"Goiter, or the enlargement of the thyroid stand is of particular interest to inhabitants of the Rogue River Valley because it is one of the so called goiter regions

The reason the gland enlargement of the indicate is somewhat is follows: The thyroid gland is one of the most important structures in the body, as its one of the so called goiter regions in which a portion of the popula-

is known as endemic goiter, and is due to a lack of todine in the soil and water, if as many times occurs, this deficiency is made

More frequently, if no effort is made to supply the lack of iodine The reason the gland enlarges

function is essential to growth and development of the body and mind. The poor infortunite in which the thyroid is wholly lacking is stunted; rarely over three feet in height with a mind less acute than the average four year old child and more the appearance of an animal than of a h man being. It is sometimes sible to bring about almost no mal growth and development by peeding an individual the thy-roid glands of animals.

The substance manufactured the thyroid that is so important thyrold will have to work harder to supply the demands of the growing body and due to this over work, the gland becom larger and is called a goiter.

If the gland would always re main in this condition it would not, except for its appearance, b of much importance, but the de mands of the body vary greatly at different times so that the glandular tissue so essential dur-ing youth, adolesence, puberty and early adult life becomes too February 26, 1919, through April Water Supply Disand may cause any thing from a few symptoms which are merely State treasury the imposing sum distressing to those which are serious and may endanger life.

Aside from the changes indi-cated an enlargement thyroid is many other abnormal structure of the body and is particulraly liable to change at any time that may become very serious placing the possessor's health if not life in jeopardy.

It would seem from the fore-going remarks that all one would need to do to prevent or cure goiter would be to give, every one a little iodine and in a large measure that is so, but the iodine required to prevent goiter is so very little and iodine is such an active drug that much harm may be done particularly to those in adult life that it should never be taken except under the supervision of a physician."

under the provision of the law He also expressed the opinion which authorized a return of that Cow creek would not supply taxes paid on motor vehicle fuels sufficient water to fill even this used for other puroses than the size reservoir and that an addioperation of automobiles over tional supply would have to be found, such as from Beaver creek or other source.

It was generally agreed in the discussion that wells would be merely an experiment and would, undoubtedly, furnish only a small supply of water. It was brought out that there were no real pumping wells in the valley to encourage the city to believe that an experimental well would aid in solving the water question.

Speed? Power? Mileage? Since the first automobile came into the West "Union Oil of California" has been studying these subjects with respect to motor cars. One result is

Union Gasoline

Non-detonating

Union Gasoline provides, and always has provided to Western motorists, the non-detonating feature which supplies full power to the pistons throughout their entire stroke and eliminates all explosive "knocking" or "pinging" on the hills or in heavy pulling—a quality for which Eastern motorists are now buying "special gasolines" and paying 3 cents per gallon in excess of usual prices for them. Yet Union costs no more than other high grade fuels other high grade fuels.

Always use Aristo Motor Oil with non-detonat-ing Union Gasoline because this combination min-imizes carbon to the extent that motors in good condition are run for several years without it.
