PIMPLES DRIED RIGHT UP WITH SULPHUR Apply Sulphur as Told When Your Skin Breaks Out Any breaking out of the skin on face, neck, arms or body is overcome quickest by applying Mentho-Sulphur. The pimples seem to dry right up and go away, declares a noted skin specialist.

Nothing has ever been found to take the place of sulphur as a pimple remover. It is harmless and inexpensive. Just ask any druggist for a small jar of Rowles Mentho-Sulphur and use it like cold cream.

A WISH (By Samuel Rogers) Mine be a cot beside the hill; A bee-hive's hum shall soothe my ears;

A willow brook, that turns a mill With many a fall shall linger near;

The swallow, oft, beneath my thatch Shall twitter from her clay-built nest;

Off shall the pilgrim lift the latch, And share my meal, a welcome guest.

Around y ivied porch shall spring Each fragrant flower that drinks the dew;

And Lucy, at her wheel, shall sing In russet gown and apron blue.

The village church, among the trees, Where first our marriage vows were given,

With merry peals shall swell the breeze, And point with taper spire to heaven.

Wednesday, November 19. Auxiliary to the Trinity Guild will meet at Parish House.

Friday, November 21. D. A. R. will meet.

Saturday, November 22. P. E. O. meeting.

Study Club—The Ashland Study Club had a very interesting meeting at the home of Mrs. J. M. Wagner on Oak street Monday afternoon.

An excellent half-hour talk was given by Mrs. MacCracken on the lives of Davis, Secretary of Labor, Jacob Reese and Edward Bok. The subject was capably handled and of great interest.

Mrs. F. G. Swendenburg gave a review of "Intimate Portrait of Robert Louis Stevenson" which is a new book of Stevenson's life and is worth while reading. Mrs. Swendenburg's review was very interesting. The roll call for the afternoon was a quotation from Robert Louis Stevenson and many and varied were the ones given.

At the close of the afternoon Mrs. Wagner pleasantly surprised the club by serving dainty refreshments honoring the two new members, Mrs. Gordon MacCracken and Mrs. Peruzzi. It is not usually the custom of this club to serve refreshments so the afternoon at Mrs. Wagner's home was delightful in every way.

Homecoming Day—The Christian Church has planned Homecoming Day November 23. At this time all former members of the church have been in-

visited to gather here and have a reunion. A big basket dinner will be served and every member who is now present has been requested to send a message to be read before the gathering.

The committee consisting of V. Y. Hawley, Ed Hunt, Mrs. Frank Swingle, Miss May Benedict and Mrs. Ed Kilgore have been instructed to invite a former pastor to be present and have invited Rev. W. L. Mellinger, who was pastor of the Christian church here for nine years.

No answer has been received from him as yet so it is possible that he can not attend.

W. C. T. U.—The W. C. T. U. had an interesting meeting at the home of Mrs. Leavitt on Chestnut street yesterday afternoon.

A committee was appointed to send food to the Farm Home with Mrs. Lulu Howard, Alice Jillson, and Will Davis as members.

This committee will pack the fruit and see that it is sent to the home. A large amount of fruit was donated and the W. C. T. U. wishes to thank those who so kindly gave the fruit and Mr. Kaegi of the White House for keeping it there until it could be packed and sent.

Mrs. Angell was present and told of her experiences in W. C. T. U. work in Washington. She gave an excellent talk and one that will be remembered by those hearing her.

Refreshments were served by the charming hostess, Mrs. Leavitt assisted by Mrs. Jillson.

The next meeting will be at the home of Mrs. Jillson on Vista street.

RADIO SIGNALS ARE FOUND STRONGER AS TEMPERATURE DROPS

WASHINGTON, Nov. 11.—Cold waves increase the power of radio signals to more than twice their normal strength, according to studies just completed by the U. S. Bureau of Standards.

Observations were made on daylight signals from the long wave trans-Atlantic stations at New Brunswick, N. J., and Tucker, town, N. Y.

The signal strength was found to be uniform during most of the year, as was to be expected from the moderate distance of transmission, but with the coming of

the cold waves of January, 1924, the signals rose to more than twice their normal strength, experts said.

"At the same time there were deviations of many degrees in the apparent directions of the sending stations, as indicated by the radio compass, even in the forenoon, when long wave compass bearings are generally free from error," the Bureau of Standards said.

"The end of the series of cold waves in January did not at once restore transmission conditions to the uniformity of Autumn and early Winter, but left a condition of instability, which persisted through the comparatively mild cold of February and early March.

"During this time the signals frequently fluctuated, going to high values for a few hours and then returning to normal, without any obvious connection with weather conditions. After March 19 these irregularities entirely ceased, and transmission again became normal."

Observations on other long-wave stations indicated that these large variations do not occur at a distance of fifty kilometers, that they are large at 250 to 300 kilometers and are again less at 400 to 700 kilometers.

According to bureau experts, there is at present no definite explanation of this phenomenon. The cause is said to be evidently atmospheric, and the connection with the cold waves suggests that either the part of the atmosphere concerned with the signal variations lies much below the Heaviside layer—80 or 100 kilometers—or that weather phenomena are correlated with atmospheric action at much greater heights than has been hitherto supposed.

WASHINGTON, Nov. 11.—In the spectacular warfare of the United States Coast Guard against the tidal wave of liquor that has flooded the shores of the country since the prohibition amendment went into effect, sight has been almost lost of a function of this romantic arm of the naval service.

That function comprises the rendering of assistance to vessels

in distress and the saving of life and maritime property.

From end to end of the United States' 10,000 miles of coastline vessels and small boats of the Coast Guard patrol day and night watching and waiting for SOS signals of distress that they may fly to the assistance of those in trouble on the seas.

While charged with the enforcement of the Customs laws, which means that the Coast Guard has the duty of trying to stem the tide of smuggling liquors, officials of the service are much prouder of their accomplishments in life-saving work.

Other Duties Included in other duties are the following: The destruction and removal of wrecks, derelicts and other floating dangers to navigation.

Extending medical aid to American vessels engaged in deep-sea fishing.

Operating as a part of the navy in time of war, or when the President may direct.

Enforcement of laws relating to Quarantine and neutrality.

Suppression of mutinies on merchant vessels.

Enforcement of law to provide for safety of life on navigable waters during regattas and marine parades.

Protection of game and the seal and other fisheries of Alaska.

International Ice Patrol in the vicinity of the Grand Banks off Newfoundland.

President Coolidge will issue an executive order probably next

month, making an official assignment of the Coast Guard cutters to the duty of protection of navigation in December, January and February, the danger months for coastwise shipping. Annually the President makes this assignment of duty.

month, making an official assignment of the Coast Guard cutters to the duty of protection of navigation in December, January and February, the danger months for coastwise shipping. Annually the President makes this assignment of duty.
