What Shall Bobbed-Haired Ladies Do When Lawyer Experts Disagree?

SYRACUSE, N. Y., Nov. 22.—Does a bride take the first step in losing her husband when she bobs her hair? Or is the barber's bobbing fee the best and cheapest husband-holding insurance she can buy? Which? Do bobbed-haired wives, in other words, appear as divorce court plaintiffs more frequently, for their numbers, than their unshorn sisters? Or don't they appear at all? Syracuse lawyers today say they know, but—don't agree.

Answers to a group polled ranged from: "Bob it and keep it" to "Bob it and lose it." And some said: "Bob it and he'll sue you."

Here are the opinions of Syracuse's attorneys who handle divorce cases:

Arthur Benson—"I never brought a divorce suit for a bobbed-haired woman; I never defended one in a divorce case. But I have named them as co-respondents."

Frederick A. Brown—"Bobbing may be 'out', but it certainly makes some women look better. Neat and trim wives hold their husbands. There are few trim divorce case plaintiffs. Many seem careless of their appearance."

Starr G. Taylor—"Husbands know that some women bob because they are too lazy to comb. Besides, bobbing—like smoking cheapens a woman in her husband's regard. It takes her off her pedestal."

NEWS LETTER

PARIS, Nov. 26.—Frogs fell mysteriously from the skies during a recent violent thunderstorm at Osmes, in the Ardennes. When the sky cleared hundreds of frogs were jumping about in the streets and hopping into the houses, where the housewives chopped off their legs and popped them into the frying pan. It was a "big day" for the inhabitants of Osmes. As a matter of fact the "French froggies" as the soldiers named them, know little of the delights of this rare delicacy. High prices put them out of reach and the American is about the only one who can enjoy frogs' legs in a Paris restaurant.

Bread prices continue to go up and down like a barometer. When flour goes up the bakers insist on higher prices for their bread. They want to make the price automatically variable with the rates for flour, but their request has been refused at least for the moment. One may think that a matter of one "sou" or two on a two-pound loaf is a little thing to haggle over, but the thrifty French housewife who has many mouths to feed knows that the extra sous soon make a franc or two. For bread is really the staff of life for every Frenchman and France without bread would mean a revolution.

Speaking about high prices, they have brought about a curious change of customs. Instead of flowers it is now quite the fashion to send a basket of luscious fruit to the "star" at her first performance. Fruits in season or those out are always desired and infinitely more useful than the loveliest flowers, which fade within too short a time.

"Lingere de la Princess Mary" reads a little sign in a coquettish lingerie shop in the fashionable Rue St. Honore. The ingenious proprietress, realizing that everybody can not be the "Furnisher to the Queen, by Special Appointment," etc., etc., has chosen the Princess Mary. She probably hopes that some day the distinguished lady will pass by the little shop smile, walk in and make a small purchase, which will enable her to procure a sumptuous and much coveted diploma.

The first attempt at a kind of Women Students' Dormitory has just been completed in the old Latin Quarter. Women students attending the Paris University and other colleges are less fortunate than American girls, who have pleasant houses on the campus to live in. French girls have rooms here and there near the schools and take their meals in cheap restaurants nearby. This means that there is little of the jolly dormitory life which all girls re-

member. The new building is expected to help fill in this gap and is reserved exclusively for women registered in Paris schools. The rooms are fresh and light with new clean furnishings. There is a restaurant which offers well-cooked food at a minimum price, and on top of all is a delightful terrace-promenier with gardens and lounges overlooking a quaint section of the students' quarters.

An eye or a tooth?—that was the question in the curious case of an eye-tooth and even molars growing upward and issuing from the socket of a French girl in Southern France. Her right orbit was literally fringed with teeth and the excrescences soon led to such trouble that it was necessary to decide between the eye or the teeth. A surgeon of the French Academy of Medicine performed an operation which proved to be a complete success and the girl's eyesight is now perfectly restored.

Thrice named and then some is the record of the Place de la Concorde, which has changed nomenclature seven times in the course of a little less than two centuries. From 1757 to 1772 it was called "Place Louis XV." In 1792 it became "Place de la Revolution."

"Place de la Concorde" in 1795, back again to "Louis XV" in 1814. "Place Louis XVI" in 1826, "Place Louis XV" for the third time in 1828, and "Place de la Concorde" for the second and last time in 1830. This is the name it still bears, but sharp eyes can distinguish in faint letters beneath "Place Louis XV."
