

NEW MOVIES
PLANNED BY FILM FIRM

NEW YORK, July 3.—UP—Metro-Goldwyn-Mayer announced today that it will make and release a series of six hair-raising, old-fashioned Western pictures for the new film year.

Four of the lot will be picturizations of Peter B. Kynas stories recently bought for the purpose. The first picture will be released in August.

Tim McCoy, rancher, adventurer, soldier, friend of the Indians, and noted character of the West, will make his screen debut in them.

The four original stories by Kynas, known everywhere to readers of adventure fiction are "Silver Threads Amongst the Gold," "Big Tim Meagher," "Little Calico" and "A Desert Odyssey."

Seeks Tennis Laurels

LIONEL OGDEN

Lionel Ogden is captain of the Stanford University tennis team this season and expects to lead his men against the best of the country in the annual two intercollegiate tournament during the summer. Ogden is a first class player himself, and many concede him a good chance of coping the singles championship at the big get-together.

FRANCES HARDY IS SECOND IN COUNTY ESSAY CONTEST

Frances Hardy, a student at junior high school won second prize in the Oregon historical contest recently conducted through the office of the county school superintendent. Her essay was entitled "The Southern Oregon Chautauqua." It follows: The Southern Oregon Chautauqua. This information was obtained from Mr. G. P. Billings who is an Ashland real estate dealer. He lives on a farm just outside of the city limits of Ashland. He has been an enthusiastic director of the Chautauqua Assembly from the first. He was present when the incident took place and did much in making it a success.

The assembly organized in 1892 but the building was not constructed until later. The Chautauqua Assembly first started in Central Point but later was moved to Ashland where the building now stands. It was undertaken because of its entertainment, educational and religious advantages. President J. S. Smith and the other directors, besides Mr. Billings were present at the time. It all began like this: The Southern Oregon Chautauqua Association was organized in the fall of 1892, the time preceding the great panic of the West. Rev. J. S. Smith who was pastor of the Methodist Episcopal church

of Grants Pass was the organizer of a tract of land near Central Point which was supposed to be owned through the office of the county school superintendent. However, later on, Mr. Smith was appointed pastor at Ashland and after a great deal of persuasion and the advice of a prominent Portland Minister decided to call a meeting of the officers of the Association in Central Point for the purpose of changing the location to Ashland. The members canvassed Ashland for members and over two hundred were secured.

A committee of two officers besides President Smith went to the meeting. Before it was formally called the men discussed whether they should or should not move the Assembly to Ashland. When the meeting was formally called they decided to do so as Ashland was the only place in the valley that had electric lights. They had to purchase the land, about seven acres, of what is known as a part of the Ashland Flour Mill tract, including a plot of ground on which the Chautauqua now stands, and a fine grove which is near the Plaza. They had to erect a building and issue \$2500 in bonds of \$10 each, bearing eight percent interest. This was during the worst panic

that Ashland has ever faced and it is very doubtful if any man had credit sufficient to borrow \$100 from any bank in the valley, although all of Ashland's wealthiest men would have signed the note.

Mr. T. K. Bolton, an Ashland business man told some one he had a brother in Boston who had \$200 to loan. The Chautauqua officers put up the \$200 in bonds and about twenty of Ashland's citizens signed the note. This with the sale of the larger part of bonds made it possible for them to erect a building, the first Chautauqua building. It was the shape of a walnut shell or bee hive, shaped a little to get the proper shade slope.

The Southern Oregon Chautauqua was third on the coast, the first was in Long Beach and the second at Pacific Grove, Calif. Dr. Stratton said the first meeting in the new Southern Oregon Chautauqua was larger than either of the others. A fine program of lectures and music was given.

In five or six years the building proved too small and was enlarged to the seating capacity of fifteen hundred people. In 1916 it was made again to seat four thousand people. This is its present size. The Chautauqua has been the means of advertising the city. Very many lectures, musicians, including two of the largest bands in the country have been on its programs. In addition to these there has been Bible Study, Cooking and Music classes. Professor Larrimore, an expert in athletics and games for children was here for several years. A few years ago the Association sold part of the original purchase to the City of Ashland, for the sum of \$15,000. Mrs. Elizabeth Smith kindly gave the stone building known as the Pioneer Hall to

the Association. The people of Ashland subscribed and bought a piece of ground, as an entrance to the Chautauqua from Main street. The Ladies Chautauqua has done much in keeping up the park and other places around there.

Last year was the first year that the Assembly missed its annual session and there is no appearance so far of a session this year.

It is not a shame and disgrace that an institution that has done so much for the education of the younger people, with keen enjoyment for others should not be allowed to provide the good things of the past.

NEW AUTOMATIC SOON TO HAVE VITAL EFFECT
BERLIN, (UP)—The mechanical loom, which advanced the industrial revolution when it replaced the spinning Jenny eighty years ago, is now itself to be scrapped if a new invention lives up to expectations.

An automatic loom, according to reports from Munich, is soon to be thrown on the market and promises to spell the end of the mechanical weaving apparatus.

The latest invention dispenses with the weaver's shuttle. The thread, needed for a single day's weaving, is held by four spools, which automatically unravel in to the warp and woad of the new-born cloth. The entire mechanism, made of iron, weighs about 250 lbs. and is equally suitable for weaving cotton, wool, linen, flax and silk.

Among the advantages of this machine are its capacity for working day and night, the safeguarding of the threads, the minimum requirements for energy, protection against accidents and the lack of necessity for laborers. Even unskilled workers can

manipulate the appliances, which has just been installed in several large German industries.

GERMAN REPUBLIC TO RESTORE MEDALS

BERLIN, (UP)—Bestowal of medals, titles, ribbons and other insignia of distinction in Germany, abolished by the revolution of 1918, is soon to be restored. The revival of this custom, practiced lavishly by the ex-kaiser, will now require an amendment of the German republican constitution.

In recultivating the distribution of medals for heroic deeds and public services, the German government is motivated less by a wish to return to customs of the former monarchy than by a desire to save money, since decorations are regarded as the cheapest and most valuable gifts that the government can bestow.

In the near future, therefore, the government intends to submit such a bill to the Reichstag and the former custom of handing impressive titles and insignia to

Klamath Gets New School Buildings

KLAMATH FALLS, Ore., July 3.—The first steps in the extensive building program of the Klamath county schools were taken

on Monday when contracts to build 10 school buildings for a low high school at Medford, a low school supply warehouse and three additional school buildings were let. Bids for further construction will be called next week.

Plans are being formulated now to have all German students in North America take part in the Olympic festival.

Oronite FLY SPRAY

This summer spare your household from flies and mosquitoes! Spray with Oronite Fly Spray—a new, more potent insecticide that really kills—a necessity for summer comfort.

More potent, yet pleasant in odor, and non-injurious to persons, pets, or furnishings. Spray where clothes and linens are kept—you'll find no more moth holes after that! Wipes out the annoying house fly, flies, mosquitoes, lice and roaches completely! A wonderful new insecticide from the scientific laboratories of the Standard Oil Company of California.

Now on sale at drug, grocery, and hardware stores, and other dealers.
