The Enders Company
Where Your Dollar Has More Cents

The building might be used as an auxiliary school building temporarily. We are badly in need of them. It could be utilized in that way. We could put in a floor and heat it, so it could be used as a public auditorium. The city should take it over by all means." J. H. McGEE, Merchant — "The city should take it over if possible, and make it into a city auditorium."

New
value—new quality—a new line of Chevrolet models even better than ever before. Chevrolet has become the world's largest producer of automobiles with modern, 3-speed transmission by making quality cars to sell at low cost. Now this Chevrolet quality has been greatly increased.

New
chassis—with larger, stronger frame; new semi-elliptic, chrome vanadium steel springs; stronger axles, rear axle of the finest construction—hanger type with greatly strengthened gears; improved, fully enclosed dry-plate disc clutch requiring no lubrication; extra heavy brake bands; and many improvements on the powerful Chevrolet motor.

New
bodies—of even greater beauty and comfort. All models have new radiator of more beautiful design, made of non-rusting airplane metal. All closed models have new and exceptionally beautiful Fisher bodies with the new VV closed-body one-piece windshield and automatic windshield wiper.

New
finish—all models are now finished in Duco—a new finish that retains its color and lustre almost indefinitely and withstands very much harder usage. These are but a few of the quality features of the new Chevrolet—quality features that you would expect to find only on cars of much higher price.
