A NOON SONG There are songs for the morning and songs for the night, For sunrise and sunset, the stars and the moon; But who will give praise to the fullness of light, And sing us a song of the glory of noon? Oh, the high noon, and the clear noon, The noon with golden crest; When the sky burns, and the sun turns, With his face to the way of the west!

How swiftly he rose in the dawn of his strength; How slowly he crept as the morning were by; Ah, steep was the climbing that led him at length To the height of his throne in the blue summer sky. Oh, the long toil, and the slow toil, The toil that may not rest Till the sun looks down from his journey's crown, To the wonderful way of the west!

Then a quietness falls over meadow and hill, The wings of the wind in the forest are furled; The river runs softly, the birds are all still, And the workers are resting all over the world. Oh, the good hour, and the kind hour, The hour that calms the breast, Little inn half-way on the road of the day, Where it follows the turn to the west!

AMERICA IS READY TO LOAN MILLIONS TO GERMAN INDUSTRY

WASHINGTON, Nov. 7. — Like doctors watching over a convalescing patient, the financial physicians of the world are breathlessly checking the gold pulsebeat of Germany, awaiting a favorable sign of ultimate recovery to pour millions of dollars into that enigmatic nation, that again she may stand among the world's greatest commercial powers.

That is the substance of confidential information in the hands of the United States Government. The Vanguard of trusted agents of American bankers and investment brokers has already invaded Germany, to study the economic "Comeback" anticipated following the acceptance of the Dawes report of the successful flotation of the \$200,000,000 loan.

The United States, having subscribed \$110,000,000 of the loan, will be Germany's biggest customer as the result of the industrial development expected to come, according to Government economists. Great Britain, with her \$70,000,000 subscription, stands second as a prospective beneficiary of rehabilitated German commerce.

The \$110,000,000 subscribed by American bankers to put German currency on a gold exchange basis and to establish basic credits abroad, is the forerunner of possible hundreds of millions that will flow into the great industries of that nation as soon as her recovery becomes apparent, Federal experts asserted.

"Germany is certain to become an insistent market for American capital in years to come," said a statement issued by one Government department. "Germany must have credit to obtain the vast supply of raw materials to keep her industries going."

The greater portion of the credit granted from the United States will go to German firms now doing business with this country, either as importers or exporters. Already the potash fertilizer interest, dye and drug producers, both of which export tremendous quantities of goods to the United States, and a string of German cotton have been financed extensively in this country, it was learned.

The Government regards the first indications from Germany are favorable.

During the past year the new rentenmark has suffered little fluctuation. The German budget according to the official report, is fairly well balanced, with a small surplus in the past year. The surplus was employed to take off the market an outstanding emergency bond issue, cutting down the Government's obligation to that extent.

Officials said that they have reason to believe Germany will continue to balance her budget and strive for surplus to meet outstanding emergency obligations.

The export of \$110,000,000 capital from the United States to Germany should not only make Germany the market for heavy additional loans, but should stimulate American foreign trade, experts are dicted. It was pointed out that the actual gold does not leave the United States, but is kept here by the German "gold bank of issue," to establish

RED CROSS NURSE CORPS HAS 40,000 MEMBERS ON ROLL

WASHINGTON, Nov. 8.—The American Red Cross is prepared to extend quick and effective aid anywhere in the United States in times of epidemic, disaster, or war through the medium of a well-equipped nursing corps numbering 40,000, according to excerpts from the yearly report of the organization made public today.

The work with which the organization has engaged itself within the last year has been the conversation of life against the ravages of disease, and accidents in industry. To this end first-aid instructors and lectures were sent throughout the country disseminating information to help check and eliminate this strain upon the nation's greatest resources—its manpower.

"This corps of 40,000 qualified nurses forms a nursing reserve which is immediately available to the Government in time of epidemics, disasters, or war," the report states. "The assignment of public health nurses to communities having no other public health agencies is a part of the Red Cross program. During the year 1,000 of these nurses carried the message of health to the people in as many localities. In addition, five nurses, maintained by a fund bequeathed by Miss Jane A. Delano, war-time director of the Red Cross Nursing Service, are on duty in remote and isolated sections of the country—one on islands off the coast of Maine, one in Idaho, one in Virginia, a fourth in Alaska, and the fifth in the mountains of North Carolina.

Seek to Reduce Accidents "During the fifteen months of the war with Germany," the report continues, "125,000 persons were killed by accidents in

AMERICA, OR ONE AND ONE-HALF TIMES THE NUMBER OF BATTLE CASUALTIES SUFFERED BY AMERICAN TROOPS AT THE FRONT. THE RED CROSS IS SEEKING TO REDUCE THESE LOSSES AND OFFERS ITS COURSE IN FIRST AID TO RAILROADS, FACTORIES, MINES AND VARIOUS INDUSTRIES—TO SCHOOLS AND GROUPS OF PEOPLE EVERYWHERE.

"More than half a million railroad employees during the last ten years have been given Red Cross first-aid instruction, and the results have plainly shown its value. The experience of the Red Cross shows that the accident rate among industrial workers who receive this instruction was 75 per cent less than among the uninstructed.

"During the year 14,000 persons completed the Red Cross course in first aid, 4,000 more than in the previous year, and 146,000 were reached with demonstrations by the First Aid Car, which traveled 9,646 miles over
