WHAT CONSTITUTES ADVERTISING

All future events, where an admission charge is made or a collection taken in Advertising. No discount will be allowed Religious or Benevolent orders.

DONATIONS

No donations to charities or otherwise will be made in advertising or job printing—our contributions will be in cash.

JUNE 19

HE THAT WILL LOVE LIFE, AND SEE GOOD DAYS, LET HIM REFRAIN HIS TONGUE FROM EVIL, AND HIS LIPS THAT THEY SPEAK NO GUILE.—1 Peter 3:10.

THE FIRE DEMON

Reports are coming in daily of the destruction of homes, business structures, sawmills and factories, thousands of acres of virgin timber, and entire towns and cities by the fire demon. Despite the campaign of education that has been carried on during recent years property valued at millions has been destroyed within recent weeks on the Pacific coast and unless frequent rains occur the year bids fair to prove a record breaker. The condition reminds us that fire is the most thorough destructive agent with which we have to deal in a material way and the situation should constitute a warning to all to use every precaution to prevent additional loss.

The campaign by fire prevention bureaus and other agencies has not been in vain, but the results would have been far more reaching had the rank and file of our citizens given due heed to their admonitions and carried out the suggestions to lessen the hazard of fire. Nearly all fires are preventable, and once the public comes to the realization of this and acts as becomes intelligent people, then and only then will there be any appreciable reduction in the tremendous loss sustained through that agency.

Authorities tell us that we are annually cutting and burning five times as much timber as we are growing, which means that unless there is a sudden reversal in our methods of preventing forest fires and in reforestation that soon we will be a nation without timber. The situation, when considered seriously, is shocking and it is high time that the general public awake to the necessity of practicing fire prevention. The need for precaution is no greater with respect to our forests than with our homes, our business blocks, and our manufacturing plants. The economic loss is shameful, and there is yet to be added the hundreds of lives that are sacrificed annually on the funeral pyre.

It is within our power to curb the fire demon, and with but little effort other than exercising common sense precaution. Exercise care with matches, lighted cigarettes and cigars, inspect your premises, particularly your roofs, at regular intervals; eliminate trash piles and waste paper; get rid of dry grass around your property; keep your premises clean; don't fool with gasoline and coal oil and the fire fiend will be reduced to a weakling. Having the power to drive back the fire demon, and neglecting to use it, is shameful and little less than criminal negligence.

THE GOVERNMENT SURPLUS AND POSTAL EMPLOYEES

When President Coolidge vetoed the bill giving the postal employees only a part of the increase to which they were justly entitled, he asserted he had reached his decision because of the lack of funds in the treasury where-with to make the payments.

Apparently, the president had not consulted with Director General of the Budget Lord before completing his veto message.

For that official has just come forward with the statement that the surplus for the present fiscal year will be \$400,000,000 on July 1st, and may even run into larger figures.

According to the president, the total of the pay increases voted for the postal workers amounted to \$68,000,000. These figures were probably above, rather than below, what actually would have been necessary, for the president naturally was desirous of making his position as strong as possible.

But even that would have taken less than one-sixth of the surplus, a small percentage in view of the fact that at the present time Uncle Sam is treating this loyal body of his employees in a way which no enlightened or decent employer would consider for a minute.

The figures will reinforce their feeling that they have been made the victims of short-sighted and indefensible use of the executive authority.—Sacramento Bee.

PROGRESS ON A BIG SCALE

An illustration of the ambitious way in which some communities are taking hold of their problems is given at Dayton, Ohio. A ten years prosperity program has been laid out by the chamber of commerce. This plan undertakes to consider Dayton's present and future needs for the next 50 years, and it calls for eventual municipal, county, and railroad expenditures of \$50,000,000, with outlay by private capital of \$150,000,000 or more. The voters will pass on this project at an election next year.

Opinions differ on how far it pays a city to plan ahead. But most cities suffer great losses as the result of a failure to anticipate and prepare for their needs at the times when the same can be attended to at least expense.

Politicians will witness the engagement between Al Smith and Wm. McAdoo with no more interest than those

interested in the enforcement and perpetuation of prohibition. They represent the two extremes with the New York governor opposed to the law. For this reason, if no other, W. J. Bryan will go to bat for McAdoo.

The completion of the new hotel will prove a stepping stone for more and greater achievements in Ashland. The successful culmination of that project will give us a momentum that will be all but irresistible.

The Oregon State Bankers Association recently adjourned without designating the place for the next annual meeting. There is no good reason why Ashland should not be selected.

In the light of recent events at the state penitentiary it is a safe bet to wager that had Johnstone Smith continued as warden that the population of that institution would have been reduced to a mere nothing by this time.

Perhaps the thought has not occurred to you, but what is to become of the hair pin factories. It is all the more serious when we recall that there is no longer the demand for safety pins that once existed.

If the members of the fair sex keep cutting it shorter they will have to adopt a new means of attack when engaging in personal combat with one of their kind.

Our Newest Princess Rides to Her Wedding in Old Carriage

NEW YORK, June 19—America has a new princess. She formerly was Miss Eleanor Margaret Green, prominent in New York society, who married his royal highness, Prince Viggo Christian Adolph Georg, of Denmark. There was no royal coach to carry the pair to Calvary Church, but a famous old coach, belonging to the Ogden Hewitt family, was resurrected from its storage place, dusted off, and pressed into service for this part of the function, giving it an old world flare in modern New York. The couple now are on their honeymoon. They plan to sail for England shortly. Miss Green has the rank of Her Highness Princess Viggo of Denmark, Countess of Rosenborg. The Prince will drop the Royal Highness, according to the custom of the Danish court. His bride is not of royal birth, and he by such a marriage renounces any chances of succession to the Danish throne, which in any case would be remote. The Prince will be known as His Highness Prince Viggo of Denmark, Count of Rosenborg. The second title is one of the oldest in the royal Danish family.

NEWS LETTER

PHILADELPHIA, June 19.—

Upon the broad shoulders of four stalwart Americans will rest the task of defending the supremacy of the United States on the polo field when England's quartet invades this country in the Fall for a series of international matches.

The four players who will carry the burden of the cup defense play have not been selected. The best pony poloists in the country are taking part in international trial games in the East to give the committee in charge a chance to pick the most likely looking men.

Four matches were played here in which stars of former years battled against rising youngsters who are fast making names for themselves in the polo world.

Devereux Milburn, probably the greatest player of all time, here or abroad, took part in some of the games. There were rumors early in the season, as is always the case in every branch of sports that "the old order" had changed and that the veteran of twenty-five years experience was showing up.

None who watched him, as he made spectacular play after play, thought he was slipping backward. In one contest his Meadow Brook team, having given one point to the Orange County quarter through handicap, was in need of one goal to tie the score, with only a minute to play in the last chukker. A foul was called on one of the lads who wore the Orange blouse. It was then that Milburn showed his old steadiness, as his pony trotting back beyond midfield, he squared away and smashed the willow-pith sphere through four opponents and between the uprights from the fifty-yard mark.

In the last few years pony polo has gained much headway in the Eastern States, and it is rapidly working its way Westward, where some day it may be as popular as it is along the Atlantic seaboard. Colleges are rapidly taking it

up and making it one of the major sports. At the present time Penn. Princeton, Cornell, Yale and other universities, as well as many "prep" schools, have pony polo teams. These players, after

Timely Facts for the Home Owner

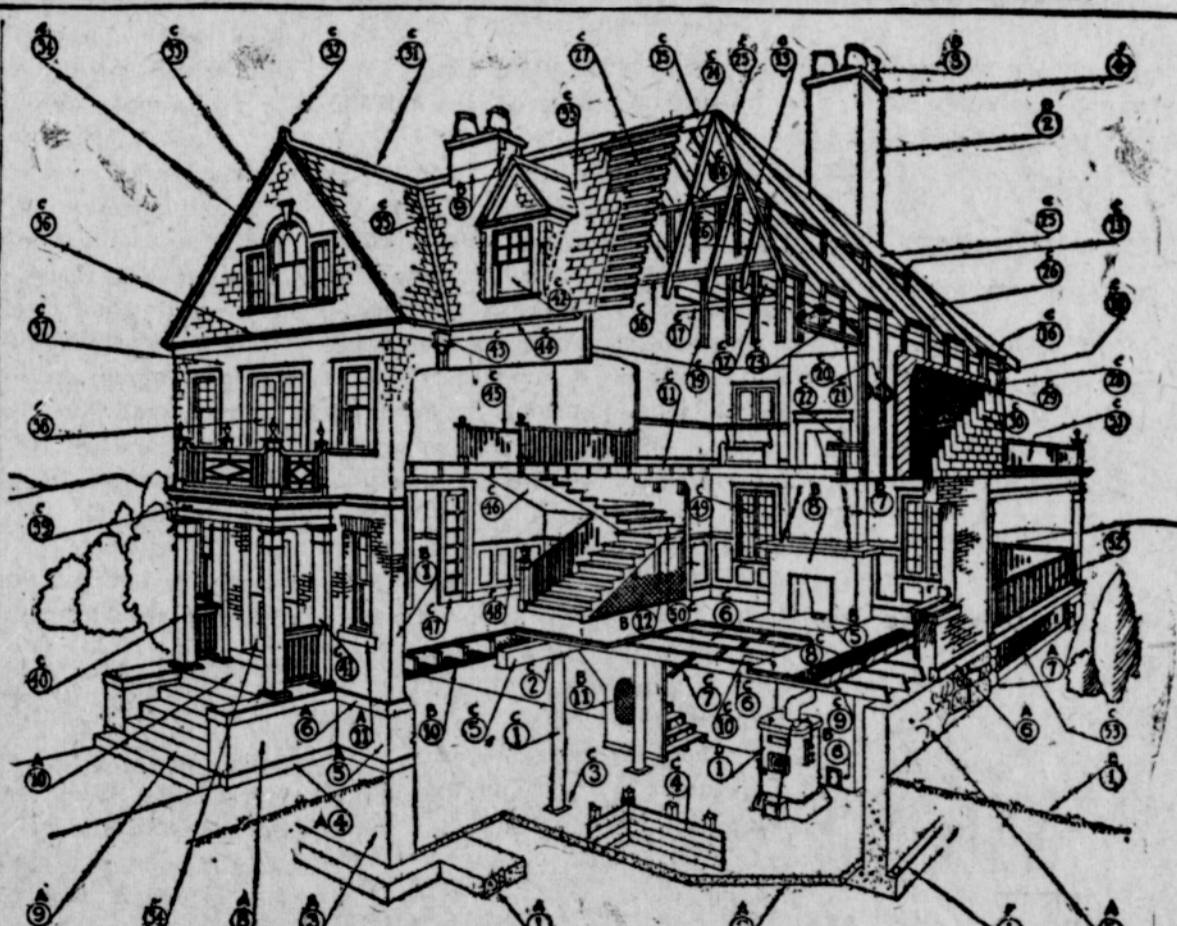

BUILD YOUR HOUSE RIGHT AND SAVE ON THE UPKEEP

ARCHITECTS

and builders all over the country are now urging more than ever before that the family about to build a home give special attention in the beginning to the use of materials that are not only attractive but durable as well. A new house built with roof, flashings, gutters and plumbing that cannot withstand the inroads of rust looks just as well in the beginning in its bright new paint but in a few years it must be rebuilt, part by part, to save it from utter destruction. When built with the counsel of experts who know how, and of materials that time and the elements cannot effect, it is permanent—really a home. Here is the usual way each dollar spent in building a house is utilized:

- 36.1 cents for Masonry
- 29.1 cents for Carpentry
- 8.7 cents for Painting
- 6.8 cents for Heating
- 6.0 cents for Electrical work
- 6.0 cents for Plumbing
- 3.5 cents for Sheet Metal Work
- 2.9 cents for Roofing
- 1.2 cents for Hardware

100.0 cents = 1 Dollar. Arrange with the architect or builder exactly what you want before you begin, then there will be no heartburns over the added cost of extras. And when your architect specifies copper flashings and leaders and brass plumbing pipe and hardware etc., remember that he is trying to build a home that will resist the elements and will not rust out and have to be rebuilt in a few years. It matters less what type you

- 13-Purlin, 14-Collar Beams, 15-Ridge Rafter, 16-Plate, 17-Ledger Board, 18-Corner Post, 19-Studding, 20-Bridging, 21-Rough Head, 22-Rough Sill, 23-Truss over opening, 24-Rafter, 25-Rip Rafter, 26-Jack Rafter, 27-Shingle Lath, 28-Diagonal Sheathing, 29-Sheathing Paper, 30-Shingle, 31-Ridge Board, 32-Final, 33-Rake Cornice, 34-Gable End, 35-Valley, 36-Eaves Course, 37-Second Story
- 38-French Window, 39-Porch Cornice, 40-Porch Column, 41-Plaster Window, 42-Dormer Window, 43-Leader Head and Leader (or Down-sput), 44-Gutter, 45-Balustrade, 46-Stair Soffit, 47-Sliding Doors, 48-Wainscoting, 49-Casement Window, 50-Platform, 51-Deck Roof (Balcony), 52-Veranda, 53-Lattice, 54-Dutch Door, 55-Boiler, 56-Grade, 57-Drain

choose—Colonial, English, Callinorian, or Dutch Colonial—than it does that you have a good foundation under it, well designed and well built woodwork inside, and that its roof and gutters and lead-

their college experience, develop into possible international stars—so polo cannot very well die out with a fresh crop of players being developed constantly.

There will be four or five matches played between the English invaders and the American defenders who captured the international cup two years ago. The opening matches will be held the first week in September on the Meadow Brook field here.

On the defense committee, which will select the players, are Harry Payne Whitney, Lewis Stoddard, Milburn, Major Robert E. Strawbridge and W. A. Herriman. The line-up will probably be announced some time in August.

Some of the players have their peculiarities. Just as Ty Cobb always touches second base as he comes in from outfield and as Eddie Collins used to scatter all of the bats in front of the dugout before he went to bat when runs were needed, Malcolm Stevenson, rated close to Milburn as a player, always throws his helmet to the end of each chukker. He lets someone hand it to him as play is resumed.

U. P. ANNOUNCES CHANGE IN PASSENGER SCHEDULES

PORTLAND, Ore., June 20.—Effective on Sunday, passenger schedules on the Union Pacific Railway lines in Oregon and Washington will undergo a number of minor changes.

Portland-Spokane Limited No. 12 will leave Portland at 7:55 P. M. instead of 8:15 P. M. and will arrive at Spokane at 6:55 A. M. instead of 7:15 A. M. The Portland-Pendleton-Walla Walla local will leave Portland at 8 A. M. instead of 7:45 A. M. and will arrive at Pendleton and Walla Walla at the same times as present. Returning, the local will leave Walla Walla 15 minutes later than at present and arrive in Portland on the same time as at present.

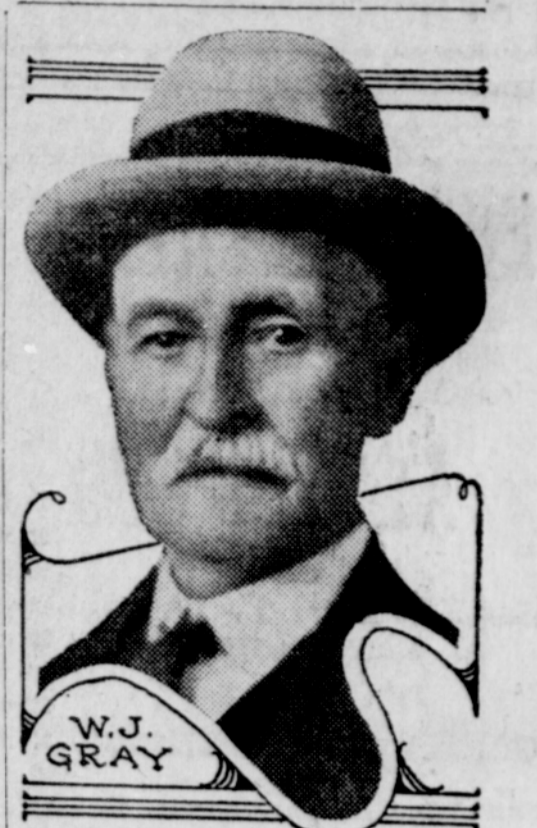

Several changes will be made in schedules between Pendleton and Spokane and Pendleton and Walla Walla.

Hood River—Paving of State street completed.

Hood River—Work under way on third section of market road for West side.

WOULD BE DODGING HIS DUTY TO KEEP SILENT

"Uncle Billy" Gray Feels It His Duty To Tell How Tanlac Helped Him.

W. J. (Uncle Billy) Gray, of Arkansas City, Kans., is another man of wide popularity to declare himself squarely on the side of Tanlac.

"Uncle Billy" has lived in Arkansas City more than half a century and has an unbroken record of 47 years as constable, which makes him the oldest peace officer in point of service in the state.

"I feel that I would be dodging my duty to suffering humanity," said "Uncle Billy." "If I did not let it be known that a wonderful medicine I have found in Tanlac. I had been taking everything and getting nowhere, but my very first bottle of Tanlac had me well on the road to good health.

"Two years of stomach and intestinal troubles had me so weak and exhausted that I could hardly move about. In fact, I was all out of fix, suffering day and night, and felt that I was about done for.

"Tanlac arrested my troubles, halted my downward course and

then my energy and strength returned like a tidal wave, so to speak. Since then, two years ago now, the occasional use of Tanlac has kept me in good trim. Tanlac is certainly without an equal in the world."

Tanlac is for sale by all good druggists. Accept no substitute. Over 40 million bottles sold.
