## THE PRICE OF DEFECTIVE WALKS

It is impossible to calculate the price of defective walks in cities and towns. Only a slight defect in a walk on one of the MOTHERS\_ principal streets of the city has occasioned three more or less serious accidents within recent weeks. Fortunately any one of three could have resulted far more seriously and ought to serve as warning to all property owners, not only, but to the CHAMBERLAIN'S city as well, that it is a serious thing to permit even slight COUGH REMEDY defects to exist in public walks.

Serious injury often results from poor walks, and damages, some of which are irreparable, often cost the owner many thousands of dollars.

Blue sky laws intended to keep a lot of persons from feeling blue because they have lost money in stock schemes.

One of the causes of trouble is that so many persons are trying to get more out of life than they are putting into it.

The average man will admit with becoming modesty that there are a few things in his life which might be made better.

President Coolidge has a grizzly bear on his hands, and in a few weeks he will have congress besides.

Newspapers, say Tom Edison, do not always represent a man's ideas accurately. Well, maybe the man doesn't.

It's a long road that has no one alongside it changing a tire.
