

YANKEES APPEAR TO BE STRONGEST CLUB

BY HENRY L. FARRELL
(United Press Sports Editor)

NEW YORK — (UP)—Miller Huggins, of all the major league managers, can face another season with less worry than his rivals. The manager of the prospective American League champions is perhaps the only pilot in the major leagues who is not faced with the necessity of a reorganization.

Strange things can happen in one year when the luck breaks. This time last season, instead of being out in front, the Yankees were firmly established in the second division and there seemed to be little hope for the future.

The Babe wasn't doing any too well, the pitchers weren't going and there was a huge hole in the middle of the infield. Huggins knew that he had to find a shortstop and a second baseman and luck was with him. He found Tony Lazzeri and Mark Koenig and they meant the difference between the second division and a pennant.

Any ball club can use a good pitcher and Huggins would not turn down a chance to get another experienced hurler and he also could use a good young catcher, but the club would not be lost without either one.

The Philadelphia Athletics are fairly well fixed with playing material and Connie Mack may not make any important changes. He believes that his team is a prospective champion and that it failed this year only because of a lack of experience.

The St. Louis Browns, which were such a disappointment this season, may change managers as George Sisler admits that he is discouraged and wouldn't object if the owners decided to get another manager. If Sisler is relieved, however, he probably will be traded as he said sometime ago that if he gave up the job he would leave the club.

The annual report that Ty Cobb does not want his job at the helm of the Detroit Tigers has been around again this year. Cobb is reaching the end of his active career and it is understood that he wants to get out of the game and get into private business. If Cobb does decide to retire it is understood that Dan Howley, manager of the Toronto International League club will succeed him.

Wilbert Robinson, president-manager of the Brooklyn Robins, has announced definitely that he will not handle the club on the field next year and it is understood that Max Carey, former Pittsburgh captain, may be given the job.

Jack Fournier and Zach Wheat, two veteran Brooklyn stars, who had been considered as candidates to succeed Robby probably will be traded, it is understood.

John McGraw, manager of the Giants, has intimated very strongly that he is going to build over his club. He wants an outfielder to succeed Irish Mousel and a young catcher. He could also use some pitchers.

The Cincinnati Reds, falling this year because of infield weakness, will try to find a new shortstop and another third baseman. The team has plenty of good pitching but Jack Hendricks blamed the collapse of the team on a shortstop weakness, figuring that it cost the team at least nine games.

The Washington Senators will have to rebuild at several positions

So This Is the Way Red Grange Trains!

There are football games and football games, and all kinds have their charm. Mr. Harold Grange, sometimes called "Red," is a hard man to stop; and these girls apparently have decided that brute strength is the only way. However, Grange doesn't seem to mind much. The picture was taken at Chicago, and Red's teammates, or whatever you'd call 'em, are employees of a movie house where his first picture will be shown.

STATE UNIVERSITY OPENS SEPT. 27TH

UNIVERSITY OF OREGON, Eugene, Ore. (Special) — On September 27 the University of Oregon will open its doors for the regular session, marking a half-century of service to the state.

In 1876 a mere handful of students registered for the first time, while in 1926 nearly 3500 are expected to be on the campus for work.

Registration week begins September 20, on which day entering freshmen take a physical examination and on the following day an English examination. Registration material will be released on Wednesday, and the last three days of the week will be taken up by registration of both old

tions and Bucky Harris may decide to trade a couple of players who haven't been getting along with him. He probably could use Goose Goslin to a big advantage in a trade.

The Pittsburgh Pirates, if they fail to win the National League pennant, may have a new manager next season. Despite the claim that Bill McKetchnie and Fred Clark have been in perfect harmony in the roles of dual managers, the release of Max Carey brought out some facts which served to prove that there was a lack of harmony on the bench.

and new students. Late registration lines begin September 27, when classes start. The week before classes start is also devoted to rushing.

The fall term lasts until December 17, when Christmas vacation starts. On January 3 the winter term begins. After spring vacation, the spring term opens March 28, lasting until June 13, which date officially closes the year with commencement exercises for the class of 1927.

The big event of the year will be the Semi-Centennial celebration of the University's half-century of service, October 18-23, terminating in Homecoming. At this time Dr. Arnold Bennett Hall will be inducted into the presidency, and educational conferences, attended by outstanding scholars and educators from all parts of the country, will be held.

Dr. Hall, whose arrival on the campus has been delayed by political science conferences in the east, will meet with the new freshman, Sept. 20, and make an address of welcome to be announced today. He will appear before the student body at the first assembly which comes during the first week of the term.

Seven new professors or assistant professors will be on hand for the opening it is announced. Dr. Clarence V. Boyer, new head of the English department is already on the campus, having come here from the University of Illinois. This list includes Vic-

tor P. Morris, assistant professor of economics. Mr. Morris holds an A. B. and M. A. degree from the University of Oregon and has completed his residence work for the doctorate at Columbia University. Since studying at Columbia he has taught at Grinnell College, Ia., and at the Oregon Agricultural College.

Pat V. Morrisette, instructor in English, has served as graduate assistant this past year and has done work in Written English.

J. K. Homer, assistant professor and debate coach in the department of English. Mr. Homer has made a phenomenal record in forensic work at the University of Oklahoma where he acted as head of the department of Public Speaking for one year.

David R. Davis, assistant professor of mathematics. Mr. Davis is a graduate of the University of Indiana with the degree of B. A. and M. A. He is to receive the Ph. D. degree from the University of Chicago soon.

Horace G. Wyatt, assistant professor of psychology. He was a graduate student at Stanford last year and received his Ph. D. in June.

A. R. Moore, professor of zoology and head of the department. He obtained his doctor's degree from the University of California in 1911, and during the past several years has been professor of physiology at Rutgers University. He is recognized as a national authority on certain

SAILING VESSEL IS OFF ON LONG TRIP

By A. W. V. KING
United Press Staff Correspondent
SYDNEY — (UP) — Romance went from the seas, says the old seadogs, with the deep-sea sailing ships.

If that is so, there is mighty little romance left to be garnered under the Red Ensign of the British. There are now only four British deep-sea sailing ships — the full-rigged ships Monkbarns and William Mitchell, the barque Kilmalle, and the four-masted barque, Garthpool — and all of them were in Australian ports within the last year or so. A fifth the Garthneill, recently was sold to an Adelaide firm as a store ship, after waiting fruitlessly for eight months in Melbourne for a cargo.

It was a sad end to a sentimental journey which had already cost her owners, the Marine Navigation Company of Canada, many thousands of dollars. In May last year she arrived in England with a cargo of nitrates from Chile, showing a heavy loss on her two-year's voyage round the world. She was about to be broken up when her owners yielded to sentiment and sent her out on a last voyage. If it did not return a profit, she was to be broken up, but no amount of sentiment would procure her a cargo, and she arrived in Australia, never to return. The loss of keeping her idle in commission could not go on forever, and she was sold for the proverbial song.

The Garthneill, then the Inverneill, was launched at Glasgow (Scotland) in 1895. She paid her way for more than 20 years, and in 1919 had her greatest fight against wind and waves. She

phases of physiology and is very much interested in the study of marine life along the Pacific Coast. Dr. Moore is favorably known to two or three members of the Medical school staff. It is said, and this relation is expected to promote cooperation between the University and the Medical school.

"Shoo Fly"

The Animal's Friend
Keep Flies and other insects off your cows. Half-cent's worth saves three quarts of milk. Has been used by the best dairy men since 1885. Big shipment just in.

Binder Twine and Grain Sacks at Peil's Corner

Many Are Killed in Mine Disaster

RANGOON, India, Sept. 1. — Forty-three natives were killed by the landslide which devastated the Camp Bawdurn mine of the Burma corporation. Seventy dwellings occupied by laborers were destroyed.

neill arrived at Bunbury, after traveling nearly round the world to reach a port barely 2000 miles from her starting point.

Since then cargoes have been difficult to secure, and slowly the Garthneill has dropped out of the race with Progress, a defeated warrior of the seas.

COMPLETE SOLAR ECLIPSE IN ENGLAND NEXT JUNE

LONDON (United Press) — Greenwich Observatory, universally recognized as the center of the world so far as astronomy is concerned, is greatly preparing for the complete solar eclipse next June.

The eclipse will cover only a narrow strip of less than thirty miles across England, but every portable telescope in the United Kingdom is expected to be moved within the belt of the shadow.

These will include the gigantic fifty-foot telescope at the Greenwich Observatory. This telescope is equipped with a Coelostat mirror, enabling it to be operated while in a horizontal position.

Science, experience, skill, facilities and capital are necessary to make good motor fuel.

"Union Oil of California" includes all of the requirements in the manufacture of

Union Gasoline

Non-detonating

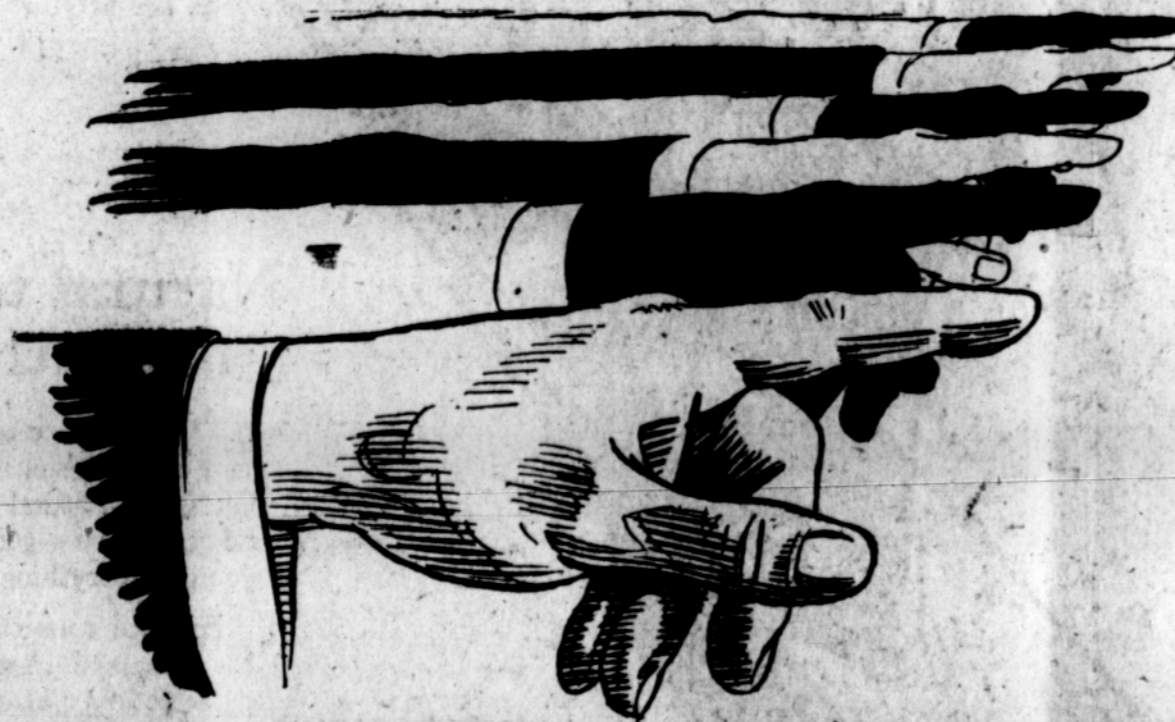

Union Gasoline provides, and always has provided to Western motorists, the non-detonating feature which supplies full power to the pistons throughout their entire stroke and eliminates all explosive "knocking" or "pinging" on the hills or in heavy pulling—a quality for which Eastern motorists are now buying "special gasolines" and paying 3 cents per gallon in excess of usual prices for them. Yet Union costs no more than other high grade fuels.

Always use Aristo Motor Oil with non-detonating Union Gasoline because this combination minimizes carbon to the extent that motors in good condition are run for several years without it.
