10-INCH PIN IS MEAL FOR DOG IN KANSAS

PARSONS, Kan.—Winthrop Conn., and Leason, Miss, guard your laurels!

Try this pair on your imagination:

"Eating" a fox terrier pup, belonging to Tom E. Williams, a railroadman, is running around a well dog, today, after dining on a hatpin ten inches long—almost as long as the pup.

Dr. Tom Crispwell, veterinarian, found the tip of the pin coming out near the dog's eye. He gave the pup an anesthetic, pulled out three or four inches of pin, reached in and cut the pin in two and took out the rest. The doctor believes the dog swallowed the pin, gagged with his head down and forced the pin through the softest spot in his head.

Tom Conter, colored desk sergeant, of the Parsons Police Department noticed a chicken he owned with a nail sticking through its breast. He pulled the nail out with a pair of pliers and the chick is as well as ever. "The pin was almost as long as the dog and nail longer than the chick."

RICH NOBLE COUPLE RETIRE TO CONVENT

NAPLES—Two rich members of Sicilian nobility, a husband and wife, each 45, have decided to give up all their property and retire to convents. They are the Prince Ignazio Paterno Castello di Discori, of Catania and his wife, both of whom were widely known and deeply beloved for their lives of kindness and interest in others. The Princess, who was actively engaged in every sort of social and benevolent work, was the General Secretary for St. Jely of an important society of Catholic women's work.

Each will shortly be received irrevocably into a religious order. It is not uncommon for a married man or woman to apply for permission to enter such an order, but it is not always possible that the wish can be carried out, as the law in Italy does not permit divorce, and if one of the married pair wants to recall the other from the convent it might be done. In this case, however, they are both equally agreed in their desire, and it is very rarely that such an instance has occurred, certainly not for many years.

The Prince has already begun his novitiate and been received into the house of the Barnabita Fathers at Monza, this being the order to which he is destined. His wife was allowed, by a special dispensation, to be present at this ceremony, which was conducted in a strictly private form. Afterward the two separated calmly and she returned to Milan to go to Modena where she is to begin her novitiate. She joins the Carmelite nuns and will, when her final vows are taken, live the cloistered life, entirely cut off from the world. She and the Prince give up all they have of worldly goods and benevolent objects.

HIGHWAY SAFETY FOR ALL PLANNED

WASHINGTON—With the preliminary studies looking to the solution of America's vast traffic problem completed, the National Conference on Street and Highway Safety is making final preparations for its important meeting in Washington in December.

Spurred by the 1924 record of more than 23,000 persons killed, thousands injured and millions of dollars worth of property loss resulting from traffic accidents, both Federal, State and municipal officials and private exponents of safer highway conditions are striving to perfect a new system that may be proposed in the December gathering.

Early reports seem to indicate that the publicity campaign against the careless, the drunken and the inexperienced driver has had results, as deaths during the early months of the present year show a decrease over previous periods.

While the present plans do not call for Federal traffic control, the conference believes it will be able, by co-ordination of State and municipal enforcement regulations to bring about uniform laws throughout the United States. Lack of uniformity is one of the big factors in the high death rate and great number of accidents, according to experts.

Laxity of courts toward traffic violators must be abandoned in order to bring about stronger enforcement, according to most officials. Even in cities and States where the laws are adequate there has been a tendency to let the traffic violators off with a light fine.

Officials, headed by Judge William McAdoo, Chief City Magistrate of New York, demand higher or minimum penalties for violation, and jail sentences for reckless and drunken drivers, who are held to be as great a menace to the safety of the population as the felon.

Astoria—More canned salmon shipped during August, than ever before in one month.

Fiv thousand pickers working in hop fields of Marion and Polk counties.

Portland—More than \$53,000,000 will be paid here for raw materials of mines, forests, fields and ranges in next four months.

GOVERNMENT AIDS BRITAIN IN EFFORT TO REVIVE TRADE

LONDON—The British Government has finally lent its support to the general appeal being made to British citizens to "buy British goods," in an endeavor to revive British trade.

Sir Philip Cunliffe-Lister, president of the Board of Trade, speaking in the House of Commons, echoed an appeal that has long been made by British manufacturers, when he appealed to "the whole British people" to buy British goods and aid in offsetting the present adverse British trade balance.

Thus politics and business have combined in an effort to arouse British patriotism to the support of British trade, with the result fairly well in doubt.

The appeal made by Sir Philip was accompanied by astounding statistics, which plainly show that British trade is in a dire way. For instance, Sir Philip pointed out that imports exceeded exports last year by \$1,975,000,000 as compared with \$790,000,000 in 1913.

Sir Philip deprecated tendencies to exaggerate the graveness of the trade situation, and declared that it was untrue to say that Great Britain was living on her reserves, but admitted that Great Britain is far below her pre-war capacity to invest.

Competition is growing with every country that has the power to manufacture, and along with this Great Britain has to face higher production and living

OPENING OF NEW HOTEL IS TO BE MONDAY
(Continued from page One)

It was at first planned to hold the opening program on the night of July 1, but Eric declared that since the hotel was not completed, this move would not be advisable. Also, at that time, the hotel owners and managers on the coast were busy operating their own hotels, that being the busiest time of the season, and many would have been unable to get away for the opening here.

Secretary of the Ashland chamber of commerce, J. H. Fuller, declared this morning that he had extended invitations to all

Leonard C. Pettit

will conduct a class in the Russian school of Viola Teaching, as developed by Ottobor Serrik, the new school of instruction, the result of years of practical teaching, which is recognized for High School credit.

Character and Strength

The greatest element of strength in an individual or in an institution is Character.

The steady growth of the Citizens Bank in its more than 15 years of service and its firm hold today upon public confidence, have been due in a very large measure to the honesty and integrity of the men behind this bank.
