ASHLAND, OREGON, THURSDAY, AUGUST 21, 1924

NO. 300

Governor Pierce Revokes Closed Season Order

FORESTS OPEN IN OREGON TO DEER HUNTERS

Executive Acts on Advice of State Forestry Department
RAIN LESSENS HAZARD
Heavy Showers Responsible for Revocation of Order; News Welcomed.

Oregon sportsmen, both those who live in anticipation and realization of the annual open deer season, were greeted today with the announcement that Governor Pierce had revoked his proclamation closing the forests of the state to deer hunting until September 20.

The first word of the governor's action came in a telegram to Roy Parr, deputy game warden, from A. E. Burghdoff, state game warden, and said:

"Governor Pierce today revoked the proclamation closing the deer hunting season and it is now lawful to hunt and kill deer in all counties in game district No. 1 until October 20, and in game district No. 2 from September 1, until October 21, except in Walla and Union counties, where the open season runs from October 10 to November 10."

Tidings Receives Message
Additional news that the hunting season had been opened today by the state's chief executive was received in an International News dispatch to the Tidings at noon today. It follows:

"Salem, August 20—Oregon's forests have been opened to hunting in accordance with the provisions of the law. Governor Pierce revoked the proclamation closing hunting until September 20.

"Acting on the advice of the State Forestry department, the governor announced the removal of the ban, advising that rains of the past few days had been sufficient to break the forest fire hazard.

"The season would have been opened by statute yesterday except for the imposition of the ban, which the governor lifted today."

News Welcomed
News of the revocation of the governor's ban was hailed with delight by the sportsmen of Ashland and in all districts of the state. Since the heavy rains of the fore part of the week there has been a disposition to believe the governor would remove the ban, which was invoked because of the forest fire situation.

Hunters are unanimous in declaring that the rains will bring about excellent hunting and many are predicting that they will get the bag limit of two before the close of the season.

HERBERT HOOVER SACRAMENTO GUEST
SACRAMENTO, Aug. 21.—Herbert C. Hoover, secretary of commerce, who arrived in Sacramento yesterday afternoon, spent part of today in a tour of the Natomas district, in which he is greatly interested. He was the guest of Lester J. Hindsale, local attorney and classmate of Hoover at Stanford University, on the tour.

Upon returning from the trip, Hoover held an informal reception in Hindsale's office. This afternoon he will address a joint meeting of the luncheon and civic clubs of the city at the chamber of commerce. Plans were arranged for 400 guests.

MAN LEAVES DEAD INFANT ON TRAIN
SPOKANE, Wash., Aug. 21.—Officers here today were searching for a man about 45, dressed as a laborer, who left the dead body of an infant girl in an Oregon-Washington railroad train Sunday night when he got off at Tekoa. The request that a search be made here was received from Sheriff Coloe of Whitman county, who said that the body of the infant was wrapped in a gunny sack and discovered by members of the train crew who brought it back to Tekoa.

RESTAURANT SERVES HAM AND OSTRICH EGGS
LOS ANGELES, Aug. 21.—"Ham and eggs — and make it ostrich eggs." When Richard F. Hodgins, Kansas City business man, gave this order to a Los Angeles hotel he took the waiter by surprise, but the hotel manager dispatched messengers to a nearby ostrich farm and soon Mr. Hodgins was enjoying his favorite fruit.

A cleaver was used to open the ostrich egg, which was large enough for Mr. Hodgins and a breakfast party of five friends.

STATE SPEED COPS BUSY DURING JULY
315 Arrests Made; Fines Total \$5,429 as Result of Vigilance of Officers

SALEM, Aug. 21.—Fines aggregating \$5,429 were imposed by the courts as a result of the activities of the state traffic officers during July, according to a report prepared today by T. A. Raffety, in charge of the law enforcement bureau of the state motor vehicle department.

Delinquent fees sent into the state department as a result of the activities of the traffic officers totaled \$3,729, and the resale value of stolen cars recovered was \$3250. Licenses issued to foreign cars as the result of warnings issued by the traffic officers aggregated \$15,584.

There were 315 arrests reported during the month, 201 of which were for speeding. Reckless driving resulted in 22 arrests, while 10 persons were held for switch license plates.

In the state outside of Portland there were 425 accidents reported.

Approximately 130 were due to reckless driving, while 21 accidents were caused by driving on the wrong side of the street. Intoxicated drivers arrested numbered 46, as against less than half that number last month. Failure to give proper signals resulted in 27 arrests, while 19 arrests were made for the improper parking of cars.

INDIANS CELEBRATE IN SHASTA COUNTY
MONTGOMERY CREEK, Calif., Aug. 21.—This is a great week for approximately 500 Indians from Modoc and Lasser Counties and the eastern part of Shasta County. They began to arrive here Sunday, going into a camp provided for their convenience a mile east of Montgomery Creek. They spend their time in gambling and in dancing to the music of a banjo, fiddle and accordion.

Women Are Winners
The women folks have been the biggest winners at gambling. Many of the men having to retire from gambling because they have lost to the opposite sex.

SEVERAL HUNDRED HEAR BAND CONCERT
Several hundred people, many from neighboring points, attended the concert given last night by the Ashland Concert Band. The band rendered a splendid program and received many encores. Both the band and Director Loveland received a generous hand on the presentation of "Why Did I Kiss That Girl," Loveland singing the number, with the band accompanying.

Perfect weather prevailed during the evening.

WOMAN AT WALLA WALLA IS JAILED
WALLA WALLA, Aug. 21.—Kate Brown will wait for 30 days before being tried on a liquor charge on which she was arrested this week. As she was out on a suspended sentence, Judge Hedger today signed an order committing her to jail for a month on the original charge.

WIND UP IN CEMETERY
LOS ANGELES, Aug. 21.—Four joyriders ended a night tour here in a nearby cemetery. Later they paid fines when charged with intoxication.

NOT GUILTY TO BE PLEA OF FIGHTER

Attorney Denies That Insanity Will Be Used As Excuse
BODY TO NEW YORK
McCoy To Claim That Mrs. Mors Committed Suicide; Appears in Court As Wild Man

LOS ANGELES, Aug. 21.—"Kid" McCoy, held here on the charge of murdering his wealthy sweetheart, Mrs. Teresa Mors, antique shop proprietor, will plead not guilty, his chief counsel, Judge Davin, advised today in denying that he planned to have the ex-puglist plead guilty and offer as a mitigating circumstance, alleged insanity.

The basis of the defense will be McCoy's statement, "Mrs. Mors killed herself." According to Davin, one of the features of the defense will be the effect on the brain of the head punches delivered by prize fighters.

Sent to New York
The body of Mrs. Mors was today sent to New York for burial in the most expensive coffin that Albert A. Mors, her ex-husband, could find here.

When McCoy appeared in Judge Cral's court yesterday, his hair was disheveled, his eyes were gleaming wildly, and there was a scowl on his face. Then, quailing under the stern gaze of his attorneys, the "Kid" relaxed into silence and crouched in his chair while his counsel asked and received an extension of the case until Monday for pleading.

Reading Waived
Complete reading of the eight charges in the true bills returned against McCoy by the Grand Jury was waived by Defense Attorneys Davin and Knickerbocker. They stated that details of their client's plea had not been completed, and asked additional time.

Hair Disheveled
When the alleged killer appeared in court, he wore dark trousers and a blue denim shirt, the regulation outfit of the county jail. His shirt collar was turned up and he had no necktie. The little hair which still tops the "Kid's" head was matted.

When he first entered the courtroom, McCoy walked up to the bench and introduced himself to the judge.

"I am Kid McCoy," he said.

"I am Judge Cral, and I am pleased to meet you, Kid McCoy," replied the court with a smile.

After the brief court proceeding, the "Kid" was on his way back to his cell escorted by four deputy sheriffs.

DEDICATE COMMUNITY HOUSE FRIDAY NIGHT
Lithians to be in Charge of Informal Ceremonies Opening New Home to Tourists

The Grand High Fizz and Chief Effervescent of the Lithians announce that plans are all but completed for the dedication tomorrow night of the new community house erected in the tourist auto camp. The Lithians will be in charge of the exercises which are to be informal, but of such nature to dedicate the comfortable new structure to the thousands of tourists and visitors who will come into our midst during the coming years.

Music will feature the program, with the Ashland Concert Band rendering a number of selections, and it is announced that the Lithian Octette may respond with a number or two.

George A. Brisco, president of the Chamber, and Hon. E. V. Carter have been invited to make addresses and both will respond with talks appropriate to the occasion.

The Lithians announce that the ceremonies are for the benefit of all tourists and the general public and all citizens are urged to attend and inspect the beautiful and commodious new home that

ROSEBURG GIRL, 14 REPORTED MISSING
ROSEBURG, Aug. 21.—Dorothy Anderson, 14-year-old daughter of Mr. and Mrs. C. J. Anderson of Melrose, has been reported missing and was being sought tonight by Douglas county officers. Miss Anderson was last seen yesterday when she purchased clothing in a local store and said she was going to San Francisco.

TICKETS FOR KENTUCKIAN
PENDLETON, Aug. 21.—Will H. Smith, lumber man of Lexington, Ky., has sent an order and his check for four seats for the 1924 Pendleton Round-up. He declared that he will remain for the three days. This is one of the most distant orders received for tickets. Another order from far away was received today from Fishback, Wis.

REQUISITION ASKED FOR OREGON MAN
SALEM, Aug. 21.—Governor Pierce today issued a requisition looking to the return to Oregon of Arthur Benn Miller, who is wanted in Portland on a charge of non-support. Mr. Miller is under arrest in Los Angeles. John Mowry, deputy sheriff of Multnomah county has been designated by Governor Pierce as the officer to return Miller to this state.

UP-TO-THE-MINUTE BULLETINS

BOSTON JEWELER ROBBED
BOSTON, August 21—Four armed bandits today held up Frederick Ives, manager of the Carl Skinner company, robbed him of a box containing diamonds and other jewelry valued at \$150,000, and escaped. Police chased the robbers several miles, but they escaped in an automobile.

FUR SCHOONER WRECKED
SAN FRANCISCO, August 21—The fur trading schooner Aretic, owned and operated by the H. Lieves company, carriers, was crushed on August 10 by enormous ice floes and sunk immediately it was learned today. The entire crew of 20 was saved, according to a radio received by Arnold Lieves, vice-president of the firm.

GERMANY HAS AIR MAIL
STOCKHOLM, August 21—Although there is talk in the United States of abandoning the air mail service as expensive, the German government has just inaugurated a night air mail service from Berlin to this city. The first planes arrived this week, and brought early morning papers in time to read them at breakfast the same morning. The trip takes seven hours, as against a time of 28 hours for the fast train service.

LIGHTNING ENDANGERS COOLIDGE
PLYMOUTH, Vt., August 21—The President's family and the country generally is today thankful that the simple Coolidge electrical workers said today, was the only thing that prevented a lightning bolt from entering the house where Mr. Coolidge is spending his vacation. During one of the most severe electrical storms that ever visited here, a bolt struck a telephone wire fifty yards from the house. The bolt datted through the wires into a general store across the road and wrecked two telegraph sets. The president intended to pitch hay for a neighbor, Ed Blanchard, today, the weather permitting. General Dawes, vice-presidential nominee, may visit here Sunday and Monday.

FLIERS ARE MAKING 800 MILE DASH

Hopped Off From Reykjavik, Iceland at 7:15 this Morning
NO MISHAPS REPORTED
Licut. Nelson Forced to Descend But Immediately Ascends; 206 Miles Covered

REYKJAVIK, Iceland, Aug. 21.—Lieutenants Smith and Nelson, intrepid American round the world fliers, hopped off this morning on the 800 mile flight across the cold waters of the north Atlantic to Cape Farewell, Greenland. The pilots were accompanied by Lieutenant Locatelli, Italian distance aviator, who joined the Americans for the experience of the trip and the love of adventure.

The flight on which the pair of Americans and their Italian companion are winging their way today is one of the most difficult of their globe-circling trip and will test both the planes in which they are flying and the physical power of the men.

Every precaution was taken to safeguard the men, the course being closely patrolled by United States cruisers.

Lieut. Nelson Descends
A dispatch to the Tidings at 2:25 this afternoon stated Lieut. Nelson was compelled to descend a few minutes this afternoon near Skerjafjord, but ascended almost immediately and resumed the flight. Up to that hour no mishaps had occurred.

Richmond Reports
A wireless dispatch from the U. S. cruiser Richmond to Reykjavik and relayed to the United States this forenoon gave the information that the fliers had completed 206 miles of the flight in the good time of two hours and 25 minutes. The dispatch also stated that Frederickiskal, located at the southern extremity of Greenland, was the destination of the pilots.

Ice Caused Delay
Angmagssalik, on the east coast of Greenland, was scheduled as the landing place of the fliers in their hop off from Reykjavik, but after many days of waiting for the ice to break up at that point permitting safe landing, it was decided to make the long jump of 800 miles to the extreme southern part of Greenland. In fact the course followed today was the only alternative left the daring aviators.

MURDERERS TARGET OF CAUSTIC WORDS
Savage Calls Loeb and Leopold "Heartless Fiends;" Says Case Most Brutal One

CHICAGO, Aug. 21.—Grewsome details of the murder of Bobby Franks was made more dramatic today by all the bitter invective and caustic denunciation that State's Attorney Savage could summon, was laid before Judge Caverly as the State demanded the lives of Richard Loeb and Nathan Leopold, in payment for the one they took.

"Shouting and gesticulating, Savage called the defendants 'murders, fiends incarnate. The most heartless and merciless criminals in history.'"

"Dickie" and "Babe" were very sobered by Savage's harsh denunciation, and did not laugh as usual. They are wearing very long faces now, these two young intellectuals, as the State draws in vivid pictures the horror of their crime, and sketched all too realistically the penalty which the Court is asked to exact.

Likened To Anarchists
Yesterday, State's Attorney Thomas Marshall likened Leopold's attitude toward the law to the Ples case of about 35 years ago when seven anarchists set off a huge bomb on the West Side here, killing several persons. Marshall said that two of the conspirators had been hanged. He pointed out that they had believed in the same views on law which Leopold holds.

OLD PARTIES ARE BLAMED FOR ILLS
SALEM, Aug. 20.—Responsibility for the high prices and low wages that exist at the present time, corruption in governmental affairs and destructive foreign policies, was placed at the door of the republican and democratic parties in an address given here at noon today by Senator Henry Shipstead of Minnesota, who is making a tour of Oregon in the interests of Robert M. La Follette, candidate for president.

About 75 persons attended the meeting.

Myrtle Creek ships first carload ripe prunes to Chicago.

SCIENTISTS TO ATTEMPT DISCOVERY

Next 36 Hours May Solve Question of Life on Planet Mars
LOWELL HAS THEORY
Pioneer Astronomer Will Make Photographs of Planet to Be Close to Earth

SAN FRANCISCO, Aug. 21.—The age-old question as to whether life exists on Mars may be answered within the next 36 hours.

One of the most amazing attempts in the history of recorded science to tear asunder the veil of mystery separating the earth from terrestrial bodies is about to be made by eminent astronomers.

For the first time in 15 years to-morrow, August 22, will witness the approach of Mars to within 35,000,000 miles of the earth, the nearest position it has ever attained.

The enormous strides made to the development of photography during the last 15 years, since Mars was last observed, due mainly to the growth of interest in motion pictures, is the main factor which has led a half dozen noted observatories to make the epochal effort to reveal a new world of life to man.

Lick Observatory, atop Mount Hamilton, California, pioneered the way some months ago in preparing plans to photograph Mars and by comparison of the Martian photographs with pictures of far-off forests on this earth, will endeavor to say whether vegetation exists.

Lowell Observatory, in Arizona, and the Mount Wilson Observatory, in Southern California, are among the other leading Western institutions also planning on observing the planet.

FEDERALS ROUND UP SAU PAULO REBELS
Reports of Recent Revolt Were Overdrawn, Government Officials Say

SANTOS, Brazil, Aug. 21.—Federal troops in the interior of Sao Paulo State are rapidly rounding up the scattered remnants of the Brazilian revolutionary forces and soon the uprising will be only a vague memory.

Normal conditions have been restored in virtually all parts of the State following the outbreak in which more than 1,000 persons were killed.

Considerable anger was caused among Brazilian Government officials by false reports sent out by certain correspondents. Instead of being guided by the official communiques, it was charged, irresponsible writers sent out rumors of battles, with heavy losses of life.

One report was cabled to the United States that 3,000 men were killed in fighting, which, officials declare, was wholly untrue. Another false report had 600 killed in an engagement they say.

One correspondent sent a lurid story that a carload of bodies were brought to Santos and dumped in the sea. No such thing happened, according to the same source of information.

Started With Police
The revolution began as a police revolt and spread to some regiments of the Regular Army. The whole thing was confined to Sao Paulo, the great coffee-producing State.

OREGON OWEN CO. TO BUILD 5 DRY KILNS
A force of 100 men are now unloading and repairing the Pacific and Eastern railway between his city and Butte Falls and immediate construction of a battery of five kilns at their local plant, are two chief undertakings of the Owen-Oregon Lumber company at present in their southern Oregon operations, says the Medford Mail-Tribune.

The railroad will be put in first class condition for winter operations, and the dry kilns will be rushed to completion. This addition will eliminate stains in lumber.

The company recently purchased a new locomotive for logging operations and will use a fleet of high-powered caterpillar tractors with big wheels for hauling logs in the woods, instead of the stationary donkey engines. The tractors will be able to haul and handle 150,000 feet of logs a day.

BOY SCOUTS TO TAKE VACATION
Early this morning about twenty boy Scouts left in the cars of John Rigg, John Billings and Ed Stannard for their annual vacation at the Lake of the Woods. There they will spend about two weeks, hiking, fishing, swimming, rowing and doing the regular camp work and Scout tests. This camp is composed of boys from the ages of 12 to 16.

The Pioneer Boys who have been spending the past two weeks at the lake will return late this evening in company with Mr. Rigg, Billings and Stannard. Mr. Rush Henry, who is to have charge of the Boy Scouts during their vacation, left yesterday for the lake to set up the camp.

THE WEATHER
Report for past 24 hours: Maximum, 79; Minimum, 44; Set Maximum, 72.

Marshfield — Building contracts aggregating \$413,000 let during year ending July 31.

SCIENTISTS TO ATTEMPT DISCOVERY

Next 36 Hours May Solve Question of Life on Planet Mars
LOWELL HAS THEORY
Pioneer Astronomer Will Make Photographs of Planet to Be Close to Earth

SAN FRANCISCO, Aug. 21.—The age-old question as to whether life exists on Mars may be answered within the next 36 hours.

One of the most amazing attempts in the history of recorded science to tear asunder the veil of mystery separating the earth from terrestrial bodies is about to be made by eminent astronomers.

For the first time in 15 years to-morrow, August 22, will witness the approach of Mars to within 35,000,000 miles of the earth, the nearest position it has ever attained.

The enormous strides made to the development of photography during the last 15 years, since Mars was last observed, due mainly to the growth of interest in motion pictures, is the main factor which has led a half dozen noted observatories to make the epochal effort to reveal a new world of life to man.

Lick Observatory, atop Mount Hamilton, California, pioneered the way some months ago in preparing plans to photograph Mars and by comparison of the Martian photographs with pictures of far-off forests on this earth, will endeavor to say whether vegetation exists.

Lowell Observatory, in Arizona, and the Mount Wilson Observatory, in Southern California, are among the other leading Western institutions also planning on observing the planet.

OPINION DIVIDED
Science is divided in opinion today as to whether success will follow the attempt, although it is generally agreed that man is in a better position than ever before to secure hitherto unknown facts.

Although certain astronomers do not believe that Mars has water, oxygen and heat, essentials to the existence of life, the majority are of the opinion that these elements actually do exist on the Martian surface.

Professor Percival Lowell, director of Lowell Observatory, was one of the pioneers whose studies of Mars led him to believe these elements were present. His theories, published during the early part of the present century, are now widely supported.

Mars, according to noted astronomers at Lick Observatory, has definite white polar cap markings similar to the huge masses of snow and ice found around the earth's polar regions.

Because these white markings, which clearly stand out in photographs, are noticed to recede in Summer and increase in size in Winter, science believes they are composed of ice.

This is shown the sufficient presence of water and sufficient heat to melt ice.

Many observers have noticed lines of water vapor and oxygen in the planet's spectrum, although this latter point is disputed by others.

Modern photography aids astronomy because photographs can be enlarged and then studied with a microscope, enabling observers to see Mars as though it were but 50,000 miles away.

Color Filters Aid
An ingenious arrangement of color filters, which play a big part in photography, throws certain colors into more relief than others. Thus, in this instance, green, the color of living vegetation, would be emphasized in photographs.

The planet, which has been known to man from earliest antiquity because of its bright color, is but half the size of the earth, having a diameter of 4,200 miles, with a year of 687 days in length. The day and night periods there are 24 hours, 37 minutes.
