WALKED WITH CANE NOW ACTIVE AGAIN

Korex Compound Helps Old Woman Regain Her Energy.

"I hardly use my cane any more," says Pollyann Rainey of Pueblo, Kentucky, "and because of using korex compound will soon be able to lay my cane aside altogether. I feel 15 years younger. Talk about vitality—I now have plenty and to spare. Anything that will help a person like me would help almost anybody else."

Weak and tired-out women and men are praising the marvelous invigorating effects quickly experienced after taking korex compound. Many say the benefits are permanent and lasting. Sufferers from muscular pains, stiff joints, lack of appetite, lessened vigor and early old age will be interested in learning that the American distributors of korex compound have arranged for korex compound to be sold in Ashland at East Side Pharmacy.

HAVE KIDNEYS EXAMINED BY YOUR DOCTOR

Take Salts to Wash Kidneys if Back Pains or Bladder Bothers.

Flush your kidneys by drinking a quart of water each day, also take salts occasionally, says a noted authority, who tells us that too much rich food forms acids which almost paralyze the kidneys in their efforts to expel it from the blood. They become sluggish and weaken; then you may suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sour, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To help neutralize these irritating acids, to help cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days, and your kidneys may then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help flush and stimulate sluggish kidneys; also to neutralize the acids in the system so they no longer irritate, thus often relieving bladder weakness. Jad Salts is inexpensive; can not injure and makes a delightful effervescent lithia-water drink. By all means have your physician examine your kidneys at least twice a year.

For a smooth shave, and quick service, go to the Shell Barber Shop, across from Depot. Grinding of all kinds Children's work a specialty.

BANKERS' VIEWS ON CO- OPERATIVE MARKETING

The attitude of the American Bankers Association on co-operative marketing favors proper organization to facilitate the orderly movement of farm products, but holds that the co-operatives are amenable to economic laws as any form of business and cannot be used to gain special benefits for the farmer contrary to the influences of supply and demand and other normal factors. This view was formulated recently by Frank W. Simmonds of the Association before the National Council of Farmers' Co-operative and Marketing Associations at Washington.

"It would be unfortunate for the farmer if he becomes imbued with the idea that co-operative marketing in itself is a panacea for all agricultural ills," Mr. Simmonds said. "Co-operative marketing, well organized and wisely managed, can be most helpful in solving market problems. It may prevent untimely dumping, it may secure better credit facilities, it may extend existing markets, but obviously its operations will be as amenable to economic law as those of other business enterprises."

What It Cannot Do—Co-operative marketing cannot prevent other countries with cheaper land and labor from selling in foreign markets at a price unattractive to us. It cannot successfully override the law of supply and demand or maintain for any length of time an artificially high price by withholding a product from market or unduly limiting production. Sane, orderly marketing must be accompanied by sane, orderly thinking.

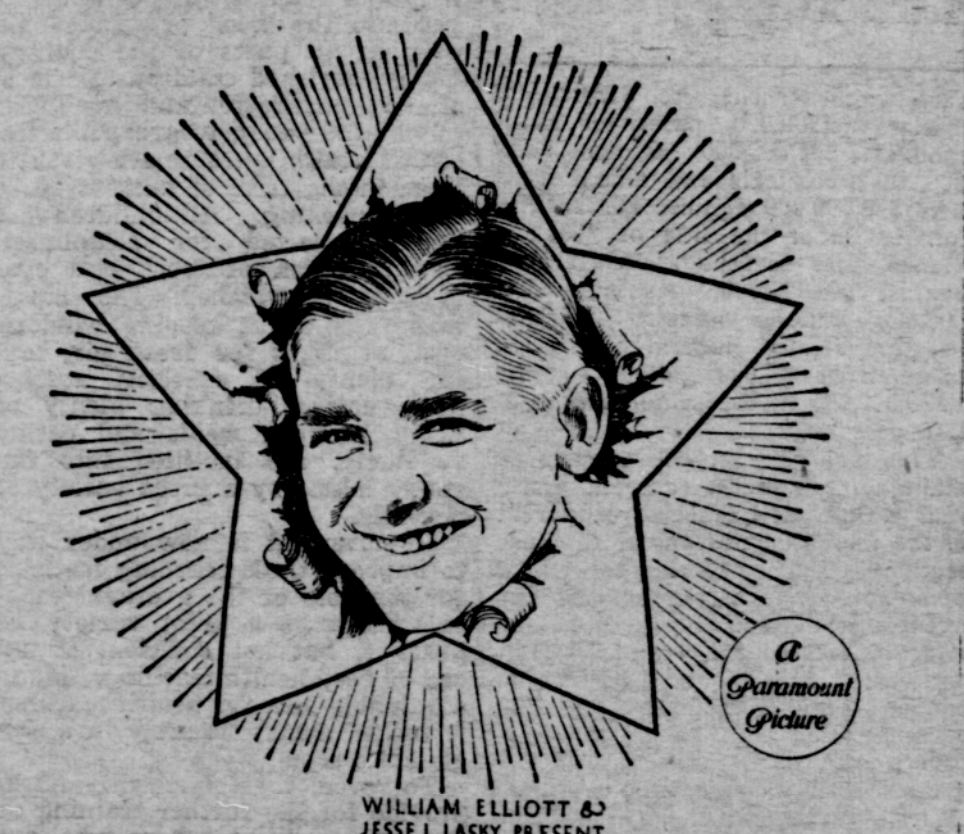

"We may wisely take a leaf from Danish experience and emphasize efficient, economical, maximum production of standard grade products, for however important co-operative marketing may be in reducing the exigencies of the present time, it is only one link in the chain of agricultural problems."

The American Bankers Association, Mr. Simmonds said, believes that solutions of farm problems should be sought through private enterprise and not through government aid, and approves the endeavors of farmers for orderly marketing.

"No, my dear, don't feel that way," said Aunt Emmy. "It's all a matter of care and knowledge of conditions. Even if you don't know about them yourself, you can protect yourself by taking the advice of your bankers. Don't trust too much to your own judgment."

PERIOD OF USEFULNESS NOW STEADILY INCREASING

By S. W. STRAUS,
President American Society for Thrift.

IT IS good thrift not only to make the most of one's time, but to stretch one's years of useful activity to the greatest possible span.

Undoubtedly the popular viewpoint on longevity is changing. The average man is not considered "through" at as early an age as was the case two or three generations ago.

Most of the generals in the Civil War were under 45. In the World War the British generals averaged 53.9 years of age. The French average was 60.5 years.

The average age of those who sat at the Peace Conference in Paris in 1919 was 63.

One of New York's active financiers today was an adviser of Abraham Lincoln. A great and useful industrial leader in this country is midway between 70 and 80. An active and honored leader of organized labor is four years beyond the allotted three score and ten.

One of the most profound members of the legal profession in America is nearing 80. Our greatest inventor is several years beyond his 70th milestone. An active, forceful leader in educational thought is nearing ninety.

A New York newspaper recently gave the average age of its working staff as 47, with six members between 60 and 70 and three past 70. One was still doing his day's work at 79. Yet journalism is popularly considered a young man's profession.

One might travel every walk of life and find those at their places of duty who are beyond the Biblical limitation.

The recent death of President Wilson was universally regarded as untimely—the result of abnormal responsibilities during the War rather than the natural wearing out of the machine.

It is an inspiring thought that we are learning more and more to give a just appraisal to the values that come only from long experience. And as these valuations come time to find their rightful levels, the universal incentive to prolong one's years of useful activity is correspondingly stimulated.

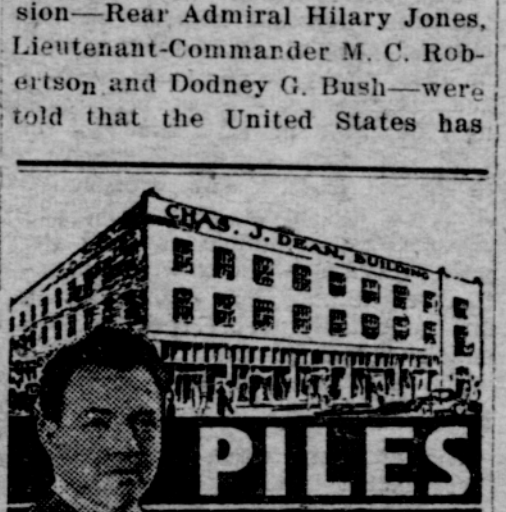

Each year that can be added to the period of usefulness to one's self and to others increases the sum total of human happiness and accomplishment.

NEWS LETTER

DENVER, May 28.—Colorado's "oil boom" has received an added impetus from an extensive survey undertaken to ascertain the petroleum possibilities by J. D. Sears, administrative geologist of the U. S. Geological Survey.

The survey is one of the most important ever undertaken in the West. Structures will be mapped, areas defined, and an effort made to establish the sand depths of potential oil wells.

A recent discussion of the probable oil supply in the United States has led to investigation of oil shale lands in Colorado. A commission appointed by President Coolidge has already visited several Western States in its search for a future oil supply. While here the members of the commission—Rear Admiral Hilary Jones, Lieutenant-Commander M. C. Robertson and Rodney G. Bush—were told that the United States has

NOTICE

FOR SUBSCRIBERS TO NEGOTIABLE INTEREST BEARING WARRANTS, to be issued by the School Board of District No. 94.

Pursuant to the vote of the legal voters of School District No. 94, cast at a regularly convened school meeting, held on August 6, 1923, at the School House at Pinehurst, Oregon, whereby the Board of Directors of said district was authorized to contract a debt for the purpose of building and equipping two school houses in Pinehurst District, District No. 94, and to issue negotiable, interest-bearing warrants, bearing interest at 6 per cent, the Board of said School District No. 94 does hereby and herewith call for subscriptions, or bids, in writing for a loan of \$4,800.00.

Bids in writing will be received up to 5:00 o'clock of June 6, 1924, the same to be publicly opened at the school house at a board meeting held on June 9th, 1924 at one o'clock.

Each bona fide resident of this district shall have the right to subscribe once for said loan for the entire amount or any portion of the same not less than \$50, at par value.

Dated this 21st day of May, 1924, Pinehurst, Oregon.

MRS. WILHELMINA HUEN-
ERGARDT, Clerk of Pine-
hurst School Dist. 224-12

Work on the construction of Denver's new athletic stadium is expected to get under way shortly, following selection of the site in City Park. The stadium is to be of reinforced concrete, will cost approximately \$600,000 and have a seating capacity of 40,000. The city is donating the land and the massive structure will be financed through public subscription.

Peace officers of Colorado and Wyoming are experiencing much difficulty with the "auto tramp," a new species of mendicant who makes his way across country in a dilapidated automobile by begging food and gasoline en route.

Extensive preparations are under way for the first annual invitation tournament of the Denver Golf Tournament Association. It is expected between 300 and 400 golfers, including many of the crack players of the country, will participate.

SMILE DISAPPEARS FROM FACE OF FRANK TINNEY

NEW YORK, May 29.—Laughter died and the smile faded from the face of the famous stage comedian, Frank Tinney, when he was held under \$2,500 bail on the charge of feloniously attacking Imogene Wilson, 21, Follies girl, who said she was in love with Tinney, who is married, Mrs. Tinney, who threatened to divorce Tinney in 1921, but changed her mind, furnished bail for her husband.

The girl alleges that Tinney brutally beat her after she attempted to commit suicide, due to her love for him.

What the World Is Doing

As Seen by Popular Mechanics Magazine

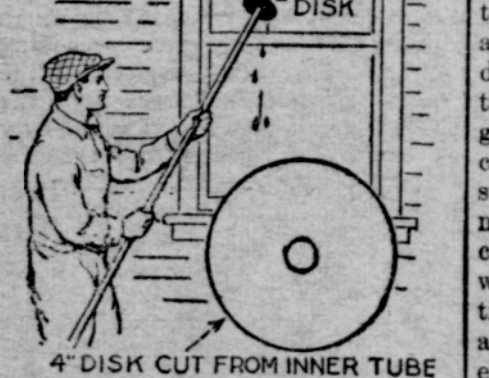

Nine Million Persons Daily Ride in City's Elevators

More than 9,000,000 passengers daily, it is estimated, are carried by the elevators in New York City. This number exceeds the number of riders on the street railways, subways, and electric lines, it is said. In many large buildings traffic rules and schedules are observed almost as scrupulously as those of large railroads, in order that adequate service may be rendered.

Kink for Window Washers

When washing windows the surplus water has an annoying tendency to run down the handle of the cleaner and into the sleeves or onto the clothing of the worker. This trouble may be eliminated by placing a small rubber disk on the handle, about a foot from the end, as shown in the illustration. The water will then run down only to the disk and drip off.

The disk should be about 4 in. in diameter and should be cut from soft

rubber, such as a piece of inner tube. A hole slightly smaller than the thickness of the handle is cut in the center of the disk so that it will fit the handle snugly when slipped into place.

Mexico is reported to rank first in mineral wealth among the nations of the world equal to it in area.

Ship Is Sent by Parcel Post for Use in Africa

Shipbuilding has been reduced to a science so precise that it is now possible to construct vessels in such a manner that they may be taken to pieces, the parts shipped, and finally reassembled into a seaworthy craft at the destination. Each part is numbered and ticketed, and full instructions accompany it, a vital necessity, as the engineer is often compelled to make use of native labor, which always must be under his eye if he is to secure satisfactory results. The steamship "William MacKinnon," the first to be launched on Lake Nyanya, Central Africa, reached Mombasa by parcel post from England. Then the parts were transported through 600 miles of jungle to the lake, on the heads of 5,000 Kaffir porters. The boilers were dragged by oxen.

Sparrows Defy Gas "Attack" in War on Bird Pests

Resisting the fumes of mustard gas, and other deadly chemicals in quantities that would have proved fatal to a human being, English sparrows and domestic pigeons survived gas "attacks" in recent tests conducted by the government to find a way to rid the country of various bird pests. The subjects were placed in tight compartments, so arranged that the observers could watch their actions. The gas was administered in varying quantities. Amounts that would have killed a soldier caused the specimens to evince little agitation, and they recovered when taken into fresh air. In all six varieties of gas were tried but without the desired effect. The experiments emphasized the difficulties encountered in ridding the country of the English sparrow in particular.

One-third of the silk used in the United States is said to be artificial.

Muffling the Alarm Clock

It is sometimes desirable to muffle the alarm clock so that it awakens the sleeper without disturbing those in adjacent rooms. A stout rubber band will be found very useful for this purpose. It is snapped around the clock and over the bell as shown, whether the bell is located on top or on the back, and muffles the sound most effectively.

High-Speed Telegraph Takes Thousand Words a Minute

Telegraphic messages at the rate of 1,000 words a minute have been received on a revolving, magnetic-drum instrument on display at a recent exhibit of the British Imperial College of Science and Technology. The current, passing through coils, converts a rapidly revolving iron drum into a magnet for a brief space, attracting a syphon tube charged with ink. The dots and dashes are recorded on the paper tape as the drum flies past. Wireless apparatus that could receive 300 words a minute was also displayed.

Cleaning the Coffee Percolator

Coffee percolators occasionally become clogged and all efforts to open up the fine holes by rubbing and washing are usually futile. A good method of doing the work is to hold the percolator in a gas flame for a few minutes and then tap it lightly. This will open all the holes at once. Obviously, this is much better than attempting to prick the holes open with a needle.
