## What The Golf Club Means to Ashland

To a city which caters to the tourist trade, a good golf course is just as important as good hotels and good garages.

Ashland has the hotels and garages. It is now building the golf course.

The Ashland course will be made the finest on the Pacific Coast. That means more tourists every year because sixty percent of the tourists carry their own golf clubs.

Ashland cannot compete for tourist travel unless it has an outstanding golf course.

This is your chance to help your home town and at the same time enjoy golfing throughout the year.
