get the desired picture, but the camera cannot be held steadily enough with the hands to avoid doubling the image. It is, however, a simple matter to hold the camera steady if a cane is carried long. Just below the crook of the cane two holes are drilled from opposite sides to meet in the center, both slanting down from the point of junc-tion. Another hole is drilled through the crook to take a tripod serew, on which the camera is mounted. A cord is run through the angular hole, the ends of the cord are stepped on, and pulled taut by pulling back on the cane, which has the end planted on the ground in the position indicated, thereholding the cane firmly in position. Another method of steadying the three pieces, and to tie or sew these pieces together at the central point as shown, making a form of the letter Y. cops are made at the ends so that the foot can be placed in one loop, and each

WINTER FAIR

TONIGHT IS END OF

(Continued from page 1)

Visitors last night were greeted appreciation.

Funeral services are to be held with the excellent exhibits in the various departments, not only, but by a program of unusual merit staged by the High School. A musical number by the High School Orchestra was followed by an encore did full justice to the usual enthusiasm the orchestra has displayed in other public appearances.

The first grade youngsters of the Junior High liked to dance so well and had so much fun enjoying themselves that they did their folk dance six times instead of three. After seemingly vain attempts on the part of their instructor the kiddles wer inducd to leave the stage in order that other numbers might be given.
