The Best Farm Hand You Ever Had

The Kohler Automatic Electric Plant is a hard worker—
It will pump the water, milk the cows, separate the cream, chop the feed, do the washing and ironing, and a dozen other jobs.

Its a hard worker because it is built to be a power plant as well as a lighting plant. It is not handicapped by storage batteries — full-rated capacity is always on tap. A small starting battery provides for full automatic operation.

Its 110-volt current carries long distances, saves wiring expense, operates standard appliances and gives brilliant light.

If you want a real helper, you owe it to yourself to investigate this proved, successful machine. Why buy an ordinary plant when you can get a Kohler on easy payments? Let us give you the facts.
