DECEMBER 13

THE SPIRIT OF TRUTH:—Even the Spirit of truth; whom the world cannot receive, because it seeketh him not, neither knoweth him; but ye know him; for he dwelleth with you, and shall be in you.—John 14:17.

ADVICE WORTH CONSIDERATION

During the recent visit to Ashland of A. S. Dudley, manager of the Oregon State Chamber of Commerce, he advised that care be given to landscape gardening, with a view to attracting the tourist, not only, but to winning him as an investor.

The Boulevard offers unlimited opportunities for improvement and beautifying, and if carried out will become one of the most beautiful residential streets and drive-ways in the state. The foundation already exists, but if it is made as attractive as it deserves to be, a hearty response must come from those who are so fortunate as to own and occupy homes along that drive.

Ashland as a whole needs to be improved to a higher degree of beauty. No district or section is excepted. Conditions are right for making Ashland one of the most attractive and beautiful towns of the Pacific Coast.

The New Year will soon be here. Let us make our plans at the beginning of 1924 to make Ashland so attractive that the average tourist will not be able to resist our beauties and will become a home-maker and an investor.

This is an improvement requiring no bonds nor additional tax levies. It is a work in which each and every resident can share, dividing the expense and placing a burden upon no one.

GERMANY'S INNOCENT CHILDREN

Whatever may be thought of the Germans as a people, their political rights and wrongs, their fenized efforts to re-establish themselves in the world, their desperate recourse to various desperate remedies, their falling marks and rising mobs—whatever view is taken of Germany's statesmen and statesmanship, one must feel unalloyed pity for the women and children in this demoralized country who are facing, or before the winter is over, are certain to face, severest want if not actual starvation.

GROUNDLESS FEARS

Occasionally there is heard the hysterical question, "what will the world do when the coal supply is exhausted," and some answer calmly, "science will discover a substitute," or something to that effect.

ceeding generations.

The United States began mining coal in 1814 with a production that year of twenty tons. The production in 1922 was 417,000,000 and in the 110 years since 1814 an aggregate of 14,000,000,000 tons.

With 99 per cent of its original determined coal supply still in the ground, the people of the United States need feel no anxiety over its future fuel, especially since the United States is producing one-half the world's output of the black diamonds.

SYNTHETIC FARMING

Now we know what's to become of the farmer. The word is passed along that J. B. S. Haldane, an English scientist, predicts chemical synthesis of foods within 120 years to a degree that will rate agriculture a luxury, and mankind will be completely urbanized.

Chemistry thou art afoot. Take thou what course thou wilt. But invitation to choice is only empty fealty to courtesy when meals hold a single course.

Not only is a liberal amount of paint required in some of the residential sections, but in the business district as well. Let's get ready to present a bright, new front when the spring season arrives.

May be the leaders of the late insurgent movement against the obregon government received their tip from the houses of congress in the good old U. S. A.

Recent advices from Shanghi indicate that Dr. Sun has not set.

Good news: State taxes for 1924 will be approximately \$1,500,000 less than for the present year.

THE WEATHER

Report for December 12, 1923: Maximum, 39; minimum, 31; set maximum, 34; .08 precipitation, cloudy day.

Our gift line surpasses anything we have ever displayed since in business both domestic and imported lines. Johnsons Jewelry Store.

LADIES! DARKEN YOUR GRAY HAIR

Use Grandma's Sage Tea and Sulphur Recipe and Nobody Will Know

The use of Sage and Sulphur for restoring faded, gray hair to its natural color dates back to grandmother's time. She used it to keep her hair beautifully dark, glossy and attractive.

But brewing at home is messy

and out-of-date. Nowadays, by asking at any drug store for a bottle of "Wyeth's Sage and Sulphur Compound," you will get this famous old preparation, improved by the addition of other ingredients, which can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says it darkens the hair so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through your hair, taking one strand at a time.

Ashland Daily Tidings

B. R. Greer, Editor

Ashland, Oregon

Your car can't wear earmuffs

So fill it up with good "warm-blooded" Zerolene—a "cold-test" oil that flows freely in zero weather—and watch the result—

Your motor will give perfect winter service—easier starting, full power and maximum fuel mileage. And you'll avoid the troubles that usually result from the use of a poor "cold-test" oil—worn bearings, scored cylinders and prematurely diluted crankcase oil.

The Zerolene Correct Lubrication Chart—wherever Zerolene is sold—contains our recommendation of the proper grade of Zerolene for the winter lubrication of your car.

STANDARD OIL COMPANY (California)

Zerolene No. 1, No. 3 and No. 5 are all good "cold-test" oils. If you have trouble shifting gears, use Zerolene Transmission Lubricant "B"—it remains fluid at low temperatures and permits ready shifting of gears.
