Instead of the usual advertising cards, Mother Goose rhymes and pictures are displayed along the sides. The clanging bells and the loud calling of the imaginary and unheard of street names afford noisy proof of the popularity of the play cars as the crews take them along fancied routes.

Worse Than a Crime.

Multroix—Cheer up, old son. Poverty is no crime. Everbroke—That's the worst thing about it. If poverty was a crime I might be able to dodge the punishment.

"THE ETERNAL STRUGGLE"

A story of the North, among snow capped Mountains

Do we eat to live or live to eat?

THOSE who live to eat usually have a short life, and not always a merry one.

Those who eat to live know that it is not how much they eat, but rather the food they properly digest that makes for health and long life.

The crisp, delicious wheat-and-barley food, Grape-Nuts, is not only good to eat, but it digests easily, and supplies life essential vitamin and mineral elements from the grain, without which health and strength cannot be maintained.

Grape-Nuts with milk or cream is completely nourishing—a delightful, well-balanced food for those who eat to live long and happily.

"There's a Reason" for Grape-Nuts
