DISPLAY ADVERTISING RATES. Single insertion, per inch \$.30, One insertion a week .27 1/2, Two insertions a week .25, Daily insertion .20

WHAT CONSTITUTES ADVERTISING. All future events, where an admission charge is made or a collection taken in advertising.

DONATIONS. No donations to charities or otherwise will be made in advertising or job printing—our contributions will be in cash.

THE LORD is the portion of mine inheritance and of my cup; thou maintainest my lot.

OFFICERS McNABB, McMAHON, CRONEMILLER, FORNCROOK, PARR AND CLAUSE:

Dear Boys: It certainly warmed your Auntie's heart to see you youngsters working together Thursday night following the robbery of the Union Oil station here.

Southern Oregon, or at least this section of Southern Oregon, certainly has as an efficient a set of officers as any part of the country can boast.

Ashland is just a few miles too far north to be annexed by Los Angeles, but some of the boosters of the City of Angels attempted a little annexation of their own.

Yours for co-operation, AUNTIE ASHLAND.

MR. FRANK JORDAN,

President, Park Commission: Dear Frank:

I am addressing this to you, for since you are the head of your civic organization, you can pass it on to the rest of the fellows, each of whom is equally deserving of all the praise we, the citizens of Ashland, can give you.

Taking time from your own affairs, you have given this time to the running of one of the city's projects, and that you have run it well is shown in your annual report.

I understand you contemplate extensive improvements to be completed during the coming year. And in that you are absolutely correct. You know California has gotten over her little spell of hoof and mouth disease, and thousands of tourists will come over the mountains out of the Golden State, who were last year either barred or frightened away from California.

Yours for an even better park, AUNTIE ASHLAND.

PROFESSOR IRVING E. VINING

President, Oregon State Chamber of Commerce: Dear Professor:

Congratulations. First you carried the doctrine of Oregon into the East, and made those conservative boys sit up and take notice. Now you have started a little campaign all your own to let the whole Pacific Coast know that Oregon is just about the finest part of this great section.

Oregon is indeed lucky to have such an able representative as you certainly are, to carry out her campaigns for betterment and to preach the doctrine of the West. Your work is invaluable in building up this state, the richest in the country in natural resources and the best place on the face of the earth in which to live.

Sincerely, AUNTIE ASHLAND.

MR. JOSEPH McMAHON

State Traffic Officer: Dear Joe:

Notice you have been knocking the boys off for speeding, reckless driving, driving without a license and for other violations of the traffic laws, per usual. Also, you have been after the stage operators for allowing their stages to be driven when in bad shape.

Most stage operators realize the seriousness of their duty, and the damage which might be done through their carelessness. A few either do not know, or do not care what becomes of their passengers, and it is these few who are in need of your services.

Sincerely yours, AUNTIE ASHLAND.

U S SUPPLANTS BRITISH CAPITAL IN AUSTRALIA

LONDON, Jan. 23. — Unless Great Britain turns her attention to the needs of Australia she may find that American capital and interests have taken the lead there.

Sir Hugh Dennison, of New South Wales, has gently intimated this to English capitalists.

"Money and man-power—those are the two things required by Australia at present," said Sir Hugh. "Great Britain has both."

"There appears to be an impression that Australia is over-borrowing, and is an improvident community. To show how fallacious this idea is, I might mention that the total borrowings of the six Australian States up to June, 1924, amounted to \$551,000,000, and of this sum only \$309,000,000 was obtained abroad.

"Why do not some of the great English steel manufacturers establish works in Australia, where the raw material is already at hand? Thus they would prevent a large proportion of the steel supplies required being purchased in the United States, Germany and Belgium, as otherwise will be inevitable.

"Why should not the English manufacturers, also, combine and establish cotton mills in Australia? One American firm has set up spinning mills in New South Wales. As Australia takes \$11,000,000 worth of cotton goods from Britain, surely this trade is worth keeping."

The complaint which Sir Hugh makes is echoed from many other Dominion quarters. There seems to be reason to believe that British capital is not finding its way into the Dominions, and that the Dominions are not at all satisfied with the treatment they receive from the financiers of the mother land.

ARMY PLANNING PACIFIC FLIGHT FOR THIS YEAR

WASHINGTON, Jan. 23. — While 1924 witnessed the first aerial circumnavigation of the globe, the present year is destined to witness the complete linking by air of America with Europe, South America and Asia.

An imposing list of aerial conquests is planned by the Air Service further to demonstrate that the wonders of yesterday are but the matter-of-fact occurrences of today.

"Present-day planes," said General Mitchell, "can fly across the Atlantic in from twenty to twenty-five hours. It is possible to do it in eighteen hours, if conditions are favorable."

"The present year will witness a number of attempts to demonstrate that flying across the Atlantic is as simple as flying across portions of the American continent."

General Mitchell characterized the San Francisco-Honolulu flight, which has long been a dream of younger army aviators, as not being particularly difficult.

"We have the ships to make almost any sort of a flight nowadays. Mechanical knowledge is far advanced beyond that of war days, when the airplane was developed from a toy to a machine capable of flying faster than man believed possible," said General Mitchell.

"Such flights are of inestimable value to civilization. The day is coming, in a very few years, when larger passenger and freight-carrying planes will fly on regular schedule between New York and Buenos Aires and Rio de Janeiro," General Mitchell declared.

"South America's development is linked by geographical lines with North America. There recent rapid development has hastened the day when speedy transportation between the two great continents will be essential to economic progress."

Farmers Want Help From State for All Frozen Up Crops

SALEM, Jan. 23. — Sponsored by the entire Eastern Oregon delegation, a bill was introduced into the Senate today providing for an appropriation of \$250,000 to be used by the State Board of Control in affording relief to farmers whose crops were destroyed by the recent freezing.

Representative Shelton of Baker sponsored a house joint resolution providing no poll tax to be levied in Oregon and no income tax to be levied until January, 1950 and the legislative assembly shall not declare any emergency in any act regulation tax exemption.

ARTIFICIAL SUNS TO FIGHT PLAGUE IN LONDON SLUMS

LONDON, Jan. 23. — Bermondsey, one of London's poorest districts is calling in the aid of artificial sunlight to assist in the fight against disease and death.

The Bermondsey Solarium, as the new hospital is to be called, will follow out the Swiss plan of treatment for diseases like consumption. Dr. Rollier, in Switzerland, has been curing apparently hopeless cases of consumption by exposing his patients to the blazing sun and the high air of the Alps.

Each "sun" is a large arc lamp, which sheds a golden, glowing warmth. To the healing rays of these artificial suns the patients will be constantly exposed.

The discovery of his treatment originated in an experiment by Dr. Rollier, in which he found that tubercle bacilli, when placed on a glass slide, died in two minutes in sunshine. This led to his sunlight treatment for disease.

NIGHT COUGH QUICKLY RELIEVED

This is the substance of a letter received from H. W. Webb, Quincy, Ill. "I coughed a great deal, especially at night. Tried almost everything and have found nothing to equal FOLEY'S HONEY AND TAR COMPOUND. One dose relieved my cough, and I rested well all night."

NEW LAMP BURNS 94% AIR

Beats Electric or Gas

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps.

The inventor, V. M. Johnson, 161 North Union Ave., Portland, Ore., is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it.

Plan to Protect U. S. from Foreign Disease

ROCHESTER, N. Y., Jan. 23. — Plans for co-operating with the Federal Horticultural Board to prevent entrance into the United States of foreign soil or sand on the roots of imported nursery stock will be taken up by the American Association of Nurserymen in Rochester at its annual convention next June.

One hundred and twenty west coast sawmills for week ending September 13, manufactured 94,021,810 feet of lumber; sold 101,952,325 feet; and shipped 94,010,569 feet. New business was 8 per cent above production. Shipments were 8 per cent below new business.

"We are only slowly beginning to realize the marvelous power of the sun's rays in the battle with disease," he says. "The ultra-violet rays of the sun spell annihilation to the unseen, but deadly, germs which invade our bodies and eat away our lives."

"People who live in the open, under the beneficent rays of the great healer, the sun, are not prone to consumption. Consumption is the disease of civilization. The Solarium, in my opinion, is the hospital of the future. The novelty of today will become the commonplace of tomorrow."

"Our great-grandchildren will read of the ravages of this scourge in our time with the same amazement as we read of the 'black death' which decimated Europe in the Middle Ages."

She Loves Flowers Best

When you think of a remembrance for your wife, sister, sweetheart or mother, do not forget the old saying, "She loves flowers best."

No matter what the value of the gift is, if she does not feel a thrill of happiness and joy when she receives it, the gift is valueless.

"Say it With Flowers" which form inexpensive gifts, but ones which bring the greatest happiness.
