A BYPRODUCT OF A MODERN SCHOOL

Few people realize how important a factor are our public schools in the prosperity and growth of a community — purely a commercial viewpoint. We measure the products of our schools in terms of health and educational value, their spiritual influence, their part in developing better citizenship, their work in equipping our youth to meet the problems of life.

When the time comes for a family to change its residence, a location accessible to an efficient school is of first concern. This is true in intra as well as inter-city movements. Realty values are affected by proximity to the class room.

The Better Schools League calls attention to this phase of school influence, an influence that aids in building up the business welfare of a district as well as leading in the mental and ethical development of its youth.

We have the testimony of a former cabinet member who tells of his father's leaving the back-woods of the Ozark mountains because there were available but three months of school.

This leads us to wonder how desirable are new residents to a community who are not sufficiently interested in their children to inquire regarding school advantages before establishing a new home.

This is a view of a by-product of our schools, a form of public service to the community that should impress residents who have no occasion to utilize the schools as well as non-resident property owners, both of whom sometimes feel that they have taxation without proportionate benefits.

The importance of the products and by-products of our schools may be summarized in the words of Herbert Hoover, "If we were to suppress our educational system for a single generation the equipment would decay, the most of our people would die of starvation, and intellectually and spiritually we should slip back four thousand years in human progress.

A RECORD WORTH STRIVING FOR

Portland has just earned a great victory. The city leads all the great cities of the nation in the advance made in eliminating fire hazards, in reducing fire losses, and in preventing deaths by fire.

Every fire takes the life-work of some one as surely as though it drained the blood directly from his veins. It takes the working time of men and women, and that is dear life. Most fires are preventable: either in more careful building, or in more attention to the hazards that careful management can eliminate.

Where, Oh Where Has My Love Dog Gone?

STEWART'S WASHINGTON LETTER

BY CHARLES F. STEWART
NEA Service Writer

WASHINGTON — Never came lawmaker to Washington who was more generally beloved of his associates than Senator Underwood.

And Underwood, liked by everybody, quits for good when the 69th Congress ends. Nominally Underwood is retiring voluntarily from public life. He announced some time ago that he wouldn't be a candidate this year or later.

But nobody's fooled. It isn't much of a secret that he knows he couldn't get a renomination. He can see the writing on the wall in letters a foot high. Such

being the case, the wise policy for him, naturally, is not to try. Underwood has convictions that don't go down, in these times, in his state and he refuses to compromise. That, in itself, stamps him as an individual of honesty and nerve. You may not agree with him in all respects but you have got to recognize him as a character who stands or falls by what he thinks right.

Camp Fire Girls Seeking Support

(Contributed)
—Above all other ideals in Camp Fire work, there is one which stands supreme—good citizenship. In working for ranks and honors, each Camp Fire girl is unconsciously becoming a better

and more useful citizen.

Camp Fire work is comparatively new in Ashland, but it has been well supported by Ashland residents. They have willingly backed every Camp Fire enterprise, which without their support might have been a failure.

With your help and confidence, Camp Fire will be able to continue its good work and Camp Fire Girls will give of their best to you. Without your aid and interest it cannot grow as it should and Camp Fire girls will be unable to return your kindness. We need your support.

There is a movement to revive the old songs under their original names instead of under new names.

In New York a pianist drowned in her bath tub, this being the first casualty reported in the spring rush.

Jack Pickford, movie actor, claims he recently saw his wife, Marilyn Miller, and had dinner with her.

And it's spring in Kansas City, where a woman of 74 has had a permanent wave put in her hair.

In Japan they publish a novel in 196 volumes, but many of our novels seem much longer.

Washington wants to reduce the size of our money. Already, somebody has reduced the amount.

TROUT EGG TAKING WORK IS SUCCESS

PORTLAND, Ore., June 4.—(UP)—Trout egg-taking operations in Klamath and Deschutes counties have been unusually successful this year, according to M. L. Ryckman, superintendent of the state hatcheries.

Five million eggs have been taken from Spencer creek, while Deschutes county has furnished two million eggs.

MANY LEADERS TO ANGLE FOR COOLIDGE JOB

(Continued From Page One)
...his speaking tour this summer. He is a good friend of Lowden

and might withdraw if Lowden nomination in 1936 after it was given to him. He has the groundwork laid for a 1936 organization. He is a dirt farmer and has been making speeches throughout the country on farm relief legislation. Watson—he apparently dominates the republican organization in Indiana, as manifested by his overwhelming victory in the recent senatorial primary.
