WHAT CONSTITUTES ADVERTISING  
"All future events, where an admission charge is made or a collection taken in Advertising."  
No discount will be allowed Religious or Benevolent Orders.

DONATIONS  
No donations to charities or otherwise will be made in advertising or job printing — our contributions will be in cash.

### BY ALL MEANS, DO IT

The Ashland chamber of commerce should lose no time in accepting the generous offer of the management of the Floral Society exhibit in transporting this remarkable display of flowers to Crater Lake for further showing over the week-end at Crater Lake Lodge.

Ashland is justly proud of her flowers. They play an important part in the general beauty of this most delightful city, and the opportunity of thus spreading the fame of the city's floral wealth is too valuable to be lost through inactivity.

Hundreds of people from many far-off cities and states will be at Crater Lake national park and at Crater Lake lodge over the week-end. An exhibit of Ashland flowers during these two or three days will be worth to Ashland many times the cost in time and money. It is a golden opportunity for spreading Ashland's fame afar. It is to be hoped that the chamber of commerce will avail itself of the offer.

### HONORING "BILL" GORE

Ashland residents who can take a couple of hours away from their work tomorrow morning could not go wrong in joining the demonstration at Medford in honor of William H. Gore upon his triumphant return from Washington, D. C., where for the past two months he has been successfully representing the people of his county in procuring the passage of Senator Stanfield's tax relief bill.

Mr. Gore was one of the first to perceive the possibility of the 18 counties of Oregon getting from the federal government the five million dollars which was lost in taxes when the Oregon and California land grant lands reverted to the government. It was he who started the movement during the dying days of last year, and it was he who went to Washington to push through the bill, remaining there until it had been signed by the president.

Mr. Gore is returning home to his friends and neighbors, conscious of a work well done. And the people of Jackson county are glad of the opportunity to give him this spontaneous and rousing welcome.

### REPAIR THE FOUNTAINS

Speedy steps should be taken by the proper city officials to repair the mineral water fountains at the Southern Pacific depot if Ashland is to escape criticism and undesirable publicity from the hundreds of people who pass through the city daily and who are unable to quench their thirst at these bubbling fountains.

This city has an enviable reputation as a summer resort. Its lithia water and its other mineral waters have played a leading part in bringing to Ashland the fame which is justly her's. And now if Ashland fails to guard her mineral heritage, the years of effort in building up her reputation for health-giving waters and as a summer resort will have been lost.

The mineral water fountain at the Southern Pacific station is too valuable as a civic asset to be allowed to remain idle while tourists and travelers complain that the city is not fulfilling her promise to the visitors.

### THE HOME TOWN PAPER

Statistics recently compiled in the east and covering business failures over a period of years showed that of those business houses which closed their doors through financial troubles an average of 75 percent failed to advertise in daily newspapers. Indeed, in one city it was shown that 92 percent of the failures were firms which did not buy space in daily newspapers.

A daily newspaper is just as much a public utility as the light plant, the water plant or similar public necessities. Ask any of the enterprising, progressive merchants of Ashland. They will tell you that their newspaper advertising is an important part of their business; that they look upon their daily newspaper as the only certain, day-by-day method of getting their message before the people.

They went fishing and kept quiet long enough to catch one himself.

### Stewart's WASHINGTON LETTER

BY CHARLES F. STEWART  
NEA Service Writer

WASHINGTON — Whatever else one may think of prohibition, it's difficult to deny that dry enforcement machinery is expensive. Representative Martin B. Madden, in putting its cost for the current fiscal year at \$41,713,106, speaks with authority, as chairman of the House Appropriations Committee, which drafted the legislation for continued war on rum.

If anybody knows the figure, Madden does. He doesn't say "about" so much, either. He sets the sum down, to the last \$6, and, if there had been any, would have included the cents.

Representative A. J. Griffin, also an Appropriations Committee member, not long ago named \$23,354,489 as this year's financial allowance in the interest of Volstead law enforcement, but Madden says Griffin omitted a great many items.

The latter took into account only the maintenance of the prohibition unit and the coast guard's dry activities.

Madden includes also the Justice Department's prohibition

work and court and prison expenses growing out of the federal government's effort to dry the country up.

That \$41,713,106 actually will be spent on prohibition during the fiscal year 1926-7 doesn't necessarily follow.

It's been appropriated, however, and experience teaches that seldom is there much left, by the fiscal year's end, of any government money whose use Congress has authorized.

If anything, it seems likely that government officials will be pinched for funds, for their expenses have been mounting uninterruptedly, year by year, since the first prohibition appropriation of \$3,375,000 was made. Last year it was thought an adequate allowance really had been made. Yet, for 1926-27, it was found necessary to increase it by \$13,167,406. If Madden's book-keeping is to be accepted as correct.

### Kills Himself in Springfield Jail

SPRINGFIELD, Mo., July 22.—Fearing he was losing his mind, M. O. Cook, 42, a railroad employe, asked to be allowed to spend the night in a cell in the county jail. Once in the cell he hanged himself with his suspenders.

### TOM SIMS SAYS

Take too much exercise and you get muscle bound. Think too much and you burst a brain cell. So hum

Nicest thing about an old straw hat is when you leave a cafe you may get a new one by mistake.

What if you had to wait as long for a doctor to come as he has to wait to get his money?

A New York theatrical producer recently died at 61 without ever having been in jail at all.

If grasshoppers were larger they could get jobs at soda fountains.

The early bird catches the dickens when he mows the lawn.

The kiss is the root of much evil; also of much good.

## OUT OUR WAY By Williams

## OPPOSES ATHLETIC PROGRAM FOR GIRLS

SAN FRANCISCO, (UP)—Strenuous athletic training intended to prepare girls for competition in championship track and field meet was condemned by Dr. Herbert R. Stols, state superintendent of parent education, in his biennial report to the California state board of health.

"High school girls should not engage in strenuous athletics if they are to mature into the mothers of tomorrow," he declared.

Dr. Stols, former state superintendent of physical education said that he had received the backing of the majority of California high school principals in his effort to stamp out strenuous competitive athletics for girls.

"I have no quarrel with athletics in moderation," he said, "but I am opposed to such nerve-straining, strength-saving athletic events for girls as the 100 yard dash, the 220 yard dash, high hurdle races and other athletic endeavors in which no high school girl should be allowed to compete."

### NEW BLOOD TEST DEVICE COUNTS RED CORPUSCLES

WASHINGTON, July 22.—(UP)—Now comes the hemacytometer tester, which will tell you whether the number of red and white corpuscles in your blood has been correctly counted. The proportion of red and white cor-

### Temporary Heat Wave is Halted

NEW YORK CITY, July 22.—(UP)—The temporary break in the heat wave which prevailed on the east coast for the past two days with a heavy toll of death, today brought relief to some sections but the weather bureau was unable to forecast a general end of the spell.

The doctor is an instrument which has been installed in the U. S. Surgeon General's department and it is displayed at the Sesqui-centennial Exposition at Philadelphia as another evidence of Yankee invention.

The instrument utilizes the interference of light waves in its operation and according to the Bureau of Standards will insure accurate blood tests.

## Because a pipe bites that's no sign it's teething

DON'T GET THE IDEA old pipe's in his second childhood and cutting teeth just because he bites your tongue half off...

That "bite" means that there's something wrong with your tobacco: either, it isn't mellowed properly or it isn't cut properly... If it's the least bit raw or green it's naturally harsh and bitey... while finely cut or granulated tobacco burns too fast and smokes hot and raspy.

PIPE tobacco must be well-mellowed... it must be cut to burn slowly. And that's exactly why Doctors of Pipeology recommend Granger Rough Cut as a sure-cure for "pipe-bite."

For the famous old Wellman Recipe gives Granger a rich, spicy mellowness... a mellowness all its own. And being rough cut, its large flakes burn slowly and smoke cool... without the slightest trace of any bite... Granger is PIPE tobacco!

GRANGER ROUGH CUT

The half-pound vacuum tin is forty-five cents, the full-pound package, sealed in its original glassine wrapper, is one dollar.

Granger Rough Cut is made by the Liggett & Myers Tobacco Company
