Income Tax Troubles Disappear

Mr. F. A. McGuin, Public Accountant late of Portland now residing at the Lithia Springs Hotel, can aid you if you are having troubles with your Income Tax of this or other years. He has had over fifteen years experience in the preparation of the returns of some of the largest corporations, partnerships and individuals in Oregon and may be depended upon to give satisfaction in all lines of accounting.

The preparation of Income Tax returns is particularly the job of the accountant as he can from experience advise you of the proper methods to be followed in your record keeping whereby at the end of each year the figures necessary to making a proper return are produced automatically. He may be consulted at any time by appointment and all matters brought to him will be treated with confidence.

Come in and Talk Over Your Problems.

Again! The Penalty of Leadership

UNION-ETHYL Gasoline, like all other products that have won the public's favor in a dominating way, must bear the penalty of leadership.

That is to be expected because leadership invariably involves the winning of trade in that line from others.

These shifts are the inevitable marks of progress and no power can stop them.

Union-Ethyl is better than any ordinary gasoline that we or any other makers have produced in the West.

This is not because of any fault in anyone's good product, but due to the fact that the genuine Ethyl fluid adds certain qualities to gasoline that no other fuel can have without it—ours or any other maker's best.

The results of these qualities are: Elimination of all "knocking," faster pick-up; greater speed with less vibration; smoother and more powerful hill-climbing abilities, and more flexibility in traffic than any other motor fuel has ever demonstrated before.

Such superiorities, improvements and betterments are simply prizes that the Natural Laws of Science award in recognition of progressive vision coupled with painstaking research and pioneering effort.

Ten years were given to exhaustive study and experimentation by able scientists and 35,000 tests were made in one of the largest automotive laboratories in the world before the Ethyl fluid was finally perfected.

Thus its leadership was earned, through leadership in vision and effort. Such achievements are never the result of over-night magic.

Neither men nor products rise quickly without a sound foundation:

If you analyze their success, you invariably find that you must go far back to discover the beginnings from which they worked forward, step by step—a long and tedious journey, which you'll agree deserves the leadership in the end.
