#### THEIR BALANCE SHEET

They live in Oregon City. For 22 years they have been man and wife. But he told her one day last week that he was tired of her. Her answer left him speechless for a moment. She confessed that she was tired of him. It was a blow at his conceit.

Then it became a question how to get a divorce, which one of them would apply for it and what cause of separation would be ascribed.

In their dilemma they sought a mutual friend. They told their story of mutual weariness. They asked his advice about how to get the divorce over most quickly and with least notoriety.

But he said to the husband: "You are a business man. Here is a sheet of foolscap peper. Take it into yonder room, sit down and write off a balance sheet. Write your wife's failings on one side. Write her good qualities and the items of her value to you on the other. Then come back."

To the wife he suggested that she write her husband's good and bad qualities in parallel columns.

#### **ROYALTY OF SILK STOCKINGS**

The crown prince and princess of Sweden, now touring America, have seen many sights that impressed them. And a very interesting feminine reaction is contained in Princess Louise's observations on some of the sights of New York.

One thing that impressed her greatly, she said, was the typical New York girl's legs.

"I think," she told 18 women reporters, "it's the lovely silk stockings they wear. And that's what I'm going to take back to Sweden with me-dozens and dozens of silk stockings. I think they make your girls look so' smart, so graceful."

Thus a princess pays homage to a great American institution - the well-dressed woman. It is no wonder that visiting royalty should find our girls an agreeable sight. The only wonder is that there are still so many of our women who let Paris tell them what to wear.

#### THE FIRE "TAX"

Centralia, Washington, is to have a heavy cut in the cost of fire insurance, because of the high standard adopted for fire protection.

Insurance everywhere is based on the risk for property insured. A careless, slipshod town, with fire hazards in every back lot, and with no adequate water supply or equipment, must of necessity pay a ruinously high clean town and good fire fighting equipment will
